PREFACE

The present volume contains some of MR. POE'S most remarkable productions. The nautical story of "Arthur Gordon Pym" was written at an early period of his literary life, is the longest of his fictions, and the only exhibition we have of his abilities in a protracted and sustained narrative. The humorous tales which follow, were, in the author's own opinion, among the most perfect and successful of his performances; and all readers will agree that the discussion respecting the Automaton Chess Player of Maelzel is characteristically ingenious and conclusive.

The publisher has now finished the complete collection of the WORKS OF EDGAR A. POE, originally, contemplated. The series of volumes, of which this is the ninth, embraces, it is believed, everything written by him which he himself would have wished thus to preserve.

NEW YORK, *Feb.* 13, 1856.

A CHAPTER
ON
AUTOGRAPHY
BY

UNDER this head, some years ago, there appeared in the "Southern Literary Messenger" an article which attracted very general attention, not less from the nature of its subject than from the peculiar manner in which it was handled. The editor introduces his readers to a certain Mr. Joseph Miller, who, it is hinted, is not merely a descendant of the illustrious Joe of jest-book notoriety, but is that identical individual in proper person. Upon this point, however, an air of uncertainty is thrown by means of an equivocal, maintained throughout the paper, in respect to Mr. Miller's middle name. This equivocal is put into the mouth of Mr. M. himself. He gives his name, in the first instance, as Joseph A. Miller, but in the course of conversation shifts it to Joseph B., then to Joseph C., and so on through the whole alphabet, until he concludes by desiring a copy of the Magazine to be sent to his address as Joseph Z. Miller, Esquire.

The object of his visit to the editor is to place in his hands the autographs of certain distinguished American *literati*. To these persons he had written rigmarole letters on various topics, and in all cases had been successful in eliciting a reply. The replies only (which it is scarcely necessary to say are all fictitious) are given in the Magazine with a genuine autograph facsimile appended, and are either burlesques of the supposed writer's usual style, or rendered otherwise absurd by reference to the nonsensical questions imagined to have been propounded by Mr. Miller. The autographs thus given are twenty-six in all—corresponding to the twenty-six variations in the initial letter of the hoaxer's middle name.

With the public this article took amazingly well, and many of our principal papers were at the expense of reprinting it with the woodcut autographs. Even those whose names had been introduced, and whose style had been burlesqued, took the joke, generally speaking, in good part. Some of them were at a loss what to make of the matter. Dr. W. E. Channing of Boston was at some trouble, it is said, in calling to mind whether he had or had not actually written to some Mr. Joseph Miller the letter attributed to him in the article. This letter was nothing more than what follows:—

BOSTON,——.

Dear Sir—No such person as Philip Philpot has ever been in my employ as a coachman, or otherwise. The name is an odd one, and not likely to be forgotten. The man must have reference to some other Doctor Channing. It would be as well to question him closely.

Respectfully yours,

To Joseph X. Miller, Esq.

W. E. CHANNING.

The precise and brief sententiousness of the divine

is here, it will be seen, very truly adopted or "hit off."

In one instance only was the *jeu-d'esprit* taken in serious dudgeon. Colonel Stone and the "Messenger" had not been upon the best of terms. Some one of the Colonel's little brochures had been severely treated by that journal, which declared that the work would have been far more properly published among the quack advertisements in a spare corner of the "Commercial." The colonel had retaliated by wholesale vituperation of the "Messenger." This being the state of affairs, it was not to be wondered at that the following epistle was not quietly received on the part of him to whom it was attributed:—

NEW YORK, ———.

Dear Sir—I am exceedingly and excessively sorry that it is out of my power to comply with your rational and reasonable request. The subject you mention is one with which I am utterly unacquainted. Moreover, it is one about which I know very little.

Respectfully,

W. L. STONE.

Joseph V. Miller, Esq.

These tautologies and anti-climaxes were too much for the colonel, and we are ashamed to say that he committed himself by publishing in the "Commercial" an indignant denial of ever having indited such an epistle.

The principal feature of this autograph article, although perhaps the least interesting, was that of the editorial comment upon the supposed MSS., regarding them as indicative of character. In these comments the design was never more than semi-serious. At times, too, the writer was evidently led into error or injustice through the desire of being pungent—not unfrequently sacrificing truth

for the sake of a *bon-mot*. In this manner qualities were often attributed to individuals, which were not so much indicated by their handwriting, as suggested by the spleen of the commentator. But that a strong analogy *does* generally and naturally exist between every man's chirography and character, will be denied by none but the unreflecting. It is not our purpose, however, to enter into the *philosophy* of this subject, either in this portion of the present paper, or in the abstract. What we may have to say will be introduced elsewhere, and in connection with particular MSS. The practical application of the theory will thus go hand in hand with the theory itself.

Our design is threefold:—In the first place, seriously to illustrate our position that the mental features are indicated (with certain exceptions) by the handwriting; secondly, to indulge in a little literary gossip; and, thirdly, to furnish our readers with a more accurate and at the same time a more general collection of the autographs of our *literati* than is to be found elsewhere. Of the first portion of this design we have already spoken. The second speaks for itself. Of the third it is only necessary to say that we are confident of its interest for all lovers of literature. Next to the person of a distinguished man-of-letters, we desire to see his portrait—next to his portrait his autograph. In the latter, especially, there is something which seems to bring him before us in his true idiosyncrasy—in his character of *scribe*. The feeling which prompts to the collection of autographs is a natural and rational one. But complete, or even extensive collections, are beyond the reach of those who themselves do not dabble in the waters of literature. The writer of this article has had opportunities in this way

enjoyed by few. The MSS. now lying before him are a motley mass indeed. Here are letters, or other compositions, from every individual in America who has the slightest pretension to literary celebrity. From these we propose to select the most eminent names—as to give *all* would be a work of supererogation. Unquestionably, among those whose claims we are forced to postpone, are several whose high *merit* might justly demand a different treatment; but the rule applicable in a case like this seems to be that of celebrity rather than that of true worth. It will be understood that, in the necessity of selection which circumstances impose upon us, we confine ourselves *to the most noted among the living literati of the country*. The article above alluded to embraced, as we have already stated, only twenty-six names, and was not occupied *exclusively* either with living persons, or properly speaking, with literary ones. In fact the whole paper seemed to acknowledge no law beyond that of whim. Our present essay will be found to include *one hundred autographs*. We have thought it unnecessary to preserve any particular order in their arrangement.

Professor CHARLES ANTHON of Columbia College, New York, is well known as the most erudite of our classical scholars; and, although still a young man, there are few, if any, even in Europe, who surpass him in his peculiar path of knowledge. In England his supremacy has been tacitly acknowledged by the immediate republication of his editions of Cæsar,

Sallust, and Cicero, with other works, and their adoption as text-books at Oxford and Cambridge. His amplification of Lemprière did him high honour, but of late has been entirely superseded by a Classical Dictionary of his own—a work most remarkable for the extent and comprehensiveness of its details, as well as for its historical, chronological, mythological, and philological *accuracy*. It has at once completely overshadowed everything of its kind. It follows, as a matter of course, that Mr. Anthon has many little enemies among the inditers of merely big books. He has not been unassailed, yet has assuredly remained uninjured in the estimation of all those whose opinion he would be likely to value. We do not mean to say that he is altogether without faults, but a certain antique Johnsonism of style is perhaps one of his worst. He was mainly instrumental (with Professor Henry and Dr. Hawks) in setting on foot the “New York Review,” a journal of which he is the most efficient literary support, and whose most erudite papers have always been furnished by his pen.

The chirography of Professor Anthon is the most regularly beautiful of any in our collection. We see the most scrupulous precision, finish, and neatness about every portion of it—in the formation of individual letters, as well as in the *tout-ensemble*. The perfect symmetry of the MS. gives it, to a casual glance, the appearance of Italic print. The lines are quite straight, and at exactly equal distances, yet are written without black rules, or other artificial aid. There is not the slightest superfluity in the way of flourish or otherwise, with the exception of the twirl in the c of the signature. Yet the whole is neat and graceful rather than forcible. Of four letters now lying before us, one is written on

pink, one on a faint blue, one on green, and one on yellow paper—all of the finest quality. The seal is of green wax, with an impression of the head of Cæsar.

It is in the chirography of such men as Professor Anthon that we look with certainty for indication of character. The life of a scholar is mostly undisturbed by those adventitious events which distort the natural disposition of the man of the world, preventing his real nature from manifesting itself in his MS. The lawyer, who, pressed for time, is often forced to embody a world of heterogeneous memoranda on scraps of paper, with the stumps of all varieties of pen, will soon find the fair characters of his boyhood degenerate into hieroglyphics which would puzzle Doctor Wallis or Champollion; and from chirography so disturbed it is nearly impossible to decide anything. In a similar manner, men who pass through many striking vicissitudes of life, acquire in each change of circumstance a temporary inflection of the handwriting; the whole resulting, after many years, in an unformed or variable MS. scarcely to be recognised by themselves from one day to the other. In the case of literary men generally, we may expect some decisive token of the mental influence upon the MS., and in the instance of the classical devotee we may look with *especial* certainty for such token. We see, accordingly, in Professor Anthon's autography each and all of the known idiosyncrasies of his taste and intellect. We recognise at once the scrupulous precision and finish of his scholarship and of his style—the love of elegance which prompts him to surround himself in his private study with gems of sculptural art and beautifully bound volumes, all arranged with elaborate attention to form, and in the very pedantry of neatness. We perceive, too, the disdain of superfluous embellishment which dis-

tinguishes his compilations, and which gives to their exterior appearance so marked an air of Quakerism. We must not forget to observe that the "want of force" is a want as perceptible in the whole character of the man as in that of the MS.

Washington Irving

The MS. of Mr. IRVING has little about it indicative of his genius. Certainly, no one could suspect from it any nice *finish* in the writer's compositions; nor is this nice finish to be found. The letters now before us vary remarkably in appearance; and those of late date are not nearly so well written as the more antique. Mr. Irving has travelled much, has seen many vicissitudes, and has been so thoroughly satiated with fame as to grow slovenly in the performance of his literary tasks. This slovenliness has affected his handwriting. But even from his earlier MSS. there is little to be gleaned, except the ideas of simplicity and precision. It must be admitted, however, that this fact, in itself, is characteristic of the literary manner, which, however excellent, has no prominent or very remarkable features.

Isaac Benjamin:

For the last six or seven years few men have occupied a more desirable position among us than Mr. BENJAMIN. As the editor of the "American Monthly Magazine," of the "New Yorker," and

more lately of the "Signal," and "New World," he has exerted an influence scarcely second to that of any editor in the country. This influence Mr. B. owes to no single cause, but to his combined ability, activity, causticity, fearlessness, and independence. We use the latter term, however, with some mental reservation. The editor of the "World" is independent so far as the word implies unshaken resolution to follow the bent of one's own will, let the consequences be what they may. He is no respecter of persons, and his vituperation as often assails the powerful as the powerless—indeed the latter fall rarely under his censure. But we cannot call his independence at all times that of principle. We can never be sure that he will defend a cause merely because it is the cause of truth—or even because he regards it as such. He is too frequently biassed by personal feelings—feelings now of friendship, and again of vindictiveness. He is a warm friend, and a bitter, but not implacable enemy. His judgment in literary matters should not be questioned, but there is some difficulty in getting at his real opinion. As a prose writer, his style is lucid, terse, and pungent. He is often witty, often cuttingly sarcastic, but seldom humorous. He frequently injures the force of his fiercest attacks by an indulgence in merely vituperative epithets. As a poet, he is entitled to far higher consideration than that in which he is ordinarily held. He is skilful and passionate, as well as imaginative. His sonnets have not been surpassed. In short, it is as a poet that his better genius is evinced—it is in poetry that his noble spirit breaks forth, showing what the man is, and what, but for unhappy circumstances, he would invariably appear.

Mr. Benjamin's MS. is not very dissimilar to Mr.

Irving's, and, like his, it has no doubt been greatly modified by the excitements of life, and by the necessity of writing much and hastily, so that we can predicate but little respecting it. It speaks of his exquisite sensibility and passion. These betray themselves in the nervous variation of the MS. as the subject is diversified. When the theme is an ordinary one, the writing is legible and has force, but when it verges upon anything which may be supposed to excite, we see the characters falter as they proceed. In the MSS. of some of his best poems this peculiarity is very remarkable. The signature conveys the idea of his *usual* chirography.

A handwritten signature in cursive script, reading "John P. Kennedy". The letters are fluid and connected, with a prominent flourish at the end of the word "Kennedy".

Mr. KENNEDY is well known as the author of "Swallow Barn," "Horse-Shoe Robinson," and "Rob of the Bowl," three works whose features are strongly and decidedly marked. These features are boldness and force of thought (disdaining ordinary embellishment, and depending for its effect upon masses rather than upon details), with a predominant *sense of the picturesque* pervading and giving colour to the whole. His "Swallow Barn" in especial (and it is by the first effort of an author that we form the truest idea of his mental bias) is but a rich succession of picturesque still-life pieces. Mr. Kennedy is well-to-do in the world, and has always taken the world easily. We may therefore expect to find in his chirography, if ever in any, a full indication of the chief feature of his literary style, especially as this chief feature is so remarkably prominent. A glance at his signature will convince

any one that the indication *is* to be found. A painter called upon to designate the main peculiarity of this MS. would speak at once of the *picturesque*. This character is given it by the absence of hair-strokes, and by the abrupt termination of every letter without tapering; also in great measure by varying the size and slope of the letters. Great uniformity is preserved in the whole air of the MS., with great variety in the constituent parts. Every character has the clearness, boldness, and precision of a wood-cut. The long letters do not rise or fall in an undue degree above the others. Upon the whole, this is a hand which pleases us much, although its *bizarrerie* is rather too piquant for the general taste. Should its writer devote himself more exclusively to light letters we predict his future eminence. The paper on which our epistles are written is very fine, clear, and *white*, with gilt edges. The seal is neat, and just sufficient wax has been used for the impression. All this betokens a love of the elegant without effeminacy.

 A handwritten signature in dark ink, reading "Grenville Mellen". The signature is written in a cursive style with a large, ornate initial "G" and a long, sweeping underline that extends across the name.

The handwriting of GRENVILLE MELLEN is somewhat peculiar, and partakes largely of the character of his signature as seen above. The whole is highly indicative of the poet's flighty, hyper-fanciful character, with his unsettled and often erroneous ideas of the beautiful. His straining after effect is well paralleled in the formation of the preposterous G in the signature, with the two dots by its side. Mr. Mellen has genius unquestionably, but there is something in his temperament which obscures it.

A handwritten signature in cursive script, reading "N. Paulding". The signature is written in dark ink on a light background. It features a prominent, sweeping horizontal line that extends to the right, with a small loop at the end. The letters are connected and fluid.

No correct notion of Mr. PAULDING's literary peculiarities can be obtained from an inspection of his MS., which no doubt has been strongly modified by adventitious circumstances. His small *a*'s, *t*'s, and *c*'s are all alike, and the style of the characters generally is French, although the entire MS. has much the appearance of Greek text. The paper which he ordinarily uses is of a very fine glossy texture, and of a blue tint, and with gilt edges. His signature is a good specimen of his general hand.

A handwritten signature in cursive script, reading "L. H. Sigourney." The signature is written in dark ink on a light background. It features a prominent, sweeping horizontal line that extends to the right, with a small loop at the end. The letters are connected and fluid.

Mrs. SIGOURNEY seems to take much pains with her MSS. Apparently she employs *black lines*. Every *t* is crossed, and every *i* dotted, with precision, while the punctuation is faultless. Yet the whole has nothing of effeminacy or formality. The individual characters are large, well and freely formed, and preserve a perfect uniformity throughout. Something in her handwriting puts us in mind of Mr. Paulding's. In both MSS. perfect regularity exists, and in both the style is *formed* or *decided*. Both are beautiful, yet Mrs. Sigourney's is the most legible, and Mr. Paulding's nearly the most illegible in the world. From that of Mrs. S. we might easily form a true estimate of her compositions. Freedom, dignity, precision, and grace, without originality, may be properly attributed to her.

She has fine taste, without genius. Her paper is usually good, the seal small, of green and gold wax, and without impression.

Robert Walsh

MR. WALSH'S MS. is peculiar, from its large, sprawling, and irregular appearance—rather rotund than angular. It always seems to have been hurriedly written. The *t*'s are crossed with a sweeping scratch of the pen, which gives to his epistles a somewhat droll appearance. A *dictatorial* air pervades the whole. His paper is of ordinary quality. His seal is commonly of brown wax mingled with gold, and bears a Latin motto, of which only the words *trans* and *mortuus* are legible.

Mr. Walsh cannot be denied talent, but his reputation, which has been bolstered into being by a *clique*, is not a thing to live. A blustering self-conceit betrays itself in his chirography, which upon the whole is not very dissimilar to that of Mr. E. Everett, of whom we shall speak hereafter.

Edmund Ingraham

MR. INGRAHAM, or Ingrahame (for he writes his name sometimes with, and sometimes without the *e*), is one of our most *popular* novelists, if not one of our best. He appeals always to the taste of the ultra-romanticists (as a matter, we believe, rather of pecuniary policy than of choice) and thus is obnoxious to the charge of a certain cut-and-thrust, blue-fire, melodramaticism. Still, he is capable of better

things. His chirography is very unequal, at times sufficiently clear and flowing, at others shockingly scratchy and uncouth. From it nothing whatever can be predicated except an uneasy vacillation of temper and of purpose.

A handwritten signature in cursive script, reading "W. C. Bryant". The letters are somewhat irregular and shaky, with some loops and flourishes, particularly in the "B" and "t".

Mr. BRYANT's MS. puts us entirely at fault. It is one of the most commonplace clerk's hands which we ever encountered, and has no character about it beyond that of the day-book and ledger. He writes, in short, what mercantile men and professional penmen call a fair hand, but what artists would term an abominable one. Among its regular up and down strokes, waving lines and hair-lines, systematic taperings and flourishes, we look in vain for the force, polish, and decision of the poet. The *picturesque*, to be sure, is equally deficient in his chirography and in his poetical productions.

A handwritten signature in cursive script, reading "Fitz-Greene Halleck". The signature is more fluid and elegant than the one above, with a prominent, sweeping flourish at the end that loops back under the main body of the signature.

Mr. HALLECK's hand is strikingly indicative of his genius. We see in it some force, more grace, and little of the *picturesque*. There is a great deal of freedom about it, and his MSS. seem to be written *currente calamo*, but without hurry. His flourishes,

which are not many, look as if thoughtfully planned, and deliberately, yet firmly executed. His paper is very good, and of a bluish tint, his seal of red wax.

N. P. Willis.

Mr. WILLIS when writing carefully would write a hand nearly resembling that of Mr. Halleck, although no similarity is perceptible in the signatures. His usual chirography is dashing, free, and not ungraceful, but is sadly deficient in force and picturesqueness. It has been the fate of this gentleman to be alternately condemned *ad infinitum*, and lauded *ad nauseam*, a fact which speaks much in his praise. We know of no American writer who has evinced greater versatility of talent, that is to say, of high talent, often amounting to genius, and we know of none who has more narrowly missed placing himself at the head of our letters.

The paper of Mr. Willis's epistles is always fine and glossy. At present he employs a somewhat large seal, with a dove or carrier-pigeon at the top, the word "Glenmary" at bottom, and the initials "N. P. W." in the middle.

Rufus Dawes

Mr. DAWES has been long known as a poet, but his claims are scarcely yet settled, his friends giving him rank with Bryant and Halleck, while his opponents treat his pretensions with contempt. The truth is that the author of "Geraldine" and "Athenia of Damascus" has written occasional verses very well—so well that some of his minor pieces

may be considered equal to any of the minor pieces of either of the two gentlemen above mentioned. His longer poems, however, will not bear examination. "Athenia of Damascus" is pompous nonsense, and "Geraldine" a most ridiculous imitation of Don Juan, in which the beauties of the original have been as sedulously avoided as the blemishes have been blunderingly culled. In style he is perhaps the most inflated, involved, and falsely-figurative of any of our more noted poets. This defect of course is only fully appreciable in what are termed his "sustained efforts," and thus his shorter pieces are often exceedingly good. His apparent erudition is mere verbiage, and were it real would be lamentably out of place where we see it. He seems to have been infected with a blind admiration of Coleridge, especially of his mysticism and cant.

A handwritten signature in cursive script, reading "Henry W. Longfellow". The letters are fluid and connected, with a prominent loop at the end of the last name.

H. W. LONGFELLOW (Professor of Moral Philosophy at Harvard), is entitled to the first place among the poets of America—certainly to the first place among those who have put themselves prominently forth as poets. His good qualities are all of the highest order, while his sins are chiefly those of affectation and imitation—an imitation sometimes verging upon downright theft.

His MS. is remarkably good, and is fairly exemplified in the signature. We see here plain indications of the force, vigour, and glowing richness of his literary style; the deliberate and steady *finish* of his compositions. The man who writes thus may

not accomplish much, but what he does, will always be thoroughly done. The main beauty or at least one great beauty of his poetry, is that of *proportion*; another is a freedom from extraneous embellishment. He oftener runs into affectation through his endeavours at simplicity, than through any other cause. Now this rigid simplicity and proportion are easily perceptible in the MS., which, altogether, is a very excellent one.

The Rev. J. PIERPONT, who, of late, has attracted so much of the public attention, is one of the most accomplished poets in America. His "Airs of Palestine" is distinguished by the sweetness and vigour of its versification, and by the grace of its sentiments. Some of his shorter pieces are exceedingly terse and forcible, and none of our readers can have forgotten his "Lines on Napoleon." His rhythm is at least equal in strength and modulation to that of any poet in America. Here he resembles Milman and Croly.

His chirography, nevertheless, indicates nothing beyond the common place. It is an ordinary clerk's hand—one which is met with more frequently than any other. It is decidedly *formed*; and we have no doubt that he *never* writes otherwise than thus. The MS. of his school-days has probably been persisted in to the last. If so, the fact is in full consonance with the steady precision of his style. The

flourish at the end of the signature is but a part of the writer's general enthusiasm.

A handwritten signature in cursive script, reading "W. Gilmore Simms". The signature is written in dark ink on a light background. It features a large, sweeping initial "W" and a long, horizontal flourish at the end.

Mr. SIMMS is the author of "Martin Faber," "Atlantis," "Guy Rivers," "The Partisan," "Mellichampe," "The Yemassee," "The Damsel of Darien," "The Black Riders of the Congaree," and one or two other productions, among which we must not forget to mention several fine poems. As a poet, indeed, we like him far better than as a novelist. His qualities in this latter respect *resemble* those of Mr. Kennedy, although he equals him in no particular, except in his appreciation of the graceful. In his sense of beauty he is Mr. K.'s superior, but falls behind him in force, and the other attributes of the author of "Swallow Barn." These differences and resemblances are well shown in the MSS. That of Mr. S. has more slope, and more uniformity in detail, with less in the mass—while it has also less of the picturesque, although still much. The middle name is Gilmore; in the cut it looks like Gilmere.

A handwritten signature in cursive script, reading "O. A. Brownson". The signature is written in dark ink on a light background. It features a large, sweeping initial "O" and a long, horizontal flourish at the end.

The Rev. ORESTES A. BROWNSON is chiefly known to the literary world as the editor of the "Boston Quarterly Review," a work to which he contributes, each quarter, at least two-thirds of the matter. He

has published little in book-form—his principal works being “Charles Elwood” and “New Views.” Of these, the former production is, in many respects, one of the highest merit. In logical accuracy, in comprehensiveness of thought, and in the evident frankness and desire for truth in which it is composed, we know of few theological treatises which can be compared with it. Its conclusion, however, bears about it a species of hesitation and inconsequence which betray the fact that the writer has not altogether succeeded in convincing himself of those important truths which he is so anxious to impress upon his readers. We must bear in mind, however, that this is the fault of Mr. Brownson’s subject, and not of Mr. Brownson. However well a man may reason on the great topics of God and immortality, he will be forced to admit tacitly in the end, that God and immortality are things to be felt, rather than demonstrated.

On subjects less indefinite, Mr. B. reasons with the calm and convincing force of a Combe. He is, in every respect, an extraordinary man, and with the more extensive resources which would have been afforded him by early education, could not have failed to bring about important results.

His MS. indicates, in the most striking manner, the unpretending simplicity, directness, and especially the *indefatigability* of his mental character. His signature is more *petite* than his general chirography.

Judge BEVERLY TUCKER, of the College of William and Mary, Virginia, is the author of one of the best

novels ever published in America—"George Balcombe"—although for some reason the book was never a popular favourite. It was, perhaps, somewhat too didactic for the general taste.

He has written a great deal also for the "Southern Literary Messenger" at different times; and at one period acted in part, if not altogether, as editor of that Magazine, which is indebted to him for some very racy articles, in the way of criticism especially. He is apt, however, to be led away by personal feelings, and is more given to vituperation for the mere sake of *point* or pungency than is altogether consonant with his character as judge. Some five years ago there appeared in the "Messenger," under the editorial head, an article on the subject of the "Pickwick Papers" and some other productions of Mr. Dickens. This article, which abounded in well-written but extravagant denunciation of everything composed by the author of "The Curiosity Shop," and which prophesied his immediate downfall, we have reason to believe was from the pen of Judge Beverly Tucker. We take this opportunity of mentioning the subject, because the odium of the paper in question fell altogether upon our shoulders, and it is a burthen we are not disposed and never intended to bear. The review appeared in March, we think, and we had retired from the "Messenger" in the January preceding. About eighteen months previously, and when Mr. Dickens was scarcely known to the public at all, except as the author of some brief tales and essays, the writer of this article took occasion to predict in the "Messenger," and in the most emphatic manner, that high and just distinction which the author in question has attained. Judge Tucker's MS. is diminutive, but neat and legible, and has much

force and precision, with little of the picturesque. The care which he bestows upon his literary compositions makes itself manifest also in his chirography. The signature is more florid than the general hand.

John Sanderson

Mr. SANDERSON, Professor of the Greek and Latin languages in the High School of Philadelphia, is well known as the author of a series of letters entitled "The American in Paris." These are distinguished by ease and vivacity of style, with occasional profundity of observation, and, above all, by the frequency of their illustrative anecdotes and figures. In all these particulars Professor Sanderson is the precise counterpart of Judge Beverly Tucker, author of "George Balcombe." The MSS. of the two gentlemen are nearly identical. Both are neat, clear, and legible. Mr. Sanderson's is somewhat the more crowded.

H. F. Gould.

About Miss GOULD's MS. there is great neatness, picturesqueness, and finish, without over-effeminacy. The literary style of one who writes thus will always be remarkable for sententiousness and epigrammatism; and these are the leading features of Miss Gould's poetry.

C. S. Henry

Prof. HENRY, of Bristol College, is chiefly known by his contributions to our Quarterlies, and as one of

the originators of the "New York Review," in conjunction with Dr. Hawks and Professor Anthon. His chirography is now neat and picturesque (much resembling that of Judge Tucker), and now excessively scratchy, *clerky*, and slovenly—so that it is nearly impossible to say anything respecting it, except that it indicates a vacillating disposition, with unsettled ideas of the beautiful. None of his epistles, in regard to their chirography, end as well as they begin. This trait denotes *fatigability*. His signature, which is bold and decided, conveys not the faintest idea of the general MS.

Mrs. EMBURY is chiefly known by her contributions to the Periodicals of the country. She is one of the most nervous of our female writers, and is not destitute of originality—that rarest of all qualities in a woman, and especially in an American woman.

Her MS. evinces a strong disposition to fly off at a tangent from the old formulæ of the Boarding Academies. Both in it, and in her literary style, it would be well that she should no longer hesitate to discard the absurdities of mere fashion.

Miss LESLIE is celebrated for the homely naturalness of her stories and for the broad satire of her comic style. She has written much for the Maga-

zines. Her chirography is distinguished for neatness and finish, without over-effeminacy. It is rotund, and somewhat diminutive; the letters being separate, and the words always finished with an inward twirl. She is never particular about the quality of her paper or the other externals of epistolary correspondence. From her MSS. in general, we might suppose her solicitous rather about the effect of her compositions as a whole, than about the polishing of the constituent parts. There is much of the picturesque both in her chirography and in her literary style.

Joseph C. Neal

Mr. NEAL has acquired a very extensive reputation through his "Charcoal Sketches," a series of papers originally written for the "Saturday News" of this city, and afterwards published in book form, with illustrations by Johnston. The whole design of the "Charcoal Sketches" may be stated as the depicting of the wharf and street *loafer*; but this design has been executed altogether in caricature. The extreme of burlesque runs throughout the work, which is also chargeable with a tedious repetition of slang and incident. The loafer always declaims the same nonsense, in the same style, gets drunk in the same way, and is taken to the watch-house after the same fashion. Reading one chapter of the book we read all. Any single description would have been an original idea well executed, but the dose is repeated *ad nauseam*, and betrays a woful poverty of invention. The manner in which Mr. Neal's book was belauded by his personal friends of the Philadelphia

press speaks little for their independence, or less for their taste. To dub the author of these "Charcoal Sketches" (which are really very excellent police-reports) with the title of "the American Boz," is either outrageous nonsense or malevolent irony.

In other respects, Mr. N. has evinced talents which cannot be questioned. He has conducted the "Pennsylvanian" with credit, and, as a political writer, he stands deservedly high. His MS. is simple and legible, with much space between the words. It has force, but little grace. Altogether, his chirography is good; but as he belongs to the editorial corps, it would not be just to suppose that any deductions in respect to character could be gleaned from it. His signature conveys the general MS. with accuracy.

A handwritten signature in cursive script, reading "Seba Smith". The signature is written in dark ink on a light background. The first name "Seba" is written in a fluid, connected style, and the last name "Smith" follows in a similar cursive hand. There is a small flourish at the end of the signature.

Mr. SEBA SMITH has become somewhat widely celebrated as the author, in part, of the "Letters of Major Jack Downing." These were very clever productions; coarse, but full of fun, wit, sarcasm, and sense. Their manner rendered them exceedingly popular, until their success tempted into the field a host of brainless imitators. Mr. S. is also the author of several poems; among others, of "Powhatan, a Metrical Romance," which we do not very particularly admire. His MS. is legible, and has much simplicity about it. At times it vacillates, and appears unformed. Upon the whole, it is much such a MS. as David Crockett wrote, and precisely such a one as we might imagine would be written by a *veritable* Jack Downing—by Jack Downing him-

self, had this creature of Mr. Smith's fancy been endowed with a real entity. The fact is that "The Major" is not *all* a creation; at least one-half of his character actually exists in the bosom of his originator. It was the Jack Downing half that composed "Powhatan."

Alexander Slidell

Lieutenant SLIDELL some years ago took the additional name of Mackenzie. His reputation at one period was extravagantly high—a circumstance owing, in some measure, to the *esprit de corps* of the navy, of which he is a member, and to his private influence, through his family, with the Review-cliques. Yet his fame was not altogether undeserved; although it cannot be denied that his first book, "A Year in Spain," was in some danger of being overlooked by his countrymen, until a benignant star directed the attention of the London Bookseller, Murray, to its merits. Cockney octavos prevailed; and the clever young writer, who was cut dead in his Yankee habiliments, met with bows innumerable in the gala dress of an English *imprimatur*. The work now ran through several editions, and prepared the public for the kind reception of "The American in England," which exalted his reputation to its highest pinnacle. Both these books abound in racy description, but are chiefly remarkable for their gross deficiencies in grammatical construction.

Lieut. Slidell's MS. is peculiarly neat and even—quite legible, but altogether too *petite* and effeminate. Few tokens of his literary character are to be found beyond the *petiteness*, which is exactly analogous with the minute detail of his descriptions.

A handwritten signature in cursive script, reading "Francis Lieber". The ink is dark, and the script is fluid and somewhat slanted to the right.

FRANCIS LIEBER is Professor of History and Political Economy, in the College of South Carolina, and has published many works distinguished by acumen and erudition. Among these we may notice a "Journal of a Residence in Greece," written at the instigation of the historian Niebuhr; "The Stranger in America," a piquant book abounding in various information relative to the United States; a treatise on "Education"; "Reminiscences of an Intercourse with Niebuhr"; and an "Essay on International Copyright"—this last a valuable work.

Professor Lieber's personal character is that of the frankest and most unpretending *bonhommie*, while his erudition is rather massive than minute. We may therefore expect his MS. to differ widely from that of his brother scholar Professor Anthon; and so in truth it does. His chirography is careless, heavy, black, and forcible, without the slightest attempt at ornament—very similar, upon the whole, to the well-known chirography of Chief-Justice Marshall. His letters have the peculiarity of a wide margin left at the top of each page.

A handwritten signature in cursive script, reading "Sarah J. Hale". The ink is dark, and the script is more upright and formal than the one above, with a prominent initial 'S'.

Mrs. HALE is well known for her masculine style of thought. This is clearly expressed in her chirography, which is far larger, heavier, and altogether bolder than that of her sex generally. It resembles in a great degree that of Professor Lieber, and is not easily deciphered.

Edward Everett

Mr. EVERETT'S MS. is a noble one. It has about it an air of deliberate precision emblematic of the statesman, and a mingled grace and solidity betokening the scholar. Nothing can be more legible, and nothing need be more uniform. The man who writes thus will never grossly err in judgment or otherwise; but we may also venture to say that he will never attain the loftiest pinnacle of renown. The letters before us have a seal of red wax, with an oval device bearing the initials E. E. and surrounded with a scroll, inscribed with some Latin words which are illegible.

R. H. Bird

Dr. BIRD is well known as the author of "The Gladiator," "Calavar," "The Infidel," "Nick of the Woods," and some other works—"Calavar" being, we think, by far the best of them, and beyond doubt one of the best of American novels.

His chirography resembles that of Mr. Benjamin very closely; the chief difference being in a curl of the final letters in Dr. B.'s. The characters, too, have the air of not being able to keep pace with the thought, and an uneasy want of finish seems to have been the consequence. A vivid imagination might easily be deduced from such a MS.

John Neal

Mr. JOHN NEAL'S MS. is exceedingly illegible and careless. Many of his epistles are perfect enigmas,

and we doubt whether he could read them himself in half-an-hour after they are penned. Sometimes four or five words are run together. Any one, from Mr. Neal's penmanship, might suppose his mind to be what it really is—excessively flighty and irregular, but active and energetic.

C. M. Sedgwick

The penmanship of Miss SEDGWICK is excellent. The characters are well-sized, distinct, elegantly but not ostentatiously formed, and, with perfect freedom of manner, are still sufficiently feminine. The hair-strokes differ little from the downward ones, and the MSS. have thus a uniformity they might not otherwise have. The paper she generally uses is good, blue, and machine-ruled. Miss Sedgwick's handwriting points unequivocally to the traits of her literary style—which are strong common sense, and a masculine disdain of mere ornament. The signature conveys the general chirography.

L. F. Cooper

Mr. COOPER'S MS. is very bad—*unformed*, with little of distinctive character about it, and varying greatly in different epistles. In most of those before us a steel pen has been employed, the lines are crooked, and the whole chirography has a constrained and school-boyish air. The paper is fine, and of a bluish tint. A wafer is always used. Without appearing ill-natured, we could scarcely draw any inferences from such a MS. Mr. Cooper has seen many vicissitudes, and it is probable that he has not always written thus. Whatever are his faults, his genius cannot be doubted.

J. J. Hawks

Dr. HAWKS is one of the originators of the "New York Review," to which journal he has furnished many articles. He is also known as the author of the "History of the Episcopal Church of Virginia," and one or two minor works. He now edits the "Church Record." His style, both as a writer and as a preacher, is characterised rather by a perfect *fluency* than by any more lofty quality, and this trait is strikingly indicated in his chirography, of which the signature is a fair specimen.

Hurry, Wm Herbert

This gentleman is the author of "Cromwell," "The Brothers," "Ringwood, the Rover," and some other minor productions. He at one time edited the "American Monthly Magazine" in connection with Mr. Hoffman. In his compositions for the Magazines, Mr. HERBERT is in the habit of doing both them and himself gross injustice by neglect and hurry. His longer works evince much ability, although he is rarely entitled to be called original. His MS. is exceedingly neat, clear, and forcible; the signature affording a just idea of it. It resembles that of Mr. Kennedy very nearly; but has more slope and uniformity, with, of course, less spirit, and less of the picturesque. He who writes as Mr. Herbert, will be found always to depend chiefly upon his merits of *style* for a literary reputation, and will not be unapt to fall into a pompous grandiloquence. The author of "Cromwell" is sometimes woefully turgid.

A handwritten signature in dark ink, reading "P. G. Palfrey". The script is fluid and cursive, with a long, sweeping underline that extends to the left.

Professor PALFREY is known to the public principally through his editorship of the "North American Review." He has a reputation for scholarship; and many of the articles which are attributed to his pen evince that this reputation is well based, so far as the common notion of scholarship extends. For the rest, he seems to dwell altogether within the narrow world of his *own* conceptions; imprisoning them by the very barrier which he has erected against the conceptions of others.

His MS. shows a total deficiency in the sense of the beautiful. It has great pretension—great straining after effect, but is altogether one of the most miserable MSS. in the world—forceless, graceless, tawdry, vacillating and unpicturesque. The signature conveys but a faint idea of its extravagance. However much we may admire the mere *knowledge* of the man who writes thus, it will not do to place any dependence upon his wisdom or upon his taste.

A handwritten signature in dark ink, reading "F. W. Thomas". The script is cursive and somewhat stylized, with a prominent underline.

F. W. THOMAS, who began his literary career at the early age of seventeen, by a poetical lampoon upon certain Baltimore fops, has since more particularly distinguished himself as a novelist. His "Clinton Bradshawe" is perhaps better known than

any of his later fictions. It is remarkable for a frank, unscrupulous portraiture of men and things, in high life and low, and by unusual discrimination and observation in respect to character. Since its publication he has produced "East and West" and "Howard Pinckney," neither of which seems to have been so popular as his first essay, although both have merit.

"East and West," published in 1836, was an attempt to portray the every-day events occurring to a fallen family emigrating from the East to the West. In it, as in "Clinton Bradshawe," most of the characters are drawn from life. "Howard Pinckney" was published in 1840.

Mr. Thomas was at one period the editor of the Cincinnati "Commercial Advertiser." He is also well known as a public lecturer on a variety of topics. His conversational powers are very great. As a poet, he has also distinguished himself. His "Emigrant" will be read with pleasure by every person of taste.

His MS. is more like that of Mr. Benjamin than that of any other literary person of our acquaintance. It has even more than the occasional nervousness of Mr. B.'s, and, as in the case of the editor of the "New World," indicates the passionate sensibility of the man.

Mr. MORRIS ranks, we believe, as the first of our Philadelphia poets since the death of Willis Gaylord

Clark. His compositions, like those of his late lamented friend, are characterized by sweetness rather than strength of versification, and by tenderness and delicacy rather than by vigor or originality of thought. A late notice of him in the "Boston Notion" from the pen of Rufus W. Griswold, did his high qualities no more than justice. As a prose writer, he is chiefly known by his editorial contributions to the Philadelphia "Inquirer," and by occasional essays for the Magazines.

His chirography is usually very illegible, although at times sufficiently distinct. It has no marked characteristics, and like that of almost every editor in the country, has been so modified by the circumstances of his position as to afford no certain indication of the mental features.

EZRA HOLDEN has written much, not only for his paper, "The Saturday Courier," but for our periodicals generally, and stands high in the public estimation, as a sound thinker, and still more particularly as a fearless expresser of his thoughts.

His MS. (which we are constrained to say is a shockingly bad one, and whose general features may be seen in his signature,) indicates the frank and *naïve* manner of his literary style—a style which not unfrequently flies off into whimsicalities.

Mr. GRAHAM is known to the literary world as the editor and proprietor of "Graham's Magazine," the most popular periodical in America, and also of the "Saturday Evening Post," of Philadelphia. For both of these journals he has written much and well.

His MS. generally is very bad, or at least very illegible. At times it is sufficiently distinct, and has force and picturesqueness, speaking plainly of the *energy* which particularly distinguishes him as a man. The signature above is more scratchy than usual.

Colonel STONE, the editor of the New York "Commercial Advertiser," is remarkable for the great difference which exists between the apparent public opinion respecting his abilities and the real estimation in which he is privately held. Through his paper, and a bustling activity always prone to thrust itself forward, he has attained an unusual degree of influence in New York, and, not only this, but what appears to be a reputation for talent. But this talent we do not remember ever to have heard assigned him by any honest man's private opinion. We place him among our *literati* because he has published certain books. Perhaps the best of these are his "Life of Brandt," and "Life and Times of Red Jacket." Of the rest, his story called "Ups

and Downs," his defence of Animal Magnetism, and his pamphlets concerning Maria Monk, are scarcely the most absurd. His MS. is heavy and sprawling, resembling his mental character in a species of utter unmeaningness, which lies like the nightmare, upon his autograph.

Jared Sparks

The labours of Mr. SPARKS, Professor of History at Harvard, are well known and justly appreciated. His MS. has an unusually odd appearance. The characters are large, round, black, irregular, and perpendicular—the signature, as above, being an excellent specimen of his chirography in general. In all his letters now before us, the lines are as close together as possible, giving the idea of irretrievable confusion; still none of them are illegible upon close inspection. We can form no guess in regard to any mental peculiarities from Mr. Sparks' MSS., which has been no doubt modified by the hurrying and intricate nature of his researches. We might imagine such epistles as these to have been written in extreme haste, by a man exceedingly busy, among great piles of books and papers huddled up around him, like the chaotic tomes of Magliabecchi. The paper used in all our epistles is uncommonly fine.

H. S. Legare

The name of H. S. LEGARE is written without an accent on the final *e*, yet is pronounced as if this

letter were accented,—Legray. He contributed many articles of high merit to the "Southern Review," and has a wide reputation for scholarship and talent. His MS. resembles that of Mr. Palfrey of the "North American Review," and their mental features appear to us nearly identical. What we have said in regard to the chirography of Mr. Palfrey will apply with equal force to that of the present Secretary.

 A handwritten signature in cursive script, reading "George Lunt." The signature is fluid and elegant, with a prominent initial 'G' and a trailing flourish.

Mr. GEORGE LUNT of Newburyport, Massachusetts, is known as a poet of much vigour of style and massiveness of thought. He delights in the grand, rather than in the beautiful, and is not unfrequently turgid, but never feeble. The traits here described impress themselves with remarkable distinctness upon his chirography, of which the signature gives a perfect idea.

 A handwritten signature in cursive script, reading "J. W. Chandler." The signature is bold and somewhat open, with a large initial 'J' and a trailing flourish.

Mr. CHANDLER's reputation as the editor of one of the best daily papers in the country, and as one of our finest *belles lettres* scholars, is deservedly high. He is well known through his numerous addresses, essays, miscellaneous sketches, and prose tales. Some of these latter evince imaginative powers of a superior order.

His MS. is not fairly shown in his signature, the latter being much more open and bold than his

general chirography. His handwriting must be included in the editorial category—it seems to have been ruined by habitual hurry.

H. T. Tuckerman

H. T. TUCKERMAN has written one or two books consisting of "Sketches of Travel." His "Isabel" is, perhaps, better known than any of his other productions, but was never a popular work. He is a *correct* writer so far as mere English is concerned, but an insufferably tedious and dull one. He has contributed much of late days to the "Southern Literary Messenger," with which journal, perhaps, the legibility of his MS. has been an important, if not the principal recommendation. His chirography is neat and distinct, and has some grace, but no force—evincing, in a remarkable degree, the idiosyncrasies of the writer.

Godey

Mr. GODEY is only known to the literary world as editor and publisher of "The Lady's Book," but his celebrity in this regard entitles him to a place in this collection. His MS. is remarkably distinct and graceful—the signature affording an excellent idea of it. The man who invariably writes so well as Mr. G. invariably does, gives evidence of a fine

taste, combined with an indefatigability which will ensure his permanent success in the world's affairs. No man has warmer friends or fewer enemies.

 A handwritten signature in cursive script that reads "John S. Du Solle". The signature is elegant, with a large, sweeping initial 'J' and a decorative flourish at the end consisting of a circle with a vertical line through it.

Mr. DU SOLLE is well known through his connection with the "Spirit of the Times." His prose is forcible, and often excellent in other respects. As a poet, he is entitled to higher consideration. Some of his Pindaric pieces are unusually good, and it may be doubted if we have a better *versifier* in America.

Accustomed to the daily toil of an editor, he has contracted a habit of writing hurriedly, and his MS. varies with the occasion. It is impossible to deduce any inferences from it as regards the mental character. The signature shows rather how he can write than how he does.

 A handwritten signature in cursive script that reads "J. S. French". The signature is highly stylized and decorative, with a large, flowing initial 'J' and a series of loops and flourishes at the bottom.

Mr. FRENCH is the author of a "Life of David Crockett" and also of a novel called "Elkswattawa,"

a denunciatory review of which, in the "Southern Messenger" some years ago, deterred him from further literary attempts. Should he write again, he will probably distinguish himself, for he is unquestionably a man of talent. We need no better evidence of this than his MS., which speaks of force, boldness, and originality. The flourish, however, betrays a certain *floridity* of taste.

A handwritten signature in cursive script, reading "F. S. Fay". The letters are fluid and connected, with a prominent flourish at the end of the last name.

The author of "Norman Leslie" and "The Countess Ida" has been more successful as an essayist about small matters than as a novelist. "Norman Leslie" is more familiarly remembered as "The Great Used Up," while "The Countess" made no definite impression whatever. Of course we are not to expect remarkable features in Mr. FAY'S MS. It has a wavering, finicky, and over-delicate air, without pretension to either grace or force; and the description of the chirography would answer, without alteration, for that of the literary character. Mr. F. frequently employs an amanuensis, who writes a very beautiful French hand. The one must not be confounded with the other.

A handwritten signature in cursive script, reading "J. K. Mitchell". The signature is written in a bold, somewhat stylized cursive, with a horizontal line drawn underneath the entire name.

Dr. MITCHELL has published several pretty songs which have been set to music and become popular. He has also given to the world a volume of poems,

of which the longest was remarkable for an old-fashioned polish and vigour of versification. His MS. is rather graceful than picturesque or forcible—and these words apply equally well to his poetry in general. The signature indicates the hand.

Geo. Morris.

General MORRIS has composed many songs which have taken fast hold upon the popular taste, and which are deservedly celebrated. He has caught the true *tone* for these things, and hence his popularity—a popularity which his enemies would fain make us believe is altogether attributable to his editorial influence. The charge is true only in a measure. The tone of which we speak is that kind of frank, free, hearty *sentiment* (rather than philosophy) which distinguishes Beranger, and which the critics, for want of a better term, call *nationality*.

His MS. is a simple unornamented hand, rather rotund than angular, very legible, forcible, and altogether in keeping with his style.

Lucy A. Calvert

Mr. CALVERT was at one time principal editor of the "Baltimore American," and wrote for that journal some good paragraphs on the common topics of the day. He has also published many translations from the German, and one or two original poems—among others an imitation of Don Juan called "Pelayo," which did him no credit.

He is essentially a feeble and commonplace writer of poetry, although his prose compositions have a certain degree of merit. His chirography indicates the "commonplace" upon which we have commented. It is a very usual, scratchy, and tapering clerk's hand—a hand which no man of talent ever did or could indite, unless compelled by circumstances of more than ordinary force. The signature is far better than the general manuscript of his epistles.

A handwritten signature in dark ink, reading "J. M. McJilton". The script is cursive and somewhat stylized, with a long, sweeping underline that extends to the right.

Mr. McJILTON is better known from his contributions to the journals of the day than from any book-publications. He has much talent, and it is not improbable that he will hereafter distinguish himself, although as yet he has not composed anything of length which, as a whole, can be styled good. His MS. is not unlike that of Dr. Snodgrass, but it is somewhat clearer and better. We can predicate little respecting it beyond a love of exaggeration and *bizarrierie*.

A handwritten signature in dark ink, reading "W. J. Gallagher". The script is cursive and somewhat stylized, with a large, looping underline that extends to the right.

Mr. GALLAGHER is chiefly known as a poet. He is the author of some of our most popular songs,

and has written many long pieces of high but unequal merit. He has the true spirit, and will rise into a just distinction hereafter. His manuscript tallies well with our opinion. It is a very fine one—clear, bold, decided and picturesque. The signature above does not convey, in full force, the general character of his chirography, which is more rotund, and more decidedly placed upon the paper.

Wm H Dana

Mr. DANA ranks among our most eminent poets, and he has been the frequent subject of comment in our Reviews. He has high qualities, undoubtedly, but his defects are many and great.

His MS. resembles that of Mr. Gallagher very nearly, but is somewhat more rolling, and has less boldness and decision. The literary traits of the two gentlemen are very similar, although Mr. Dana is by far the more polished writer, and has a scholarship which Mr. Gallagher wants.

Wm Michael

Mr. McMICHAEL is well known to the Philadelphia public by the number and force of his prose compositions, but he has seldom been tempted into book-publication. As a poet, he has produced some remarkably vigorous things. We have seldom seen a finer composition than a certain celebrated "Monody" of his.

His MS., when not hurried, is graceful and flowing, without picturesqueness. At times it is totally

illegible. His chirography is one of those which have been so strongly modified by circumstances that it is nearly impossible to predicate any thing with certainty respecting them.

A handwritten signature in cursive script, reading "N. C. Brooks". The letters are fluid and connected, with a large, sweeping "B" at the end.

Mr. N. C. BROOKS has acquired some reputation as a Magazine writer. His serious prose is often very good—is always well-worded—but in his comic attempts he fails, without appearing to be aware of his failure. As a poet he has succeeded far better. In a work which he entitled "Scriptural Anthology" among many inferior compositions of length, there were several shorter pieces of great merit:—for example "Shelley's Obsequies" and "The Nicthanthos." Of late days we have seen little from his pen.

His MS. has much resemblance to that of Mr. Bryant, although altogether it is a better hand, with much more freedom and grace. With care Mr. Brooks can write a fine MS. just as with care he can compose a fine poem.

A handwritten signature in cursive script, reading "Thos H. Stockton". The signature is enclosed within a large, elegant oval flourish.

The Rev. THOMAS H. STOCKTON has written many pieces of fine poetry, and has lately distinguished himself as the editor of the "Christian World."

His MS. is fairly represented by his signature,

and bears much resemblance to that of Mr. N. C. Brooks of Baltimore. Between these two gentlemen there exists also a remarkable similarity, not only of thought, but of personal bearing and character. We have already spoken of the peculiarities of Mr. B.'s chirography.

A handwritten signature in cursive script, reading "C. W. Thomson". The signature is written in dark ink and is underlined with a single horizontal stroke.

Mr. THOMSON has written many short poems, and some of them possess merit. They are characterised by tenderness and grace. His MS. has some resemblance to that of Professor Longfellow, and by many persons would be thought a finer hand. It is clear, legible, and open—what is called a rolling hand. It has too much tapering, and too much variation between the weight of the hair strokes and the downward ones, to be forcible or picturesque. In all those qualities which we have pointed out as especially distinctive of Professor Longfellow's MS. it is remarkably deficient; and, in fact, the literary character of no two individuals could be more radically different.

A handwritten signature in cursive script, reading "W. E. Channing". The signature is written in dark ink and features a large, flowing loop at the end.

The Reverend W. E. CHANNING is at the head of our moral and didactic writers. His reputation both at home and abroad is deservedly high, and in

regard to the matters of purity, polish, and modulation of style, he may be said to have attained the dignity of a standard and a classic. He has, it is true, been severely criticised, even in respect to these very points, by the "Edinburgh Review." The critic, however, made out his case but lamely, and proved nothing beyond his own incompetence. To detect occasional or even frequent inadvertences in the way of bad grammar, faulty construction, or misusage of language, is not to prove impurity of *style*—a word which happily has a bolder signification than any dreamed of by the Zoilus of the Review in question. Style regards, more than anything else, the *tone* of a composition. All the rest is not unimportant, to be sure, but appertains to the minor morals of literature, and can be learned by rote by the meanest simpletons in letters—can be carried to its highest excellence by dolts, who, upon the whole, are despicable as stylists. Irving's style is inimitable in its grace and delicacy, yet few of our practised writers are guilty of more frequent inadvertences of language. In what may be termed his mere English, he is surpassed by fifty whom we could name. Mr. Tuckerman's English, on the contrary, is sufficiently pure, but a more lamentable style than that of his "Sicily" it would be difficult to point out.

Besides those peculiarities which we have already mentioned as belonging to Dr. Channing's style, we must not fail to mention a certain calm, broad deliberateness, which constitutes *force* in its highest character, and approaches to majesty. All these traits will be found to exist plainly in his chirography, the character of which is exemplified by the signature, although this is somewhat larger than the general manuscript.

L. A. Wilmer

Mr. WILMER has written and published much; but he has reaped the usual fruits of a spirit of independence, and has thus failed to make that impression on the *popular* mind which his talents, under other circumstances, would have effected. But better days are in store for him, and for all who "hold to the right way," despising the yelpings of the small dogs of our literature. His prose writings have all merit—always the merit of a chastened style. But he is more favourably known by his poetry, in which the student of the British classics will find much for warm admiration. We have few better versifiers than Mr. Wilmer.

His chirography plainly indicates the cautious polish and terseness of his style, but the signature does not convey the print-like appearance of the MS.

J. C. Dow

Mr. Dow is distinguished as the author of many fine sea-pieces, among which will be remembered a series of papers called "The Log of Old Ironsides." His land sketches are not generally so good. He has a fine imagination, which as yet is undisciplined, and leads him into occasional bombast. As a poet he has done better things than as a writer of prose.

His MS., which has been strongly modified by circumstances, gives no indication of his true character, literary or moral.

W. W. W. W. W.

Mr. WELD is well known as the present working editor of the New York "Tattler" and "Brother Jonathan." His attention was accidentally directed to literature about ten years ago, after a minority, to use his own words, "spent at sea, in a store, in a machine-shop, and in a printing-office." He is now, we believe, about thirty-one years of age. His deficiency of what is termed regular education would scarcely be gleaned from his editorials, which, in general, are unusually well written. His "Corrected Proofs" is a work which does him high credit, and which has been extensively circulated, although "printed at odd times by himself, when he had nothing else to do."

His MS. resembles that of Mr. Joseph C. Neal in many respects, but is less open and less legible. His signature is altogether much better than his general chirography.

M. St. Leon Loud

Mrs. M. ST. LEON LOUD is one of the finest poets of this country; possessing, we think, more of the true divine *afflatus* than any of her female contemporaries. She has, in especial, *imagination* of no common order, and unlike many of her sex whom we could mention, is not

Content to dwell in decencies forever.

While she *can*, upon occasion, compose the ordinary metrical sing-song with all the decorous proprieties

which are in fashion, she yet ventures very frequently into a more ethereal region. We refer our readers to a truly beautiful little poem entitled the "Dream of the Lonely Isle," lately published in this Magazine.

Mrs. Loud's MS. is exceedingly clear, neat, and forcible, with just sufficient effeminacy and no more.

Pliny Earle.

Dr. PLINY EARLE, of Frankford, Pa., has not only distinguished himself by several works of medical and general science, but has become well known to the literary world, of late, by a volume of very fine poems, the longest, but by no means the best of which was entitled "Marathon." This latter is not greatly inferior to the "Marco Bozzaris" of Halleck, while some of the minor pieces equal any American poems. His chirography is peculiarly neat and beautiful, giving indication of the elaborate finish which characterises his compositions. The signature conveys the general hand.

David Hoffman.

DAVID HOFFMAN of Baltimore, has not only contributed much and well to monthly Magazines and Reviews, but has given to the world several valuable publications in book form. His style is terse, pungent, and otherwise excellent, although disfigured by a half-comic half-serious pedantry.

His MS. has about it nothing strongly indicative of character.

S. D. LANGTREE has been long and favourably known to the public as editor of the "Georgetown Metropolitan," and more lately of the "Democratic Review," both of which journals he has conducted with distinguished success. As a critic he has proved himself just, bold, and acute, while his prose compositions generally evince the man of talent and taste.

His MS. is not remarkably good, being somewhat too scratchy and tapering. We include him, of course, in the editorial category.

Judge CONRAD occupies, perhaps, the first place among our Philadelphia *literati*. He has distinguished himself both as a prose writer and a poet—not to speak of his high legal reputation. He has been a frequent contributor to the periodicals of this city, and we believe to one at least of the Eastern Reviews. His first production which attracted general notice was a tragedy entitled "Conrad, King of Naples." It was performed at the Arch Street Theatre, and elicited applause from the more judicious. This play was succeeded by "Jack Cade," performed at the Walnut Street Theatre, and lately modified and reproduced under the title of "Aylmere." In its new dress, this drama has been one of the most successful ever written by an American, not only attracting crowded houses, but

extorting the good word of our best critics. In occasional poetry Judge Conrad has also done well. His lines "On a Blind Boy Soliciting Charity" have been greatly admired, and many of his other pieces evince ability of a high order. His political fame is scarcely a topic for these pages, and is, moreover, too much a matter of common observation to need comment from us.

His MS. is neat, legible, and forcible, evincing combined caution and spirit in a very remarkable degree.

J. 2. Adams.

The chirography of Ex-President ADAMS (whose poem, "The Wants of Man," has of late attracted so much attention), is remarkable for a certain steadiness of purpose pervading the whole, and overcoming even the constitutional tremulousness of the writer's hand. Wavering in every letter, the entire MS. has yet a firm, regular, and decisive appearance. It is also very legible.

P. P. COOKE of Winchester, Virginia, is well known, especially in the South, as the author of numerous excellent contributions to the "Southern Literary Messenger." He has written some of the finest poetry of which America can boast. A little piece of his, entitled "Florence Vane," and contributed to the "Gentleman's Magazine" of this city, during our editorship of that journal, was remarkable for

the high ideality it evinced, and for the great delicacy and melody of its rhythm. It was universally admired and copied, as well here as in England. We saw it not long ago, *as original*, in "Bentley's Miscellany." Mr. Cooke has, we believe, nearly ready for press a novel called "Maurice Werterbern," whose success we predict with confidence. His MS. is clear, forcible, and legible, but disfigured by some little of that affectation which is scarcely a blemish in his literary style.

J. Beauchamp Jones

Mr. J. BEAUCHAMP JONES has been, we believe, connected for many years past with the lighter literature of Baltimore, and at present edits the "Baltimore Saturday Visitor," with much judgment and general ability. He is the author of a series of papers of high merit now in course of publication in the "Visitor," and entitled "Wild Western Scenes."

His MS. is distinct, and might be termed a fine one; but is somewhat too much in consonance with the ordinary clerk style to be either graceful or forcible.

W B Burton

Mr. BURTON is better known as a comedian than as a literary man, but he has written many short prose articles of merit, and his quondam editorship of the "Gentleman's Magazine" would, at all events, entitle him to a place in this collection. He has, moreover, published one or two books. An annual

issue by Carey and Hart in 1840 consisted entirely of prose contributions from himself, with poetical ones from Charles West Thompson, Esq. In this work many of the tales were good.

Mr. Burton's MS. is scratchy and *petite*, betokening indecision and care or caution.

RICHARD HENRY WILDE of Georgia, has acquired much reputation as a poet, and especially as the author of a little piece entitled "My Life is like the Summer Rose," whose claim to originality has been made the subject of repeated and reiterated attack and defence. Upon the whole it is hardly worth quarrelling about. Far better verses are to be found in every second newspaper we take up. Mr. Wilde has also lately published, or is about to publish, a "Life of Tasso" for which he has been long collecting material.

His MS. has all the peculiar sprawling and elaborate tastelessness of Mr. Palfrey's, to which altogether it bears a marked resemblance. The love of effect, however, is more perceptible in Mr. Wilde's than even in Mr. Palfrey's.

LEWIS CASS, the Ex-Secretary of War, has distinguished himself as one of the finest *belles-lettres*

scholars of America. At one period he was a very regular contributor to the "Southern Literary Messenger," and even lately he has furnished that journal with one or two excellent papers.

His MS. is clear, deliberate, and statesmanlike; resembling that of Edward Everett very closely. It is not often that we see a letter written altogether by himself. He generally employs an amanuensis, whose chirography does not differ materially from his own, but is somewhat more regular.

A handwritten signature in cursive script, reading "James Brooks". The letters are fluid and connected, with a prominent initial 'J'.

Mr. JAMES BROOKS enjoys rather a private than a public literary reputation; but his talents are unquestionably great, and his productions have been numerous and excellent. As the author of many of the celebrated "Jack Downing" letters, and as the reputed author of the whole of them, he would at all events be entitled to a place among our *literati*.

His chirography is simple, clear, and legible, with little grace and less boldness. These traits are precisely those of his literary style.

A handwritten signature in cursive script, reading "Jack Downing". The signature is more stylized than the one above, with a large, sweeping 'J' and 'D'.

As the authorship of the "Jack Downing" letters is even still considered by many a moot point (although in fact there should be no question about it), and as we have already given the signature of

Mr. Seba Smith, and (just above) of Mr. Brooks, we now present our readers with a facsimile signature of the "*veritable Jack*" himself, written by him individually in our own bodily presence. Here, then, is an opportunity of comparison.

The chirography of "the veritable Jack" is a very good, honest sensible hand, and not very dissimilar to that of Ex-President Adams.

J. R. Lowell.

Mr. J. R. LOWELL, of Massachusetts, is entitled, in our opinion, to at least the second or third place among the poets of America. We say this on account of the vigour of his *imagination*—a faculty to be first considered in all criticism upon poetry. In this respect he surpasses, we think, any of our writers (at least any of those who have put themselves prominently forth as poets) with the exception of Longfellow, and perhaps one other. His ear for rhythm, nevertheless, is imperfect, and he is very far from possessing the artistic ability of either Longfellow, Bryant, Halleck, Sprague, or Pierpont. The reader desirous of properly estimating the powers of Mr. Lowell will find a very beautiful little poem from his pen in the October number of this Magazine. There is one also (not quite so fine) in the number for last month. He will contribute regularly.

His MS. is strongly indicative of the vigour and precision of his poetical thought. The man who writes thus, for example, will never be guilty of metaphorical extravagance, and there will be found *terseness* as well as strength in all that he does.

 A cursive signature that reads "L. J. Cist". The letters are fluidly connected, with a large, sweeping flourish at the end of the word "Cist".

Mr. L. J. CIST, of Cincinnati, has not written much prose, and is known especially by his poetical compositions, many of which have been very popular, although they are at times disfigured by false metaphor, and by a meretricious straining after effect. This latter foible makes itself clearly apparent in his chirography, which abounds in ornamental flourishes, not ill executed, to be sure, but in very bad taste.

 A cursive signature that reads "C. S. Arthur". The signature is written in a somewhat loose, decorative hand with a prominent flourish at the end.

Mr. ARTHUR is not without a rich talent for description of scenes in low life, but is uneducated, and too fond of mere vulgarities to please a refined taste. He has published "The Subordinate," and "Insubordination," two tales distinguished by the peculiarities above mentioned. He has also written much for our weekly papers and the "Lady's Book."

His hand is a commonplace clerk's hand, such as we might expect him to write. The signature is much better than the general MS.

 A cursive signature that reads "J. E. Heath". The signature is written in a fluid, connected hand with a long, sweeping flourish at the end.

Mr. HEATH is almost the only person of any literary distinction residing in the chief city of the

Old Dominion. He edited the "Southern Literary Messenger" in the first five or six months of its existence; and, since the secession of the writer of this article, has frequently aided in its editorial conduct. He is the author of "Edge-Hill," a well-written novel, which, owing to the circumstances of its publication, did not meet with the reception it deserved. His writings are rather polished and graceful than forcible or original, and these peculiarities can be traced in his chirography.

Thos Chivers

Dr. THOMAS HOLLEY CHIVERS, of New York, is at the same time one of the best and one of the worst poets in America. His productions affect one as a wild dream—strange, incongruous, full of images of more than arabesque monstrosity, and snatches of sweet unsustained song. Even his worst nonsense (and some of it is horrible) has an indefinite charm of sentiment and melody. We can never be sure that there is *any* meaning in his words—neither is there any meaning in many of our finest musical airs—but the effect is very similar in both. His figures of speech are metaphor run mad, and his grammar is often none at all. Yet there are as fine individual passages to be found in the poems of Dr. Chivers as in those of any poet whatsoever.

His MS. resembles that of P. P. Cooke very nearly, and in poetical character the two gentlemen are closely akin. Mr. Cooke is, by much, the more *correct*, while Dr. Chivers is sometimes the more poetic. Mr. C. always sustains himself; Dr. C. never.

Judge STORY, and his various literary and political labours, are too well known to require comment.

His chirography is a noble one—bold, clear, massive, and deliberate, betokening in the most unequivocal manner all the characteristics of his intellect. The plain unornamented style of his compositions is impressed with accuracy upon his handwriting, the whole air of which is well conveyed in the signature.

Mr. JOHN FROST, Professor of Belles Lettres in the High School of Philadelphia, and at present editor of "The Young People's Book," has distinguished himself by numerous literary compositions for the periodicals of the day, and by a great number of published works which come under the head of the *utile* rather than of the *dulce*—at least in the estimation of the young. He is a gentleman of fine taste, sound scholarship, and great general ability.

His chirography denotes his mental idiosyncrasy with great precision. Its careful neatness, legibility, and finish are but a part of that turn of mind which leads him so frequently into compilation. The signature here given is more diminutive than usual.

Mr. J. F. OTIS is well known as a writer for the Magazines; and has, at various times, been connected

with many of the leading newspapers of the day—especially with those in New York and Washington. His prose and poetry are equally good; but he writes too much and too hurriedly to write invariably well. His taste is fine, and his judgment in literary matters is to be depended upon at all times when not interfered with by his personal antipathies or predilections.

His chirography is exceedingly illegible and, like his style, has every possible fault except that of the commonplace.

Mr. REYNOLDS occupied at one time a distinguished position in the eye of the public on account of his great and laudable exertions to get up the American South Polar expedition, from a personal participation in which he was most shamefully excluded. He has written much and well. Among other works, the public are indebted to him for a graphic account of the noted voyage of the frigate Potomac to Madagascar.

His MS. is an ordinary clerk's hand, giving no indication of character.

DAVID PAUL BROWN is scarcely more distinguished in his legal capacity than by his literary compositions. As a dramatic writer he has met with much success. His "Sertorius" has been particularly well received

both upon the stage and in the closet. His fugitive productions, both in prose and verse, have also been numerous, diversified, and excellent.

His chirography has no doubt been strongly modified by the circumstances of his position. No one can expect a lawyer in full practice to give in his MS. any true indication of his intellect or character.

E. E. Stedman

Mrs. E. CLEMENTINE STEDMAN has lately attracted much attention by the delicacy and grace of her poetical compositions, as well as by the piquancy and spirit of her prose. For some months past we have been proud to rank her among the best of the contributors to "Graham's Magazine."

Her chirography differs as materially from that of her sex in general as does her literary manner from the usual namby-pamby of our blue-stockings. It is indeed a beautiful MS., very closely resembling that of Professor Longfellow, but somewhat more diminutive, and far more full of grace.

John S. Whittier

J. GREENLEAF WHITTIER is placed by his particular admirers in the very front rank of American poets. We are not disposed, however, to agree with their decision in every respect. Mr. Whittier is a fine versifier, so far as strength is regarded independently of modulation. His subjects, too,

are usually chosen with the view of affording scope to a certain *vivida vis* of expression which seems to be his forte; but in taste, and especially in *imagination*, which Coleridge has justly styled the *soul* of all poetry, he is ever remarkably deficient. His themes are *never* to our liking.

His chirography is an ordinary clerk's hand, affording little indication of character.

Mrs. ANN S. STEPHENS was at one period the editor of the "Portland Magazine," a periodical of which we have not heard for some time, and which, we presume, has been discontinued. More lately her name has been placed upon the title-page of "The Lady's Companion" of New York, as one of the conductors of that journal—to which she has contributed many articles of merit and popularity. She has also written much and well for various other periodicals, and will hereafter enrich this magazine with her compositions, and act as one of its editors.

Her MS. is a very excellent one, and differs from that of her sex in general by an air of more than usual force and freedom.

Note.—The foregoing "Chapter on Autography," as will be seen from a reference in the opposite page, originally appeared in two parts.—*Ed.*

APPENDIX

IN the foregoing *facsimile* signatures of the most distinguished American *literati* our design was to furnish a *complete* series of Autographs, embracing a specimen of the MS. of *each of the most noted among our living male and female writers*. For obvious reasons, we made no attempt at classification or arrangement—either in reference to reputation or our own private opinion of merit. Our second article will be found to contain as many of the *Dii majorum gentium* as our first; and this, our third and last, as many as either—although fewer names, upon the whole, than the preceding papers. The impossibility of procuring the signatures now given, at a period sufficiently early for the immense edition of December, has obliged us to introduce this Appendix.

It is with great pleasure that we have found our anticipations fulfilled in respect to the *popularity* of these chapters—our individual claim to merit is so trivial that we may be permitted to say so much—but we confess it was with no less surprise than pleasure that we observed so little discrepancy of opinion manifested in relation to the hasty, critical, or rather gossiping, observations which accompanied the signatures. Where the subject was so wide and so necessarily *personal*—where the claims of more than one hundred *literati*, summarily disposed of, were turned over for re-adjudication to a press so intricately bound up in their interest as is ours—it is really surprising how little

of dissent was mingled with so much of general comment. The fact, however, speaks loudly to one point:—to the *unity of truth*. It assures us that the differences which exist among us are differences not of real, but of affected opinion, and that the voice of him who maintains fearlessly what he believes honestly, is pretty sure to find an echo (if the speaking be not mad) in the vast heart of the world at large.

The “Writings of CHARLES SPRAGUE” were first collected and published about nine months ago by Mr. Charles S. Francis of New York. At the time of the issue of the book we expressed our opinion frankly in respect to the general merits of the author—an opinion with which one or two members of the Boston press did not see fit to agree—but which, as yet, we have found no reason for modifying. What we say now is, in spirit, merely a repetition of what we said then. Mr. Sprague is an accomplished *belles-lettres* scholar, so far as the usual ideas of scholarship extend. He is a very correct rhetorician of the old school. His versification has not been equalled by that of any American—has been surpassed by no one living or dead. In this regard there are to be found finer passages in his poems than any elsewhere. These are his chief merits. In the *essentials* of poetry he is excelled by twenty of our countrymen whom we could name. Except in a very few instances he gives no evidence of the loftier ideality. His “Winged Worshippers” and

"Lines on the Death of M. S. C." are *beautiful* poems—but he has written nothing else which should be called so. His "Shakspeare Ode," upon which his high reputation mainly depended, is quite a *second-hand* affair—with no merit whatever beyond that of a polished and vigorous versification. Its imitation of "Collins' Ode to the Passions" is obvious. Its allegorical conduct is mawkish, *passé*, and absurd. The poem, upon the whole, is just such a one as would have obtained its author an Etonian prize some forty or fifty years ago. It is an exquisite specimen of mannerism, without meaning and without merit—of an artificial, but most inartistical style of composition, of which conventionality is the soul,—taste, nature, and reason the antipodes. A man may be a clever financier without being a genius.

It requires but little effort to see in Mr. Sprague's MS. all the idiosyncrasy of his intellect. Here are distinctness, precision, and vigour—but vigour employed upon *grace* rather than upon its legitimate functions. The signature fully indicates the general hand—in which the spirit of elegant imitation and conversation may be seen reflected as in a mirror.

A handwritten signature in dark ink, reading "Cornelius Mathews". The script is fluid and cursive, with a prominent flourish at the end of the name.

MR. CORNELIUS MATHEWS is one of the editors of "Arcturus," a monthly journal which has attained much reputation during the brief period of its existence. He is the author of "Puffer Hopkins," a clever satirical tale somewhat given to excess in caricature, and also of the well-written retrospective

criticisms which appear in his Magazine. He is better known, however, by "The Motley Book," published some years ago—a work which we had no opportunity of reading. He is a gentleman of taste and judgment unquestionably.

His MS. is much to our liking—bold, distinct, and picturesque—such a hand as no one destitute of talent indites. The signature conveys the hand.

MR. CHARLES FENNO HOFFMAN is the author of "A Winter in the West," "Greyslaer," and other productions of merit. At one time he edited, with much ability, the "American Monthly Magazine" in conjunction with Mr. Benjamin, and subsequently with Dr. Bird. He is a gentleman of talent.

His chirography is not unlike that of Mr. Mathews. It has the same boldness, strength, and picturesqueness, but is more diffuse, more ornamented, and less legible. Our *facsimile* is from a somewhat hurried signature, which fails in giving a correct idea of the general hand.

MR. HORACE GREELEY, present editor of "The Tribune," and formerly of the "New-Yorker," has for many years been remarked as one of the most able and honest of American editors. He has written much and invariably well. His political knowledge is equal to that of any of his contemporaries—his

general information extensive. As a *belles-lettres* critic he is entitled to high respect.

His MS. is a remarkable one—having about it a peculiarity which we know not how better to designate than as a *converse* of the picturesque. His characters are scratchy and irregular, ending with an *abrupt taper*—if we may be allowed this contradiction in terms, where we have the *facsimile* to prove that there is no contradiction in fact. All abrupt MSS., save this, have square or *concise* terminations of the letters. The whole chirography puts us in mind of a *jig*. We can fancy the writer jerking up his hand from the paper at the end of each word, and, indeed, of each letter. What mental idiosyncrasy lies *perdu* beneath all this is more than we can say, but we will venture to assert that Mr. Greeley (whom we do not know personally) is, *personally*, a very remarkable man.

The name of Mr. PROSPER M. WETMORE is familiar to all readers of American light literature. He has written a great deal, at various periods, both in prose and poetry (but principally in the latter) for our Papers, Magazines, and Annuals. Of late days we have seen but little, comparatively speaking, from his pen.

His MS. is not unlike that of Fitz-Greene Halleck, but is by no means so good. Its clerky flourishes indicate a love of the beautiful with an undue straining for effect—qualities which are distinctly traceable in his poetic efforts. As many as five or six words are occasionally run together; and no man

who writes thus will be noted for *finish* of style. Mr. Wetmore is sometimes very slovenly in his best compositions.

Wetmore

Professor WARE, of Harvard, has written some very excellent poetry, but is chiefly known by his "Life of the Saviour," "Hints on Extemporaneous Preaching," and other religious works.

His MS. is fully shown in the signature. It evinces the direct unpretending strength and simplicity which characterise the man, not less than his general compositions.

William B. O. Peabody

The name of WILLIAM B. O. PEABODY, like that of Mr. Wetmore, is known chiefly to the readers of our light literature, and much more familiarly to Northern than to Southern readers. He is a resident of Springfield, Mass. His occasional poems have been much admired.

His chirography is what would be called beautiful by the ladies universally, and, perhaps, by a large majority of the bolder sex. Individually, we think it a miserable one—too careful, undecided, tapering, and effeminate. It is not unlike Mr. Paulding's, but is more regular and more legible, with less force. We hold it as undeniable that no man of *genius* ever wrote such a hand.

A handwritten signature in cursive script, reading "Epes Sargent". The signature is fluid and elegant, with a large, sweeping initial 'E' and a decorative flourish at the end.

EPES SARGENT, Esq., has acquired high reputation as the author of "Velasco," a tragedy full of beauty as a poem, but not adapted—perhaps not intended—for representation. He has written, besides, many very excellent poems—"The Missing Ship," for example, published in the "Knickerbocker"—the "Night Storm at Sea"—and, especially, a fine production entitled "Shells and Sea-Weeds." One or two Theatrical Addresses from his pen are very creditable *in their way*—but the way itself is, as we have before said, execrable. As an editor, Mr. Sargent has also distinguished himself. He is a gentleman of taste and high talent.

His MS. is too much in the usual clerk style to be either vigorous, graceful, or easily read. It resembles Mr. Wetmore's, but has somewhat more force. The signature is better than the general hand, but conveys its idea very well.

A handwritten signature in cursive script, reading "W. Allston". The signature is more compact and less ornate than the one above, with a clear 'W' and 'A'.

The name of "WASHINGTON ALLSTON," the poet and painter, is one that has been long before the public. Of his paintings we have here nothing to say—except briefly, that the most noted of them are not to our taste. His poems are not all of a high order of merit; and, in truth, the faults of his pencil and of his pen are identical. Yet every reader will remember his "Spanish Maid" with pleasure, and the "Address to Great Britain," first published in

Coleridge's "Sibylline Leaves," and attributed to an English author, is a production of which Mr. Allston may be proud.

His MS., notwithstanding an exceedingly simple and boyish air, is one which we particularly admire. It is forcible, picturesque, and legible, without ornament of any description. Each letter is formed with a thorough distinctness and individuality. Such a MS. indicates caution and precision, most unquestionably—but we say of it as we say of Mr. Peabody's (a very different MS.) that no man of original genius ever did or could habitually indite it under any circumstances whatever. The signature conveys the general hand with accuracy.

Alfred B Street

Mr. ALFRED B. STREET has been long before the public as a poet. At as early an age as fifteen, some of his pieces were published by Mr. Byrant in the "Evening Post"—among these was one of much merit, entitled a "Winter Scene." In the "New-York Book," and in the collections of American poetry by Messieurs Keese and Byrant, will be found many excellent specimens of his maturer powers. "The Willewemoc," "The Forest Tree," "The Indian's Vigil," "The Lost Hunter," and "White Lake" we prefer to any of his other productions which have met our eye. Mr. Street has fine taste, and a keen sense of the beautiful. He writes carefully, elaborately, and correctly. He has made Mr. Byrant his model, and in all Mr. Byrant's good points would be nearly his equal, were it not for the sad and too perceptible stain of the imitation. That he has imitated at all—or rather that, in mature age,

he has persevered in his imitations—is sufficient warranty for placing him among the men of talent rather than among the men of genius.

His MS. is full of corroboration of this warranty. It is a very pretty chirography, graceful, legible, and neat. By most persons it would be called beautiful. The fact is, it is without fault—but its merits, like those of his poems, are chiefly negative.

Mr. RICHARD PENN SMITH, although perhaps better known in Philadelphia than elsewhere, has acquired much literary reputation. His chief works are "The Forsaken," a novel; a pseudo-autobiography called "Colonel Crockett's Tour in Texas"; the tragedy of "Caius Marius," and two domestic dramas entitled "The Disowned" and "The Deformed." He has also published two volumes of miscellanies under the title of "The Actress of Padua and other Tales," besides occasional poetry. We are not sufficiently cognisant of any of these works to speak with decision respecting their merits. In a biography of Mr. Smith, however, very well written, by his friend, Mr. McMichael, of this city, we are informed of "The Forsaken" that "a large edition of it was speedily exhausted"—of "The Actress of Padua," that it "had an extensive sale and was much commended"—of the "Tour in Texas," that "few books attained an equal popularity"—of "Caius Marius," that "it has great capabilities for an acting play,"—of "The Disowned" and "The Deformed," that they "were performed at the London theatres, where they both made a favourable

impression"—and of his poetry in general, "that it will be found superior to the average quality of that commodity." "It is by his dramatic efforts," says the biographer, "that his merits as a poet must be determined, and judged by these he will be assigned a place in the foremost rank of American writers." We have only to add that we have the highest respect for the judgment of Mr. McMichael.

Mr. Smith's MS. is clear, graceful, and legible, and would generally be called a fine hand, but is somewhat too clerky for our taste.

Dr. OLIVER WENDEL HOLMES, of Boston, late Professor of Anatomy and Physiology at Dartmouth College, has written many productions of merit, and has been pronounced by a very high authority the best of the humorous poets of the day.

His chirography is remarkably fine, and a quick fancy might easily detect, in its graceful yet picturesque quaintness, an analogy with the vivid drollery of his style. The signature is a fair specimen of the general MS.

Bishop DOANE, of New Jersey, is somewhat more extensively known in his clerical than in a literary capacity, but has accomplished much more than sufficient in the world of books to entitle him to a place among the most noted of our living men of

letters. The compositions by which he is best known were published, we believe, during his professorship of Rhetoric and Belles Lettres in Washington College, Hartford.

His MS. has some resemblance to that of Mr. Greeley of "The Tribune." The signature is far bolder and altogether better than the general hand.

Albert Pike

We believe that Mr. ALBERT PIKE has never published his poems in book form; nor has he written anything since 1834. His "Hymns to the Gods," and "Ode to the Mocking Bird," being printed in "Blackwood," are the chief basis of his reputation." His lines "To Spring" are, however, much better in every respect, and a little poem from his pen, entitled "Ariel," originally published in the "Boston Pearl," is one of the finest of American compositions. Mr. Pike has unquestionably merit, and that of a high order. His idealism is rich and well-disciplined. He is the most *classic* of our poets in the best sense of the term, and of course his classicism is very different from that of Mr. Sprague—to whom, nevertheless, he bears much resemblance in other respects. Upon the whole, there are few of our native writers to whom we consider him inferior.

His MS. shows clearly the spirit of his intellect. We observe in it a keen sense not only of the beautiful and graceful but of the picturesque—neatness, precision, and general finish, verging upon effeminacy. In force it is deficient. The signature fails to convey the entire MS., which depends upon masses for its peculiar character.

Dr. JAMES MCHENRY, of Philadelphia, is well known to the literary world as the writer of numerous articles in our Reviews and lighter journals, but more especially as the author of "The Antediluvians," an epic poem which has been the victim of a most shameful cabal in this country, and the subject of a very disgraceful pasquinade on the part of Professor Wilson. Whatever may be the demerits, in some regard, of this poem, there can be no question of the utter want of fairness, and even of common decency, which distinguished the Philip-
pic in question. The writer of a *just* review of the "Antediluvians"—the only tolerable American epic—would render an important service to the literature of his country.

Dr. McHenry's MS. is distinct, bold, and simple, without ornament or superfluity. The signature well conveys the idea of the general hand.

Mrs. R. S. NICHOLS has acquired much reputation of late years by frequent and excellent contributions to the Magazines and Annuals. Many of her compositions will be found in our pages.

Her MS. is fair, neat, and legible, but formed somewhat too much upon the ordinary boarding-school model to afford any indication of character. The signature is a good specimen of the hand.

Rich.^d Locke

MR. RICHARD ADAMS LOCKE is one among the few men of *unquestionable genius* whom the country possesses. Of the "Moon Hoax" it is supererogatory to say one word—not to know *that* argues one's self unknown. Its rich imagination will long dwell in the memory of every one who reads it, and surely if

the worth of any thing
Is just so much as it will bring—

if, in short, we are to judge of the value of a literary composition in any degree by its *effect*—then was the "Hoax" most precious.

But Mr. Locke is also a poet of high order. We have seen—nay more—we have heard him read—verses of his own which would make the fortune of two-thirds of our poetasters; and he is yet so modest as never to have published a volume of poems. As an editor—as a political writer—as a writer in general—we think that he has scarcely a superior in America. There is no man among us to whose sleeve we would rather pin—not our *faith* (of that we say nothing)—but our *judgment*.

His MS. is clear, bold, and forcible—somewhat modified, no doubt, by the circumstances of his editorial position—but still sufficiently indicative of his fine intellect.

RW Emerson

MR. RALPH WALDO EMERSON belongs to a class of gentlemen with whom we have no patience whatever

—the mystics for mysticism's sake. Quintilian mentions a pedant who taught obscurity, and who once said to a pupil "this is excellent, for I do not understand it myself." How the good man would have chuckled over Mr. E.! His present rôle seems to be the out-Carlyling Carlyle. *Lycophron Tenebrosus* is a fool to him. The best answer to his twaddle is *cui bono?*—a very little Latin phrase very generally mistranslated and misunderstood—*cui bono?*—to whom is it a benefit? If not to Mr. Emerson individually, then surely to no man living.

His love of the obscure does not prevent him, nevertheless, from the composition of occasional poems in which beauty is apparent *by flashes*. Several of his effusions appeared in the "Western Messenger"—more in the "Dial," of which he is the soul—or the sun—or the shadow. We remember the "Sphynx," the "Problem," the "Snow Storm," and some fine old-fashioned verses entitled "Oh fair and stately maid whose eye."

His MS. is bad, sprawling, illegible, and irregular—although sufficiently bold. This latter trait may be, and no doubt is, only a portion of his general affectation.

THE JOURNAL OF JULIUS RODMAN
BEING AN ACCOUNT OF THE FIRST PASSAGE
ACROSS THE ROCKY MOUNTAINS OF
NORTH AMERICA EVER ACHIEVED
BY CIVILIZED MAN

CHAPTER I

INTRODUCTORY

WHAT we must consider an unusual piece of good fortune has enabled us to present our readers, under this head, with a narrative of very remarkable character, and certainly of very deep interest. The Journal which follows not only embodies a relation of the *first* successful attempt to cross the gigantic barriers of that immense chain of mountains which stretches from the Polar Sea in the north to the Isthmus of Darien in the south, forming a craggy and snow-capped rampart throughout its whole course, but, what is of still greater importance, gives the particulars of a tour, beyond these mountains, through an immense extent of territory, which, at this day, is looked upon as totally untravelled and unknown, and which, in every map of the country to which we can obtain access, is marked as "an unexplored region." It is, moreover, the only unexplored region within the limits of the continent of North America. Such being the case, our friends will know how to pardon us for the slight amount of unction with which we have urged this Journal upon the public attention. For our own parts, we have found, in its perusal, a

degree and a species of interest such as no similar narrative ever inspired. Nor do we think that our relation to these papers, as the channel through which they will be first made known, has had more than a moderate influence in begetting this interest. We feel assured that all our readers will unite with us in thinking the adventures here recorded unusually entertaining and important. The peculiar character of the gentleman who was the leader and soul of the expedition, as well as its historian, has imbued what he has written with a vast deal of romantic fervor, very different from the lukewarm and statistical air which prevades most records of the kind. Mr. James E. Rodman, from whom we obtained the MS., is well known to many of the readers of this magazine; and partakes, in some degree, of that temperament which embittered the earlier portion of the life of his grand-father, Mr. Julius Rodman, the writer of the narrative. We allude to an hereditary hypochondria. It was the instigation of this disease which, more than anything else, led him to attempt the extraordinary journey here detailed. The hunting and trapping designs, of which he speaks himself, in the beginning of his Journal, were, as far as we can perceive, but excuses made to his own reason for the audacity and novelty of his attempt. There can be no doubt, we think (and our readers will think with us), that he was urged solely by a desire to seek, in the bosom of the wilderness, that peace which his peculiar disposition would not suffer him to enjoy among men. He fled to the desert as to a friend. In no other view of the case can we reconcile many points of his record with our ordinary notions of human action.

As we have thought proper to omit two pages of the MS., in which Mr. Rodman gives some account

of his life previous to his departure up the Missouri, it may be as well to state here that he was a native of England where his relatives were of excellent standing, where he had received a good education, and from which country he emigrated to this, in 1784 (being then about eighteen years of age), with his father and two maiden sisters. The family first settled in New York; but afterwards made their way to Kentucky, and established themselves, almost in hermit fashion, on the banks of the Mississippi near where Mills' Point now makes into the river. Here old Mr. Rodman died, in the fall of 1790; and, in the ensuing winter, both his daughters perished of the small-pox, within a few weeks of each other. Shortly afterwards (in the spring of 1791), Mr. Julius Rodman, the son, set out upon the expedition which forms the subject of the following pages. Returning from this in 1794, as hereinafter stated, he took up his abode near Abingdon, in Virginia, where he married, and had three children, and where most of his descendants now live.

We are informed by Mr. James Rodman that his grandfather had merely kept an outline diary of his tour, during the many difficulties of its progress; and that the MSS. with which we have been furnished were not written out in detail, from that diary, until many years afterwards, when the tourist was induced to undertake the task, at the instigation of M. André Michau, the botanist, and author of the *Flora Boreali-Americana*, and of the *Histoire des Chênes d'Amérique*. M. Michau, it will be remembered, had made an offer of his services to Mr. Jefferson, when that statesman first contemplated sending an expedition across the Rocky Mountains. He was engaged to prosecute the journey, and had even proceeded on his way as far as Kentucky, when he was overtaken by an

order from the French Minister, then at Philadelphia, requiring him to relinquish the design, and to pursue elsewhere the botanical inquiries on which he was employed by his government. The contemplated undertaking then fell into the hands of Messieurs Lewis and Clarke, by whom it was successfully accomplished.

The MS. when completed, however, never reached M. Michau, for whose inspection it had been drawn up; and was always supposed to have been lost on the road by the young man to whom it was entrusted for delivery at M. Michau's temporary residence, near Monticello. Scarcely any attempt was made to recover the papers; Mr. Rodman's peculiar disposition leading him to take but little interest in the search. Indeed, strange as it may appear, we doubt, from what we are told of him, whether he would have ever taken any steps to make public the results of his most extraordinary tour; we think that his only object in retouching his original Diary was to oblige M. Michau. Even Mr. Jefferson's exploring project, a project which, at the time it was broached, excited almost universal comment, and was considered a perfect novelty, drew from the hero of our narrative only a few general observations, addressed to the members of his family. He never made his own journey a subject of conversation; seeming, rather, to avoid the topic. He died before the return of Lewis and Clarke; and the Diary, which had been given into the hands of the messenger for delivery to M. Michau, was found, about three months ago, in a secret drawer of a bureau which had belonged to Mr. Julius Rodman. We do not learn by whom it was placed there; Mr. Rodman's relatives all exonerate *him* from the suspicion of having secreted it; but, without intending any disrespect to the memory of that gentleman, or to

Mr. James Rodman (to whom we feel under especial obligation), we cannot help thinking that the supposition of the narrator's having, by some means, reprocured the package from the messenger, and concealed it where it was discovered, is very reasonable, and not at all out of keeping with the character of that morbid sensibility which distinguished the individual.

We did not wish, by any means, to alter the manner of Mr. Rodman's narration, and have, therefore, taken very few liberties with the MS., and these few only in the way of abridgment. The style, indeed, could scarcely be improved; it is simple and very effective; giving evidence of the deep delight with which the traveller revelled in the majestic novelties through which he passed, day after day. There is a species of affectionateness which pervades his account, even of the severest hardships and dangers, which lets us at once into the man's whole idiosyncrasy. He was possessed with a burning love of nature; and worshipped her, perhaps, more in her dreary and savage aspects, than in her manifestations of placidity and joy. He stalked through that immense and often terrible wilderness with an evident rapture at his heart which we envy him as we read. He was, indeed, the man to journey amid all that solemn desolation which he, plainly, so loved to depict. His was the proper spirit to perceive; his the true ability to feel. We look, therefore, upon his MS. as a rich treasure, in its way absolutely unsurpassed, indeed, never equalled.

That the events of this narrative have hitherto lain *perdus*; that even the fact of the Rocky Mountains having been crossed by Mr. Rodman prior to the expedition of Lewis and Clarke has never been made public, or at all alluded to in the works of any

writer on American geography (for it certainly never has been thus alluded to, as far as we can ascertain), must be regarded as very remarkable—indeed, as exceedingly strange. The only reference to the journey at all, of which we can hear in any direction, is said to be contained in an unpublished letter of M. Michau's in the possession of Mr. W. Wyatt, of Charlottesville, Virginia. It is there spoken of in a casual way, and collaterally, as "a gigantic idea wonderfully carried out." If there has been any further allusion to the journey, we knew nothing of it.

Before entering upon Mr. Rodman's own relation, it will not be improper to glance at what has been done by others, in the way of discovery, upon the northwestern portion of our continent. If the reader will turn to a map of North America, he will be better enabled to follow us in our observations.

It will be seen that the continent extends from the Arctic Ocean, or from about the 70th parallel of north latitude, to the 9th; and from the 56th meridian west of Greenwich to the 168th. The whole of this immense extent of territory has been visited by civilized man, in a greater or less degree; and indeed a very large portion of it has been permanently settled. But there is an exceedingly wide tract which is still marked upon all our maps as "unexplored," and which, until this day, has always been so considered. This tract lies within the 60th parallel on the south, the Arctic Ocean on the north, the Rocky Mountains on the east, and the possessions of Russia on the west. To Mr. Rodman, however, belongs the honor of having traversed this singularly wild region in many directions; and the most interesting particulars of the narrative now published have reference to his adventures and discoveries therein.

Perhaps the earliest travels of any extent made in

North America by white people were those of Hennepin and his friends, in 1698; but as his researches were mostly in the south, we do not feel called upon to speak of them more fully.

Mr. Irving, in his *Astoria*, mentions the attempt of Captain Jonathan Carver as being the first ever made to cross the continent from the Atlantic to the Pacific Ocean; but in this he appears to be mistaken; for we find, in one of the journals of Sir Alexander Mackenzie, that two different enterprises were set on foot, with that especial object in view, by the Hudson Bay Fur Company, the one in 1758, the other as early as 1749; both of which are supposed to have entirely failed, as no accounts of the actual expeditions are extant. It was in 1763, shortly after the acquisition of the Canadas by Great Britain, that Captain Carver undertook the journey. His intention was to cross the country between the forty-third and forty-sixth degrees of north latitude, to the shores of the Pacific. His object was to ascertain the breadth of the continent at its broadest part, and to determine upon some place, on the western coast, where the Government might establish a post to facilitate the discovery of a northwest passage, or a communication between Hudson's Bay and the Pacific Ocean. He had supposed that the Columbia, then termed the Oregon, disembogued itself somewhere about the straits of Annian; and it was here that he expected the post to be formed. He thought, also, that a settlement in this neighborhood would disclose new sources of trade, and open a more direct communication with China and the British possessions in the East Indies than the old route afforded, by the Cape of Good Hope. He was baffled, however, in his attempt to cross the mountains.

In point of time, the next important expedition, in the northern portion of America, was that of Samuel Hearne, who, with the object of discovering copper mines, pushed northwestwardly during the years 1769, '70, '71, and '72, from the Prince of Wales' Fort, in Hudson's Bay, as far as the shores of the Arctic Ocean.

We have, after this, to record a second attempt of Captain Carver's, which was set on foot in 1774, and in which he was joined by Richard Whitworth, a member of Parliament and a man of wealth. We only notice this enterprise on account of the extensive scale on which it was projected; for in fact it was never carried into execution. The gentlemen were to take with them fifty or sixty men, artificers and mariners, and, with these, make their way up one of the branches of the Missouri, explore the mountains for the source of the Oregon, and sail down that river to its supposed mouth, near the straits of Annian. Here a fort was to be built, as well as vessels for the purpose of further discovery. The undertaking was stopped by the breaking out of the American Revolution.

As early as 1775 the fur trade had been carried by the Canadian missionaries, north and west to the banks of the Saskatchewan River, in 53 north latitude, 102 west longitude; and, in the beginning of 1776, Mr. Joseph Frobisher proceeded in this direction as far as 55 N. and 103 W.

In 1778, Mr. Peter Bond, with four canoes, pushed on to the Elk River, about thirty miles south of its junction with the Lake of the Hills.

We have now to mention another attempt, which was baffled at its very outset, to cross the broadest portion of the continent from ocean to ocean. This attempt is scarcely known by the public to have been

made at all, and is mentioned by Mr. Jefferson alone, and by him only in a cursory way. Mr. Jefferson relates that Ledyard called upon him in Paris, panting for some new enterprise, after his successful voyage with Captain Cook; and that he (Mr. Jefferson) proposed to him that he should go by land to Kam-schatka, cross in some of the Russian vessels to Nootka Sound, fall down into the latitude of the Missouri, and then, striking through the country, pass down that river to the United States. Ledyard agreed to the proposal provided the permission of the Russian Government could be obtained. Mr. Jefferson succeeded in obtaining this; and the traveller, setting out from Paris, arrived at St. Petersburg after the Empress had left that place to pass the winter at Moscow. His finances not permitting him to make unnecessary stay at St. Petersburg, he continued on his route with a passport from one of the ministers, and, at two hundred miles from Kamschatka, was arrested by an officer of the Empress, who had changed her mind, and now forbade his proceeding. He was put into a close carriage, and driven day and night, without stopping, till he reached Poland, where he was set down and dismissed. Mr. Jefferson, in speaking of Ledyard's undertaking, erroneously calls it "the *first* attempt to explore the western part of our northern continent."

The next enterprise of moment was the remarkable one of Sir Alexander Mackenzie, which was prosecuted in 1789. He started from Montreal, pushed through the Utawas River, Lake Nipissing, Lake Huron, around the northern shore of Lake Superior, through what is called the Grand Portage, thence along Rain River, the Lake of the Woods, Bonnet Lake, the upper part of Dog-Head Lake, the south coast of Lake Winnipeg, through Cedar Lake and past the mouth

of the Saskatchewan, to Sturgeon Lake; thence again, by portage, to the Missinipi and through Black Bear, Primo's and Buffalo Lakes, to a range of high mountains running N. E. and S. W.; then taking Elk River to the Lake of the Hills, then passing through Slave River to Slave Lake, around the northern shore of this lake to Mackenzie's River, and down this, lastly, to the Polar Sea: an immense journey, during which he encountered dangers innumerable and hardships of the severest kind. In the whole of his course down Mackenzie's River to its embouchure, he passed along the bottom of the eastern declivity of the Rocky Mountains, but never crossed these barriers. In the spring of 1793, however, starting from Montreal and pursuing the route of his first journey as far as the mouth of the Unjigah or Peace River, he then turned off to the westward, up this stream, pushed through the mountains in latitude 56, then proceeded to the south until he struck a river which he called the Salmon (now Frazer's) and following this, finally reached the pacific in about the 40th parallel of N. L.

The memorable expedition of Captains Lewis and Clarke was in progress during the years 1804, '5, and '6. In 1803, the act of establishing trading houses with the Indian tribes being about to expire, some modifications of it (with an extension of its views to the Indians on the Missouri) were recommended to Congress by a confidential message from Mr. Jefferson, of January 18th. In order to prepare the way, it was proposed to send a party to trace the Missouri to its source, cross the Rocky Mountains, and follow the best water communication which offered itself thence to the Pacific Ocean. This design was fully carried out; Captain Lewis exploring (but not first "discovering" as Mr. Irving relates) the upper waters of the

Columbia River and following the course of that stream to its embouchure. The head waters of the Columbia were visited by Mackenzie as early as 1793.

Coincident with the exploring tour of Lewis and Clarke up the Missouri, was that of Major Zebulon M. Pike up the Mississippi, which he succeeded in tracing to its source in Itasca Lake. Upon his return from this voyage he penetrated, by the orders of Government, from the Mississippi westwardly, during the years 1805, '6, and '7, to the head waters of the Arkansas (beyond the Rocky Mountains in latitude 40 N.), passing along the Osage and Kansas rivers, and to the source of the Platte.

In 1810, Mr. David Thompson, a partner of the Northwest Fur Company, set out from Montreal, with a strong party, to cross the continent to the Pacific. The first part of the route was that of Mackenzie in 1793. The object was to anticipate a design of Mr. John Jacob Astor's; to wit, the establishment of a trading post at the mouth of the Columbia. Most of his people deserted him on the eastern side of the mountains; but he finally succeeded in crossing the chain, with only eight followers, when he struck the northern branch of the Columbia, and descended that river from a point much nearer its source than any white man had done before.

In 1811, Mr. Astor's own remarkable enterprise was carried into effect, at least so far as the journey across the country is concerned. As Mr. Irving has already made all readers well acquainted with the particulars of this journey, we need only mention it in brief. The design we have just spoken of. The track of the party (under command of Mr. Wilson Price Hunt) was from Montreal, up the Utawas, through Lake Nipissing, and a succession of small lakes and rivers,

to Michilimackinac, or Mackinaw, thence by Green Bay, Fox and Wisconsin rivers, to the Prairie du Chien; thence down the Mississippi to St. Louis; thence up the Missouri, to the village of the Arickara Indians, between the 46th and 47th parallels of N. latitude, and fourteen hundred and thirty miles above the mouth of the river; thence, bending to the southwest across the desert, over the mountains about where the head waters of the Platte and Yellowstone take rise, and along the south branch of the Columbia to the sea. Two small return parties from this expedition made most perilous and eventful passages across the country.

The travels of Major Stephen H. Long are the next important ones in point of time. This gentleman, in 1823, proceeded to the source of St. Peter's River, to Lake Winnipeg, to the Lake of the woods, etc., etc. Of the more recent journeys of Captain Bonneville and others it is scarcely necessary to speak, as they still dwell in the public memory. Captain Bonneville's adventures have been well related by Mr. Irving. In 1832, he passed from Fort Osage across the Rocky Mountains, and spent nearly three years in the regions beyond. Within the limits of the United States there is very little ground which has not, of late years, been traversed by the man of science, or the adventurer. But in those wide and desolate regions which lie north of our territory, and to the westward of Mackenzie's River, the foot of no civilized man, with the exception of Mr. Rodman and his very small party, has ever been known to tread. In regard to the question of the *first* passage across the Rocky Mountains, it will be seen, from what we have already said, that the credit of the enterprise should never have been given to Lewis and Clarke, since Mackenzie succeeded in it, in the year 1793; and that

in point of fact, Mr. Rodman was the first who overcame those gigantic barriers, crossing them as he did in 1792. Thus it is not without good reason that we claim public attention for the extraordinary narrative which ensues.

CHAPTER II

AFTER the death of my father, and both sisters, I took no further interest in our plantation at the Point, and sold it, at a complete sacrifice, to M. Junôt. I had often thought of trapping up the Missouri, and resolved now to go on an expedition up that river, and try to procure peltries, which I was sure of being able to sell at Petite Côte to the private agents of the Northwest Fur Company. I believed that much more property might be acquired in this way, with a little enterprise and courage, than I could make by any other means. I had always been fond, too, of hunting and trapping, although I had never made a business of either, and I had a great desire to explore some portion of our western country about which Pierre Junôt had often spoken to me. He was the eldest son of the neighbor who bought me out, and was a man of strange manners and somewhat eccentric turn of mind, but still one of the best-hearted fellows in the world, and certainly as courageous a man as ever drew breath, although of no great bodily strength. He was of Canadian descent, and having gone, once or twice, on short excursions for the Fur Company, in which he had acted as *voyageur*, was fond of calling himself one, and of talking about his trips. My father had been very fond of Pierre, and I thought a good deal of him myself; he was a great favorite, too, with my younger sister, Jane, and I believe they would have been married had it been God's will to have spared her.

When Pierre discovered that I had not entirely

made up my mind what course to pursue after my father's death, he urged me to fit out a small expedition for the river, in which he would accompany me; and he had no difficulty in bringing me over to his wishes. We agreed to push up the Missouri as long as we found it possible, hunting and trapping as we went, and not to return until we had secured as many peltries as would be a fortune for us both. His father made no objection and gave him about three hundred dollars; when we proceeded to Petite Côte for the purpose of getting our equipments, and raising as many men as we could for the voyage.

Petite Côte* is a small place on the north bank of the Missouri, about twenty miles from its junction with the Mississippi. It lies at the foot of a range of low hills, and upon a sort of ledge, high enough above the river, to be out of the reach of the June freshets. There are not more than five or six houses, and these of wood, in the upper part of the place; but, nearer to the east, there is a chapel and twelve or fifteen good dwellings, running parallel with the river. There are about a hundred inhabitants, mostly Creoles of Canadian descent. They are extremely indolent, and make no attempt at cultivating the country around them, which is a rich soil, except now and then when a little is done in the way of gardening. They live principally by hunting, and trading with the Indians for peltries, which they sell again to the Northwest Company's agents. We expected to meet with no difficulty in getting recruits for our journey, or equipments, but were disappointed in both particulars; for the place was too poor in every respect to furnish all that we wanted, so as to render our voyage safe and efficient.

* Now St. Charles.

We designed to pass through the heart of a country infested with Indian tribes, of whom we knew nothing except by vague report, and whom we had every reason to believe ferocious and treacherous. It was therefore particularly necessary that we should go well provided with arms and ammunition, as well as in some force as regards numbers; and if our voyage was to be a source of profit, we must take with us canoes of sufficient capacity to bring home what peltries we might collect. It was the middle of March when we first reached Petite Côte, and we did not succeed in getting ready until the last of May. We had to send twice down the river to the Point for men and supplies, and neither could be obtained except at great cost. We should have failed at last in getting many things absolutely requisite, if it had not so happened that Pierre met with a party on its return from a trip up the Mississippi, and engaged six of its best men, besides a canoe, or piroque, purchasing, at the same time, most of the surplus stores and ammunition.

This seasonable aid enabled us to get fairly ready for the voyage before the first of June. On the third of this month (1791) we bade adieu to our friends at Petite Côte, and started on our expedition. Our party consisted in all of fifteen persons. Of these, five were Canadians from Petite Côte, and had all been on short excursions up the river. They were good boatmen, and excellent companions, as far as singing French songs went, and drinking, at which they were preeminent; although, in truth, it was a rare thing to see any of them so far the worse for liquor as to be incapable of attending to duty. They were always in a good humor, and always ready to work; but as hunters I did not think them worth much, and as fighting men I soon discovered they

were not to be depended upon. There were two of these five Canadians who engaged to act as interpreters for the first five or six hundred miles up the river (should we proceed so far), and then we hoped to procure an Indian occasionally to interpret, should it be necessary; but we had resolved to avoid, as far as possible, any meetings with the Indians, and rather to trap ourselves than run the great risk of trading, with so small a party as we numbered. It was our policy to proceed with the greatest caution, and expose ourselves to notice only when we could not avoid it.

The six men whom Pierre had engaged from aboard the return Mississippi boat were as different a set from the Canadians as could well be imagined. Five of them were brothers, by the name of Greely (John, Robert, Meredith, Frank, and Poindexter), and bolder or finer looking persons it would have been difficult to find. John Greely was the oldest and stoutest of the five, and had the reputation of being the strongest man, as well as best shot, in Kentucky, from which state they all came. He was full six feet in height, and of most extraordinary breadth across the shoulders, with large strongly-knit limbs. Like most men of great physical strength, he was exceedingly good-tempered, and on this account was greatly beloved by us all. The other four brothers were all strong, well-built men, too, although not to be compared with John. Poindexter was as tall, but very gaunt, and of a singularly fierce appearance; but, like his elder brother, he was of peaceable demeanor. All of them were experienced hunters and capital shots. They had gladly accepted Pierre's offer to go with us, and we made an arrangement with them which ensured them an equal share with Pierre and myself in the profits of the enterprise; that is to say,

we divided the proceeds into three parts, one of which was to be mine, one Pierre's, and one shared among the five brothers.

The sixth man whom we enlisted from the return boat was, also, a good recruit. His name was Alexander Wormley, a Virginian, and a very strange character. He had originally been a preacher of the gospel, and had afterwards fancied himself a prophet, going about the country with a long beard and hair, and in his bare feet, haranguing every one he met. This hallucination was now diverted into another channel, and he thought of nothing else than of finding gold mines in some of the fastnesses of the country. Upon this subject he was as entirely mad as any man could well be; but upon all others was remarkably sensible and even acute. He was a good boatman and a good hunter, and as brave a fellow as ever stepped, besides being of great bodily strength and swiftness of foot. I counted much upon this recruit, on account of his enthusiastic character, and in the end I was not deceived, as will appear.

Our other two recruits were a negro belonging to Pierre Junôt, named Toby, and a stranger whom we had picked up in the woods near Mill's Point, and who joined our expedition upon the instant as soon as we mentioned our design. His name was Andrew Thornton, also a Virginian, and I believe of excellent family, belonging to the Thorntons of the northern part of the State. He had been from Virginia about three years; during the whole of which time he had been rambling about the western country, with no other companion than a large dog of the Newfoundland species. He had collected no peltries, and did not seem to have any object in view, more than the gratification of a roving and adventurous propensity. He frequently amused us, when sitting

around our camp fires at night, with the relation of his adventures and hardships in the wilderness, recounting them with a straightforward earnestness which left us no room to doubt their truth; although, indeed, many of them had a marvellous air. Experience afterwards taught us that the dangers and difficulties of the solitary hunter can scarcely be exaggerated, and that the real task is to depict them to the hearer in sufficiently distinct colors. I took a great liking to Thornton, from the first hour in which I saw him.

I have only said a few words respecting Toby; but he was not the least important personage of our party. He had been in old M. Junôt's family for a great number of years, and had proved himself a faithful negro. He was rather too old to accompany such an expedition as ours; but Pierre was not willing to leave him. He was an able-bodied man, however, and still capable of enduring great fatigue. Pierre himself was probably the feeblest of our whole company, as regards bodily strength, but he possessed great sagacity, and a courage which nothing could daunt. His manners were sometimes extravagant and boisterous, which led him to get into frequent quarrels, and had once or twice seriously endangered the success of our expedition; but he was a true friend, and in that one point I considered him invaluable.

I have now given a brief account of all our party, as it was when we left Petite Côte.* To carry

* Mr. Rodman has not given any description of himself; and the account of his party is by no means complete without a portraiture of its leader. "He was about twenty-five years of age," says Mr. James Rodman in a memorandum now before us, "when he started up the river. He was a remarkably vigorous and active man, but short in stature, not being more than five feet three or four inches high; strongly built, with legs somewhat bowed. His physiognomy was of a Jewish cast, his lips thin, and his complexion saturnine."

ourselves and accoutrements, as well as to bring home what peltries might be obtained, we had two large boats. The smallest of these was a piroque made of birch bark, sewed together with the fibres of the roots of the spruce tree, the seams payed with pine resin, and the whole so light that six men could carry it with ease. It was twenty feet long, and could be rowed with from four to twelve oars; drawing about eighteen inches water when loaded to the gunwale, and, when empty, not more than ten. The other was a keel-boat which we had made at Petite Côte (the canoe having been purchased by Pierre from the Mississippi party). It was thirty feet long, and, when loaded to the gunwale, drew two feet water. It had a deck for twenty feet of its length forward, forming a cuddy-cabin, with a strong door, and of sufficient dimensions to contain our whole party with close crowding, as the boat was very broad. This part of it was bullet-proof, being wadded with oakum between two coatings of oak-plank; and in several positions we had small holes bored, through which we could have fired upon an enemy in case of attack, as well as observe their movements; these holes, at the same time, gave us air and light, when we closed the door; and we had secure plugs to fit them when necessary. The remaining ten feet of the length was open, and here we could use as many as six oars; but our main dependence was upon poles which we employed by walking along the deck. We had also a short mast, easily shipped and unshipped, which was stepped about seven feet from the bow, and upon which we set a large square sail when the wind was fair, taking in mast and all when it was ahead.

In a division made in the bow, under the deck, we deposited ten kegs of good powder, and as much

lead as we considered proportionate, one tenth ready moulded in rifle bullets. We had also stowed away here a small brass cannon and carriage, dismounted and taken to pieces, so as to lie in little compass, thinking that such a means of defence might possibly come into play at some period of our expedition. This cannon was one of three which had been brought down the Missouri by the Spaniards two years previously, and lost overboard from a piroque, some miles above Petite Côte. A sand-bar had so far altered the channel at the place where the canoe capsized that an Indian discovered one of the guns, and procured assistance to carry it down to the settlement, where he sold it for a gallon of whiskey. The people at Petite Côte then went up and procured the other two. They were very small guns, but of good metal and beautiful workmanship, being carved and ornamented with serpents like some of the French field-pieces. Fifty iron balls were found with the guns, and these we procured. I mention the way in which we obtained this cannon, because it performed an important part in some of our operations, as will be found hereafter. Besides it, we had fifteen spare rifles, boxed up, and deposited forward with the other heavy goods. We put the weight here, to sink our bows well in the water, which is the best method, on account of the snags and sawyers in the river.

In the way of other arms we were sufficiently provided; each man having a stout hatchet and knife, besides his ordinary rifle and ammunition. Each boat was provided with a camp kettle, three large axes, a towing-line, two oil-cloths to cover the goods when necessary, and two large sponges for bailing. The piroque had also a small mast and sail (which I omitted to mention), and carried a

quantity of gum, birch-bark, and watape, to make repairs with. She also had in charge all the Indian goods which we had thought necessary to bring with us, and which we purchased from the Mississippi boat. It was not our design to trade with the Indians; but these goods were offered us at a low rate, and we thought it better to take them, as they might prove of service. They consisted of silk and cotton handkerchiefs; thread, lines, and twine; hats, shoes, and hose; small cutlery and ironmongery; calicoes and printed cottons; Manchester goods; twist and carrot tobacco; milled blankets; and glass toys, beads, etc., etc. All these were done up in small packages, three of which were a man's load. The provisions were also put up so as to be easily handled; and a part was deposited in each boat. We had, altogether, two hundredweight of pork, six hundredweight of biscuit, and six hundredweight of pemmican. This we had made at Petite Côte, by the Canadians, who told us that it is used by the Northwest Fur Company in all their long voyages, when it is feared that game may not prove abundant. It is manufactured in a singular manner. The lean parts of the flesh of the larger animals is cut into thin slices, and placed on a wooden grate over a slow fire, or exposed to the sun (as ours was), or sometimes to the frost. When it is sufficiently dried in this way, it is pounded between two heavy stones, and will then keep for years. If, however, much of it is kept together, it ferments upon the breaking up of the frost in the spring, and, if not well exposed to the air, soon decays. The inside fat, with that of the rump, is melted down and mixed, in a boiling state, with the pounded meat, half and half; it is then squeezed into bags, and is ready to eat without any further cooking, being

very palatable without salt or vegetables. The best pemmican is made with the addition of marrow and dried berries, and is a capital article of food.* Our whiskey was in carboys, of five gallons each, and we had twenty of these, a hundred gallons in all.

When everything was well on board, with our whole company, including Thornton's dog, we found that there was but little room to spare, except in the big cabin, which we wished to preserve free of goods, as a sleeping place in bad weather; we had nothing in here except arms and ammunition, with some beaver-traps and a carpet of bear-skins. Our crowded state suggested an expedient which ought to have been adopted at all events: that of detaching four hunters from the party, to course along the river banks, and keep us in game, as well as to act in capacity of scouts, to warn us of the approach of Indians. With this object we procured two good horses, giving one of them in charge of Robert and Meredith Greely, who were to keep upon the south bank; and the other in charge of Frank and Poindexter Greely, who were to course along the north side. By means of the horses they could bring in what game was shot.

This arrangement relieved our boats very con-

* The pemmican here described by Mr. Rodman is altogether new to us, and is very different from that with which our readers have no doubt been familiarized in the journals of Parry, Ross, Back, and other Northern voyagers. This, if we remember, was prepared by long continued boiling of the lean meat (carefully excluding fat) until the soup was reduced to a very small proportion of its original bulk, and assumed a pulpy consistency. To this residue, many spices and much salt were added, and great nutriment was supposed to be contained in the little bulk. The positive experience of an American surgeon, however, who had an opportunity of witnessing, and experimenting upon, the digestive process through an open wound in the stomach of a patient, has demonstrated that *bulk* is, in itself, an essential in this process, and that consequently the condensation of the nutritive property of food involves, in a great measure, a paradox.

siderably, lessening our number to eleven. In the small boat were two of the men from Petite Côte, with Toby and Pierre Junôt. In the large one were the Prophet (as we called him), or Alexander Wormley, John Greely, Andrew Thornton, three of the Petite Côte men, and myself, with Thornton's dog.

Our mode of proceeding was sometimes with oars, but not generally; we most frequently pulled ourselves along the limbs of trees on shore; or, where the ground permitted it, we used a tow-line, which is the easiest way, some of us being on shore to haul, while some remained on board, to set the boat off shore with poles. Very often we poled together. In this method (which is a good one when the bottom is not too muddy, or full of quicksands, and when the depth of water is not too great), the Canadians are very expert, as well as at rowing. They use long, stiff, and light poles, pointed with iron; with these they proceed to the bow of the boat, an equal number of men at each side; the face is then turned to the stern, and the pole inserted in the river, reaching the bottom; a firm hold being thus taken, the boatmen apply the heads of the poles to the shoulder, which is protected by a cushion, and, pushing in this manner, while they walk along the gunwale, the boat is urged forward with great force. There is no necessity for any steersman, while using the pole; for the poles direct the vessel with wonderful accuracy.

In these various modes of getting along, now and then varied with the necessity of wading, and dragging our vessels by hand, in rapid currents, or through shallow water, we commenced our eventful voyage up the Missouri River. The skins, which were considered as the leading objects of

the expedition, were to be obtained, principally, by hunting and trapping, as privately as possible, and without direct trade with the Indians, whom we had long learned to know as, in the main, a treacherous race, not to be dealt with safely in so small a party as ours. The furs usually collected by previous adventurers upon our contemplated route included beaver, otter, marten, lynx, mink, musquash, bear, fox, kitt-fox, wolverine, raccoon, fisher, wolf, buffalo, deer, and elk; but we proposed to confine ourselves to the more costly kinds.

The morning on which we set out from Petite Côte was one of the most inspiring and delicious; and nothing could exceed the hilarity of our whole party. The summer had hardly yet commenced, and the wind, which blew a strong breeze against us at first starting, had all the voluptuous softness of spring. The sun shone clearly, but with no great heat. The ice had disappeared from the river, and the current, which was pretty full, concealed all those marshy and ragged alluvia which disfigure the borders of the Missouri at low water. It had now the most majestic appearance, washing up among the willows and cottonwood on one side, and rushing, with a bold volume, by the sharp cliffs on the other. As I looked up the stream (which here stretched away to the westward, until the waters apparently met the sky in the great distance) and reflected on the immensity of territory through which those waters had probably passed, a territory as yet altogether unknown to white people, and perhaps abounding in the magnificent works of God, I felt an excitement of soul such as I had never before experienced, and secretly resolved that it should be no slight obstacle which should prevent my pushing up this noble river farther

than any previous adventurer had done. At that moment I seemed possessed of an energy more than human, and my animal spirits rose to so high a degree that I could with difficulty content myself in the narrow limits of the boat. I longed to be with the Greelys on the bank, that I might give full vent to the feelings which inspired me, by leaping and running on the prairie. In these feelings Thornton participated strongly, evincing a deep interest in our expedition, and an admiration of the beautiful scenery around us, which rendered him from that moment a particular favorite with myself. I never, at any period of my life, felt so keenly as I then did, the want of some friend to whom I could converse freely and without danger of being misunderstood. The sudden loss of all my relatives by death had saddened, but not depressed, my spirits, which appeared to seek relief in a contemplation of the wild scenes of nature; and these scenes, and the reflections which they encouraged, could not, I found, be thoroughly enjoyed, without the society of some one person of reciprocal sentiments. Thornton was precisely the kind of individual to whom I could unburden my full heart, and unburden it of all its extravagant emotion, without fear of incurring a shadow of ridicule, and even in the certainty of finding a listener as impassioned as myself. I never, before or since, met with any one who so fully entered into my own notions respecting natural scenery; and this circumstance alone was sufficient to bind him to me in a firm friendship. We were as intimate, during our whole expedition, as brothers could possibly be, and I took no steps without consulting him. Pierre and myself were also friends, but there was not the tie of reciprocal thought between us, that strongest of all mortal

bonds. His nature, although sensitive, was too volatile to comprehend all the devotional fervor of my own.

The incidents of the first day of our voyage had nothing remarkable in them; except that we had some difficulty in forcing our way, towards night-fall, by the mouth of a large cave on the south side of the river. This cave had a very dismal appearance as we passed it, being situated at the foot of a lofty bluff, full two hundred feet high, and jutting somewhat over the stream. We could not distinctly perceive the depth of the cavern, but it was about sixteen or seventeen feet high, and at least fifty in width.* The current ran past it with great velocity, and, as from the nature of the cliff

* The cave here mentioned is that called the "Tavern" by the traders and boatmen. Some grotesque images are painted on the cliffs, and commanded, at one period, great respect from the Indians. In speaking of this cavern, Captain Lewis says that it is a hundred and twenty feet wide, twenty feet high, and forty deep, and that the bluffs overhanging it are nearly three hundred feet high. We wish to call attention to the circumstance that, in every point, Mr. Rodman's account falls short of Captain Lewis's. With all his evident enthusiasm, our traveller is never prone to the exaggeration of facts. In a great variety of instances like the present, it will be found that his statements respecting quantity (in the full sense of the term) always fall within the truth, as this truth is since ascertained. We regard this as a remarkable trait in his mind; and it is assuredly one which would entitle his observations to the highest credit, when they concern regions about which we know nothing beyond these observations. In all points which relate to effects, on the contrary, Mr. Rodman's peculiar temperament leads him into excess. For example, he speaks of the cavern now in question as of a "dismal appearance," and the coloring of his narrative respecting it is derived principally from the sombre hue of his own spirit, at the time of passing the rock. It will be as well to bear these distinctions in mind, as we read his Journal. His facts are never heightened; his impressions from these facts must have, to ordinary perceptions, a tone of exaggeration. Yet there is no falsity in this exaggeration, except in view of a general sentiment upon the thing seen and described. As regards his own mind, the apparent gaudiness of color is the absolute and only true tint.

we could not tow, it required the utmost exertion to make our way by it; which we at length effected by getting all of us, with the exception of one man, into the large boat. This one remained in the piroque, and anchored it below the cave. By uniting our force, then, in rowing, we brought the large boat up beyond the difficult pass, paying out a line to the piroque as we proceeded, and by this line hauling it up after us, when we had fairly ascended. We passed, during the day, Bonhomme, and Osage Femme rivers, with two small creeks, and several islands of little extent. We made about twenty-five miles, notwithstanding the head wind, and encamped at night on the north bank, and at the foot of a rapid called Diable.

June the fourth. Early this morning, Frank and Poindexter Greely came into our camp with a fat buck, upon which we all breakfasted in high glee, and afterwards pushed on with spirit. At the Diable rapid, the current sets with much force against some rocks which jut out from the south, and render the navigation difficult. A short distance above this we met with several quicksand bars, which put us to trouble; the banks of the river here fall in continually, and, in the process of time, must greatly alter the bed. At eight o'clock we had a fine fresh wind from the eastward, and, with its assistance, made rapid progress, so that by night we had gone perhaps thirty miles, or more. We passed, on the north, the river Du Bois, a creek called Charité,* and several small islands. The river was rising fast as we came to, at night, under a group of cottonwood trees, there being no ground near at hand upon which we were disposed to encamp. It was beautiful weather, and I felt too

* La Charette? Du Bois is no doubt Wood River.

much excited to sleep; so, asking Thornton to accompany me, I took a stroll into the country, and did not return until nearly daylight. The rest of our crew occupied the cabin, for the first time, and found it quite roomy enough for five or six more persons. They had been disturbed, in the night, by a strange noise overhead, on deck, the origin of which they had not been able to ascertain; as, when some of the party rushed out to see, the disturber had disappeared. From the account given of the noise, I concluded that it must have proceeded from an Indian dog, who had scented our fresh provisions (the buck of yesterday) and was endeavoring to make off with a portion. In this view I felt perfectly satisfied; but the occurrence suggested the great risk we ran in not posting a regular watch at night, and it was agreed to do so for the future.

[Having thus given, in Mr. Rodman's own words, the incidents of the first two days of the voyage, we forbear to follow him minutely in his passage up the Missouri to the mouth of the Platte, at which he arrived on the tenth of August. The character of the river throughout this extent is so well known, and has been so frequently described, that any further account of it is unnecessary; and the Journal takes note of little else, at this portion of the tour, than the natural features of the country, together with the ordinary boating and hunting occurrences. The party made three several halts for the purpose of trapping, but met with no great success; and finally concluded to push farther into the heart of the country, before making any regular attempts at collecting peltries. Only two events of moment are recorded, for the two months which we omit. One of these was the death of a Canadian, Jacques

Lauzanne, by the bite of a rattlesnake; the other was the encountering a Spanish commission sent to intercept and turn the party back, by order of the commandant of the province. The officer in charge of the detachment, however, was so much interested in the expedition, and took so great a fancy to Mr. Rodman, that our travellers were permitted to proceed. Many small bodies of Osage and Kansas Indians hovered occasionally about the boats, but evinced nothing of hostility. We leave the voyagers for the present, therefore, at the mouth of the river Platte, on the tenth of August, 1791, their number having been reduced to fourteen.]

CHAPTER III

HAVING reached the mouth of the river Platte, our voyagers encamped for three days, during which they were busily occupied in drying and airing their goods and provisions, making new oars and poles, and repairing the birch canoe, which had sustained material injury. The hunters brought in an abundance of game, with which the boats were loaded to repletion. Deer was had for the asking, and turkeys and fat grouse were met with in great plenty. The party, moreover, regaled on several species of fish, and, at a short distance from the river banks, found an exquisite kind of wild grape. No Indians had been seen for better than a fortnight, as this was the hunting season, and they were doubtless engaged in the prairies, taking buffalo. After perfectly recruiting, the voyagers broke up their encampment, and pushed on up the Missouri. We resume the words of the Journal.]

August 14. We started with a delightful breeze from the S. E., and kept along by the southern shore, taking advantage of the eddy, and going at a great rate, notwithstanding the current, which, in the middle, was unusually full and strong. At noon, we stopped to examine some remarkable mounds on the southwestern shore, at a spot where the ground seems to have sunk considerably to an extend of three hundred acres or more. A large pond is in the vicinity, and appears to have drained the low tract. This is covered with mounds of various sizes and shapes, all formed of sand and

mud, the highest being nearest the river. I could not make up my mind whether these hillocks were of natural or artificial construction. I should have supposed them made by the Indians, but for the general appearance of the soil, which had apparently been subjected to the violent action of water.* We stayed at this spot the rest of the day, having made altogether twenty miles.

August 15. To-day we had a heavy, disagreeable head wind, and made only fifteen miles, with great labor; encamping at night beneath a bluff on the north shore, this being the first bluff on that side which we had seen since leaving the Nodaway River. In the night it came on to rain in torrents, and the Greelys brought in their horses, and ensconced themselves in the cabin. Robert swam the river with his horse from the south shore, and then took the canoe across for Meredith. He appeared to think nothing of either of these feats, although the night was one of the darkest and most boisterous I ever saw, and the river was much swollen. We all sat in the cabin very comfortably, for the weather was quite cool, and were kept awake for a long time by the anecdotes of Thornton, who told story after story of his adventures with the Indians on the Mississippi. His huge dog appeared to listen with profound attention to every word that was said. Whenever any particularly incredible circumstance was related, Thornton would gravely refer to him as a witness. "Nep," he would say, "don't you remember that time?" or "Nep can swear to the truth of that—can't you, Nep?" when the

* These mounds are now well understood to indicate the position of the ancient village of the Ottoes, who were once a very powerful tribe. Being reduced by continual hostilities, they sought protection of the Pawnees, and migrated to the south of the Platte about thirty miles from its mouth.

animal would roll up his eyes immediately, loll out his monstrous tongue, and wag his great head up and down, as much as to say: "Oh, it's every bit as true as the Bible." Although we all knew that this trick had been taught the dog, yet for our lives we could not forbear shouting with laughter, whenever Thornton would appeal to him.

August 16. Early this morning passed an island, and a creek about fifteen yards wide, and, at a farther distance of twelve miles, a large island in the middle of the river. We had now, generally, high prairie and timbered hills on the north, with low ground on the south, covered with cottonwood. The river was excessively crooked, but not so rapid as before we passed the Platte. Altogether there is less timber than formerly; what there is, is mostly elm, cottonwood, hickory, and walnut, with some oak. Had a strong wind nearly all day, and by means of the eddy and this, we made twenty-five miles before night. Our encampment was on the south, upon a large plain, covered with high grass, and bearing a great number of plum trees and currant bushes. In our rear was a steep woody ridge, ascending which we found another prairie extending back for about a mile, and stopped again by a similar woody ridge, followed by another vast prairie, going off into the distance as far as the eye can reach. From the cliffs just above us we had one of the most beautiful prospects in the world.*

August 17. We remained at the encampment all day, and occupied ourselves in various employments. Getting Thornton, with his dog, to accompany me, I strolled to some distance to the southward, and was enchanted with the voluptuous

* The Council Bluffs.

beauty of the country. The prairies exceed in beauty anything told in the tales of the *Arabian Nights*. On the edges of the creeks there was a wild mass of flowers which looked more like art than nature, so profusely and fantastically were their vivid colors blended together. Their rich odor was almost oppressive. Every now and then we came to a kind of green island of trees, placed amid an ocean of purple, blue, orange, and crimson blossoms, all waving to and fro in the wind. These islands consisted of the most majestic forest oaks, and, beneath them, the grass resembled a robe of the softest green velvet, while up their huge stems there clambered generally a profusion of grapevines, laden with delicious ripe fruit. The Missouri in the distance presented the most majestic appearance; and many of the real islands with which it was studded were entirely covered with plum bushes, or other shrubbery, except where crossed in various directions by narrow, mazy paths, like the alleys in an English flower-garden; and in these alleys we could always see either elks or antelopes, who had no doubt made them. We returned, at sunset, to the encampment, delighted with our excursion. The night was warm, and we were excessively annoyed by mosquitoes.

August 18. To-day passed through a narrow part of the river, not more than two hundred yards wide, with a rapid channel, much obstructed with logs and driftwood. Ran the large boat on a sawyer, and half filled her with water before we could extricate her from the difficulty. We were obliged to halt, in consequence, and overhaul our things. Some of the biscuit was injured, but none of the powder. Remained all day, having only made five miles.

August 19. We started early this morning and made great headway. The weather was cool and cloudy, and at noon we had a drenching shower. Passed a creek on the south, the mouth of which is nearly concealed by a large sand island of singular appearance. Went about fifteen miles beyond this. The highlands now recede from the river, and are probably from ten to twenty miles apart. On the north is a good deal of fine timber, but on the south very little. Near the river are beautiful prairies, and along the banks we procured four or five different species of grape, all of good flavor and quite ripe; one is a large purple grape of excellent quality. The hunters came into camp at night from both sides of the river, and brought us more game than we well knew what to do with,—grouse, turkeys, two deer, an antelope, and a quantity of yellow birds with black-striped wings; these latter proved delicious eating. We made about twenty miles during the day.

August 20. The river, this morning, was full of sand-bars and other obstructions; but we proceeded with spirit, and reached the mouth of a pretty large creek, before night, at a distance of twenty miles from our last encampment. The creek comes in from the north, and has a large island opposite its mouth. Here we made our camp, with the resolution of remaining four or five days to trap beaver, as we saw great signs of them in the neighborhood. This island was one of the most fairy-looking situations in the world, and filled my mind with the most delightful and novel emotions. The whole scenery rather resembled what I had dreamed of when a boy than an actual reality. The banks sloped down very gradually into the water, and were carpeted with a soft grass of a brilliant

green hue, which was visible under the surface of the stream for some distance from the shore; especially on the north side, where the clear creek fell into the river. All round the island, which was probably about twenty acres in extent, was a complete fringe of cottonwood, the trunks loaded with grape-vines in full fruit, and so closely interlocking with each other that we could scarcely get a glimpse of the river between the leaves. Within this circle the grass was somewhat higher, and of a coarser texture, with a pale yellow or white streak down the middle of each blade, and giving out a remarkably delicious perfume, resembling that of the vanilla bean, but much stronger, so that the whole atmosphere was loaded with it. The common English sweet grass is no doubt of the same genus, but greatly inferior in beauty and fragrance. Interspersed among it in every direction, were myriads of the most brilliant flowers, in full bloom, and most of them of fine odor—blue, pure white, bright yellow, purple, crimson, gaudy scarlet, and some with streaked leaves like tulips. Little knots of cherry trees and plum bushes grew in various directions about, and there were many narrow winding paths which circled the island, and which had been made by elks or antelopes. Nearly in the centre was a spring of sweet and clear water, which bubbled up from among a cluster of steep rocks, covered from head to foot with moss and flowering vines. The whole bore a wonderful resemblance to an artificial flower-garden, but was infinitely more beautiful, looking rather like some of those scenes of enchantment which we read of in old books. We were all in ecstasy with the spot, and prepared our camp in the highest glee, amid its wilderness of sweets.

[The party remained here a week, during which time, the neighboring country to the north was explored in many directions, and some peltries obtained, especially upon the creek mentioned. The weather was fine, and the enjoyment of the voyagers suffered no alloy, in their terrestrial Paradise. Mr. Rodman, however, omitted no necessary precautions, and sentries were regularly posted every night, when all hands assembled at camp, and made merry. Such feasting and drinking were never before known; the Canadians proving themselves the very best fellows in the world at a song or over a flagon. They did nothing but eat, and cook, and dance, and shout French carols at the top of their voices. During the day they were chiefly entrusted with the charge of the encampment, while the steadier members of the party were absent upon hunting or trapping expeditions. In one of these Mr. Rodman enjoyed an excellent opportunity of observing the habits of the beaver; and his account of this singular animal is highly interesting; the more so as it differs materially, in some points, from the ordinary descriptions.

He was attended, as usual, by Thornton and his dog, and had traced up a small creek to its source in the highlands about ten miles from the river. The party came at length to a place where a large swamp had been made by the beavers, in damming up the creek. A thick grove of willows occupied one extremity of the swamp, some of them overhanging the water at a spot where several of the animals were observed. Our adventurers crept stealthily round to these willows, and, making Neptune lie down at a little distance, succeeded in climbing, unobserved, into a large and thick tree,

where they could look immediately down upon all that was going on.

The beavers were repairing a portion of their dam, and every step of their progress was distinctly seen. One by one the architects were perceived to approach the edge of the swamp, each with a small branch in his mouth. With this he proceeded to the dam, and placed it carefully, and longitudinally, on the part which had given way. Having done this, he dived immediately, and in a few seconds reappeared above the surface with a quantity of stiff mud, which he first squeezed so as to drain it of its moisture in a great degree, and then applied with his feet and tail (using the latter as a trowel) to the branch which he had just laid upon the breach. He then made off among the trees, and was quickly succeeded by another of the community, who went through precisely the same operation.

In this way the damage sustained by the dam was in a fair way of being soon repaired. Messieurs Rodman and Thornton observed the progress of the work for more than two hours, and bear testimony to the exquisite skill of the artisans. But as soon as a beaver left the edge of the swamp in search of a branch, he was lost sight of among the willows, much to the chagrin of the observers, who were anxious to watch his further operations. By clambering a little higher up in the tree, however, they discovered everything. A small sycamore had been felled, apparently, and was now nearly denuded of all its fine branches, a few beavers still nibbling off some that remained, and proceeding with them to the dam. In the meantime a great number of the animals surrounded a much older and larger tree, which they were busily occupied in cutting down. There were as many as fifty or

sixty of the creatures around the trunk, of which number six or seven would work at once, leaving off one by one, as each became weary; a fresh one stepping into the vacated place. When our travelers first observed the sycamore, it had been already cut through to a great extent, but only on the side nearest the swamp, upon the edge of which it grew. The incision was nearly a foot wide, and as cleanly made as if done with an axe; and the ground at the bottom of the tree was covered with fine longitudinal slips, like straws, which had been nibbled out, and not eaten; as it appears that these animals only use the bark for food. When at work some sat upon the hind legs, in the posture so common with squirrels, and gnawed at the wood, their fore feet resting upon the edge of the cut, and their heads thrust far into the aperture. Two of them, however, were entirely within the incision; lying at length, and working with great eagerness for a short time, when they were relieved by their companions.

Although the position of our voyagers was anything but comfortable, so great was their curiosity to witness the felling of the sycamore, that they resolutely maintained their post until sunset, an interval of eight hours from the time of ascending. Their chief embarrassment was on Neptune's account, who could with difficulty be kept from plunging into the swamp after the plasterers who were repairing the dam. The noise he made had several times disturbed the nibblers at the tree, who would every now and then start, as if all actuated by one mind, and listen attentively for many minutes. As evening approached, however, the dog gave over his freaks, and lay quiet; while the beavers went on uninterruptedly with their labor.

Just as the sun began to set, a sudden commotion was observed among the wood-cutters, who all started from the tree, and flew round to the side which was untouched. In an instant afterwards it was seen to settle down gradually on the gnawed side, till the lips of the incision met; but still it did not fall, being sustained partially by the unsundered bark. This was now attacked with zeal by as many nibblers as could find room to work at it, and very quickly severed; when the huge tree, to which the proper inclination had already been so ingeniously given, fell with a tremendous crash, and spread a great portion of its topmost branches over the surface of the swamp. This matter accomplished, the whole community seemed to think a holiday was deserved, and, ceasing work at once, began to chase each other about in the water, diving, and slapping the surface with their tails.

The account here given of the method employed by the beaver in its wood-cutting operations is more circumstantial than any we have yet seen, and seems to be conclusive in regard to the question of design on the animal's part. The intention of making the tree fall towards the water appears here to be obvious. Captain Bonneville, it will be remembered, discredits the alleged sagacity of the animal in this respect, and thinks it has no further aim than to get the tree down, without any subtle calculation in respect to its mode of descent. This attribute, he thinks, has been ascribed to it from the circumstance that trees in general, which grow near the margin of water, either lean bodily towards the stream, or stretch their most ponderous limbs in that direction, in search of the light, space, and air which are there usually found. The beaver,

he says, attacks, of course, those trees which are nearest at hand, and on the banks of the stream or pond, and these, when cut through, naturally preponderate towards the water. This suggestion is well-timed, but by no means conclusive against the design of the beaver, whose sagacity, at best, is far beneath that which is positively ascertained in respect to many classes of inferior animals, infinitely below that of the lion-ant, of the bee, and of the coralliferi. The probability is that, were two trees offered to the choice of the beaver, one of which preponderated to the water, and the other did not, he would, in felling the first, omit, as unnecessary, the precautions just described, but observe them in felling the second.

In a subsequent portion of the Journal other particulars are given respecting the habits of the singular animal in question, and of the mode of trapping it employed by the party, and we give them here for the sake of continuity. The principal food of the beavers is bark, and of this they put by regularly a large store for winter provision, selecting the proper kind with care and deliberation. A whole tribe, consisting sometimes of two or three hundred, will set out together upon a foraging expedition, and pass through groves of trees all apparently similar, until a particular one suits their fancy. This they cut down, and, breaking off its most tender branches, divide them into short slips of equal length, and divest these slips of their bark, which they carry to the nearest stream leading to their village, thence floating it home. Occasionally the slips are stored away for the winter without being stripped of the bark; and, in this event, they are careful to remove the refuse wood from their dwellings, as soon as they have eaten the rind,

taking the sticks to some distance. During the spring of the year the males are never found with the tribe at home, but always by themselves, either singly, or in parties of two or three, when they appear to lose their usual habits of sagacity, and fall an easy prey to the arts of the trapper. In summer they return home, and busy themselves, with the females, in making provision for winter. They are described as exceedingly ferocious animals when irritated.

Now and then they may be caught upon shore; especially the males in spring, who are then fond of roving to some distance from the water in search of food. When thus caught, they are easily killed with a blow from a stick; but the most certain and efficacious mode of taking them is by means of the trap. This is simply constructed to catch the foot of the animal. The trapper places it usually in some position near the shore, and just below the surface of the water, fastening it by a small chain to a pole stuck in the mud. In the mouth of the machine is placed one end of a small branch, the other end rising above the surface, and well soaked in the liquid bait whose odor is found to be attractive to the beaver. As soon as the animal scents it, he rubs his nose against the twig, and in so doing steps upon the trap, springs it, and is caught. The trap is made very light, for the convenience of portage, and the prey would easily swim off with it but for its being fastened to the pole by a chain; no other species of fastening could resist his teeth. The experienced trapper readily detects the presence of beaver in any pond or stream, discovering them by a thousand appearances which would afford no indication to the unpractised observer.

Many of the identical wood-cutters whom the

two *voyageurs* had watched so narrowly from the tree-top, fell afterwards a victim to trap, and their fine furs became a prey to the spoilers, who made sad havoc in the lodge at the swamp. Other waters in the neighborhood also afforded the travellers much sport; and they long remembered the island at the creek's mouth, by the name of Beaver Island, in consequence. They left this little paradise in high spirits on the twenty-seventh of the month, and, pursuing their hitherto somewhat uneventful voyage up the river, arrived, by the first of September, without an incident of note, at the mouth of a large river on the south, to which they gave the name of Currant River, from some berries abounding upon its margin, but which was, beyond doubt, the Quicourre. The principal objects of which the Journal takes notice in this interval are the numerous herds of buffalo which darkened the prairies in every direction, and the remains of a fortification on the south shore of the river, nearly opposite the upper extremity of what has been since called Bonhomme Island. Of these remains a minute description is given, which tallies in every important particular with that of Captains Lewis and Clarke. The travellers had passed the Little Sioux, Floyd's, the Great Sioux, White-Stone, and Jacques rivers on the north; with Wawandysenche Creek and White-Paint River on the south, but at neither of these streams did they stop to trap for any long period. They had also passed the great village of the Omahas, of which the Journal takes no notice whatever. This village, at the time, consisted of full three hundred houses, and was inhabited by a numerous and powerful tribe; but it is not immediately upon the banks of the Missouri, and the boats probably went by it during the night,

for the party had begun to adopt this mode of progress, through fear of the Sioux. We resume the narrative of Mr. Rodman, with the second of September.]

September 2. We had now reached a part of the river where, according to all report, a great deal of danger was to be apprehended from the Indians, and we became extremely cautious in our movements. This was the region inhabited by the Sioux, a warlike and ferocious tribe, who had, upon several occasions, evinced hostility to the whites, and were known to be constantly at war with all the neighboring tribes. The Canadians had many incidents to relate respecting their savage propensities, and I had much apprehension lest those cowardly creatures should take an opportunity of deserting, and retracing their way to the Mississippi. To lessen the chances of this, I removed one of them from the piroque, and supplied his place by Poindexter Greely. All the Greelys came in from the shore, turning loose the horses. Our arrangement was now as follows: In the piroque, Poindexter Greely, Pierre Junôt, Toby, and one Canadian; in the large boat, myself, Thornton, Wormley; John, Frank, Robert, and Meredith Greely; and three Canadians, with the dog. We set sail about dusk, and, having a brisk wind from the south, made good headway, although, as night came on, we were greatly embarrassed by the shoals. We continued our course without interruption, however, until a short time before daybreak, when we ran into the mouth of a creek, and concealed the boats among the underwood.

September 3 and 4. During both of these days it rained and blew with excessive violence, so that we did not leave our retreat at all. The weather

depressed our spirits very much, and the narratives of the Canadians about the terrible Sioux did not serve to raise them. We all congregated in the cabin of the large boat, and held a council in regard to our future movements. The Greelys were for a bold push through the dangerous country, maintaining that the stories of the *voyageurs* were mere exaggerations, and that the Sioux would only be a little troublesome, without proceeding to hostility. Wormley and Thornton, however, as well as Pierre (all of whom had much experience in the Indian character) thought that our present policy was the best, although it would necessarily detain us much longer on our voyage than would otherwise be the case. My own opinion coincided with theirs; in our present course we might escape any collision with the Sioux, and I did not regard the delay as a matter of consequence.

September 5. We set off at night, and proceeded for about ten miles, when the day began to appear, and we hid the boats as before, in a narrow creek, which was well adapted to the purpose, as its mouth was almost blocked up by a thickly-wooded island. It again came on to rain furiously, and we were all drenched to the skin before we could arrange matters for turning in, in the cabin. Our spirits were much depressed by the bad weather, and the Canadians especially were in a miserable state of dejection. We had now come to a narrow part of the river where the current was strong, and the cliffs on both sides overhung the water, and were thickly wooded with lynn, oak, black-walnut, ash, and chestnut. Through such a gorge we knew it would be exceedingly difficult to pass without observation, even at night, and our apprehensions of attack were greatly increased. We resolved not to recommence our

journey until late, and then to proceed with the most stealthy caution. In the meantime we posted a sentry on shore and one in the piroque, while the rest of us busied ourselves in overhauling the arms and ammunition, and preparing for the worst.

About ten o'clock we were getting ready to start, when the dog gave a low growl, which made us all fly to our rifles; but the cause of the disturbance proved to be a single Indian of the Ponca tribe, who came up frankly to our sentry on shore, and extended his hand. We brought him on board, and gave him whiskey, when he became very communicative, and told us that his tribe, who lived some miles lower down the river, had been watching our movements for several days past, but that the Poncas were friends and would not molest the whites, and would trade with us upon our return. They had sent him now to caution the whites against the Sioux, who were great robbers, and who were lying in wait for the party at a bend in the river, twenty miles farther up. There were three bands of them, he said, and it was their intention to kill us all, in revenge for an insult sustained by one of their chiefs, many years previously, at the hands of a French trapper.

CHAPTER IV

WE left our travellers, on the fifth of September, apprehending a present attack from the Sioux. Exaggerated accounts of the ferocity of this tribe had inspired the party with an earnest wish to avoid them; but the tale told by the friendly Ponca made it evident that a collision must take place. The night voyages were therefore abandoned as impolitic, and it was resolved to put a bold face upon the matter, and try what could be effected by blustering. The remainder of the night of the fifth was spent in warlike demonstration. The large boat was cleared for action as well as possible, and the fiercest aspect assumed which the nature of the case would permit. Among other preparations for defence, the cannon was got out from below, and placed forward upon the cuddy deck, with a load of bullets, by way of canister shot. Just before sunrise the adventurers started up the river in high bravado, aided by a heavy wind. That the enemy might perceive no semblance of fear or mistrust, the whole party joined the Canadians in an uproarious boat-song at the top of their voices, making the woods reverberate, and the buffaloes stare.

The Sioux, indeed, appear to have been Mr. Rodman's bugbears *par excellence*, and he dwells upon them and their exploits with peculiar emphasis. The narrative embodies a detailed account of the tribe, an account which we can only follow in such portions as appear to possess novelty, or other

important interest. "Sioux" is the French term for the Indians in question; the English have corrupted it into "Sues." Their primitive name is said to be "Darcotas." Their original seats were on the Mississippi, but they had gradually extended their dominions, and, at the date of the Journal, occupied almost the whole of that vast territory circumscribed by the Mississippi, the Saskatchewan, the Missouri, and the Red River of Lake Winnipeg. They were subdivided into numerous clans. The Darcotas proper were the Winowacants, called the Gens du Lac by the French, consisting of about five hundred warriors, and living on both sides of the Mississippi, in the vicinity of the Falls of St. Anthony. Neighbors of the Winowacants, and residing north of them on the river St. Peter's, were the Wappatomies, about two hundred men. Still farther up the St. Peter's lived a band of one hundred, called the Wappytooties, among themselves, and by the French the Gens des Feuilles. Higher up the river yet, and near its source, resided the Sissytoonies, in number two hundred or thereabouts. On the Missouri dwelt the Yanktons and the Tetons. Of the first tribe there were two branches, the northern and southern, of which the former led an Arab life in the plains at the sources of the Red, Sioux, and Jacques rivers, being in number about five hundred. The southern branch kept possession of the tract lying between the river Des Moines on the one hand, and the rivers Jacques and Sioux on the other. But the Sioux most renowned for deeds of violence are the Tetons; and of these there were four tribes: the Saonies, the Minnakenozzies, the Okydandies, and the Bois-Brulés. These last, a body of whom were now lying in wait to intercept the *voyageurs*, were the

most savage and formidable of the whole race, numbering about two hundred men, and residing on both sides of the Missouri near the rivers called by Captains Lewis and Clarke, the White and Teton. Just below the Chayenne River were the Okydandies, one hundred and fifty. The Minnake-nozzies, two hundred and fifty, occupied a tract between the Chayenne and the Watarhoo; and the Saonies, the largest of the Teton bands, counting as many as three hundred warriors, were found in the vicinity of the Warreconne.

Besides these four divisions (the regular Sioux) there were five tribes of seceders called Assiniboins; the Menatopæ Assiniboins, two hundred, on Mouse River, between the Assiniboin and the Missouri; the Gens de Feuilles Assiniboins, two hundred and fifty, occupying both sides of White River; the Big Devils, four hundred and fifty, wandering about the heads of Porcupine and Milk rivers; with two other bands whose names are not mentioned, but who roved on the Saskatchewan, and numbered together about seven hundred men. These seceders were often at war with the parent or original Sioux.

In person, the Sioux generally are an ugly, ill-made race, their limbs being much too small for the trunk, according to our ideas of the human form; their cheek bones are high, and their eyes protruding and dull. The heads of the men are shaved, with the exception of a small spot on the crown, whence a long tuft is permitted to fall in plaits upon the shoulders; this tuft is an object of scrupulous care, but is now and then cut off, upon an occasion of grief or solemnity. A full-dressed Sioux chief presents a striking appearance. The whole surface of the body is painted with grease and coal. A shirt of skins is worn as far down as the waist,

while round the middle is a girdle of the same material, and sometimes of cloth, about an inch in width; this supports a piece of blanket or fur passing between the thighs. Over the shoulders is a white-dressed buffalo mantle, the hair of which is worn next the skin in fair weather, but turned outwards in wet. This robe is large enough to envelop the whole body, and is frequently ornamented with porcupine quills (which make a rattling noise as the warrior moves), as well as with a great variety of rudely painted figures, emblematical of the wearer's military character. Fastened to the top of the head is worn a hawk's feather, adorned with porcupine quills. Leggings of dressed antelope skin serve the purpose of pantaloons, and have seams at the sides about two inches wide, and bespotted here and there with small tufts of human hair, the trophies of some scalping excursion. The moccasins are of elk or buffalo skin, the hair worn inwards; on great occasions the chief is seen with the skin of a polecat dangling at the heel of each boot. The Sioux are indeed partial to this noisome animal, whose fur is in high favor for tobacco-pouches and other appendages.

The dress of a chieftain's squaw is also remarkable. Her hair is suffered to grow long, is parted across the forehead, and hangs loosely behind, or is collected into a kind of net. Her moccasins do not differ from her husband's; but her leggings extend upwards only as far as the knee, where they are met by an awkward shirt of elk skin depending to the ankles, and supported above by a string going over the shoulders. This shirt is usually confined to the waist by a girdle, and over all is thrown a buffalo mantle like that of the men. The tents of the Teton Sioux are described as of neat construc-

tion, being formed of white-dressed buffalo hide, well secured and supported by poles.

The region infested by the tribe in question extends along the banks of the Missouri for some hundred and fifty miles or more, and is chiefly prairie land, but is occasionally diversified by hills. These latter are always deeply cut by gorges or ravines, which in the middle of summer are dry, but form the channels of muddy and impetuous torrents during the season of rain. Their edges are fringed with thick woods, as well at top as at bottom; but the prevalent aspect of the country is that of a bleak lowland, with rank herbage, and without trees. The soil is strongly impregnated with mineral substances in great variety; among others with glauber salts, copperas, sulphur, and alum, which tinge the water of the river and impart to it a nauseous odor and taste. The wild animals most usual are the buffalo, deer, elk, and antelope. We again resume the words of the Journal.]

September 6. The country was open, and the day remarkably pleasant: so that we were all in pretty good spirits notwithstanding the expectation of attack. So far, we had not caught even a glimpse of an Indian, and we were making rapid way through their dreaded territory. I was too well aware, however, of the savage tactics to suppose that we were not narrowly watched, and had made up my mind that we should hear something of the Tetons at the first gorge which would afford them a convenient lurking-place.

About noon a Canadian bawled out, "The Sioux! the Sioux" and directed attention to a long narrow ravine which intersected the prairie on our left, extending from the banks of the Missouri as far as the eye could reach, in a southwardly course. This

gully was the bed of a creek, but its waters were now low, and the sides rose up like huge regular walls on each side. By the aid of a spy-glass I perceived at once the cause of the alarm given by the *voyageur*. A large party of mounted savages were coming down the gorge in Indian file, with the evident intention of taking us unawares. Their calumet feathers had been the means of their detection; for every now and then we could see some of these bobbing up above the edge of the gully, as the bed of the ravine forced the wearer to rise higher than usual. We could tell that they were on horseback by the motion of these feathers. The party was coming upon us with great rapidity; and I gave the word to pull on with all haste so as to pass the mouth of the creek before they reached it. As soon as the Indians perceived by our increased speed that they were discovered, they immediately raised a yell, scrambled out of the gorge, and galloped down upon us, to the number of about one hundred.

Our situation was now somewhat alarming. At almost any other part of the Missouri which we had passed during the day, I should not have cared so much for these freebooters; but, just here, the banks were remarkably steep and high, partaking of the character of the creek banks, and the savages were enabled to overlook us completely, while the cannon, upon which we had placed so much reliance, could not be brought to bear upon them at all. What added to our difficulty was that the current in the middle of the river was so turbulent and strong that we could make no headway against it except by dropping arms, and employing our whole force at the oars. The water near the northern shore was too shallow even for the piroque, and our only mode of proceeding, if we designed to proceed at all, was by

pushing in within a moderate stone's throw of the left or southern bank, where we were completely at the mercy of the Sioux, but where we could make good headway by means of our poles and the wind, aided by the eddy. Had the savages attacked us at this juncture I cannot see how we could have escaped them. They were all well provided with bows and arrows, and small round shields, presenting a very noble and picturesque appearance. Some of the chiefs had spears, with fanciful flags attached, and were really gallant-looking men.

Either good luck upon our own parts, or great stupidity on the parts of the Indians, relieved us very unexpectedly from the dilemma. The savages, having galloped up to the edge of the cliff just above us, set up another yell, and commenced a variety of gesticulations, whose meaning we at once knew to be that we should stop and come on shore. I had expected this demand, and had made up my mind that it would be most prudent to pay no attention to it at all, but proceed on our course. My refusal to stop had at least one good effect, for it appeared to mystify the Indians most wonderfully, who could not be brought to understand the measure in the least, and stared at us, as we kept on our way without answering them, in the most ludicrous amazement. Presently they commenced an agitated conversation among themselves, and at last finding that nothing could be made of us, fairly turned their horses' heads to the southward and galloped out of sight, leaving us as much surprised as rejoiced at their departure.

In the meantime we made the most of the opportunity, and pushed on with might and main, in order to get out of the region of steep banks before the anticipated return of our foes. In about two

hours we again saw them in the south, at a great distance, and their number much augmented. They came on at full gallop, and were soon at the river; but our position was now much more advantageous, for the banks were sloping, and there were no trees to shelter the savages from our shot. The current, moreover, was not so rapid as before, and we were enabled to keep in midchannel. The party, it seems, had only retreated to procure an interpreter, who now appeared upon a large gray horse, and, coming into the river as far as he could without swimming, called out to us in bad French to stop, and come on shore. To this I made one of the Canadians reply that, to oblige our friends the Sioux, we would willingly stop for a short time, and converse, but that it was inconvenient for us to come on shore, as we could not do so without incommoding our great Medicine (here the Canadian pointed to the cannon), who was anxious to proceed on his voyage, and whom we were afraid to disobey.

At this they began again their agitated whisperings and gesticulations among themselves, and seemed quite at a loss what to do. In the meantime the boats had been brought to anchor in a favorable position, and I was resolved to fight now, if necessary, and endeavor to give the freebooters so warm a reception as would inspire them with wholesome dread for the future. I reflected that it was nearly impossible to keep on good terms with these Sioux, who were our enemies at heart, and who could only be restrained from pillaging and murdering us by a conviction of our prowess. Should we comply with their present demands, go on shore, and even succeed in purchasing a temporary safety by concessions and donations, such conduct would not avail us in the end, and would be rather a palliation

than a radical cure of the evil. They would be sure to glut their vengeance sooner or later, and, if they suffered us to go on our way now, might hereafter attack us at a disadvantage, when it might be as much as we could do to repel them, to say nothing of inspiring them with awe. Situated as we were here, it was in our power to give them a lesson they would be apt to remember; and we might never be in so good a situation again. Thinking thus, and all except the Canadians agreeing with me in opinion, I determined to assume a bold stand, and rather provoke hostilities than avoid them. This was our true policy. The savages had no firearms which we could discover, except an old carbine carried by one of the chiefs; and their arrows would not prove very effective weapons when employed at so great a distance as that now between us. In regard to their number, we did not care much for that. Their position was one which would expose them to the full sweep of our cannon.

When Jules (the Canadian) had finished his speech about incommoding our great Medicine, and when the consequent agitation had somewhat subsided among the savages, the interpreter spoke again and propounded three queries. He wished to know, first, whether we had any tobacco, or whiskey, or fire-guns; secondly, whether we did not wish the aid of the Sioux in rowing our large boat up the Missouri as far as the country of the Ricarees, who were great rascals; and, thirdly, whether our great Medicine was not a very large and strong green grasshopper.

To these questions, propounded with profound gravity, Jules replied, by my directions, as follows: First, that we had plenty of whiskey, as well as tobacco, with an inexhaustible supply of fire-guns

and powder; but that our great Medicine had just told us that the Tetons were greater rascals than the Ricarees; that they were our enemies; that they had been lying in wait to intercept and kill us for many days past; that we must give them nothing at all, and hold no intercourse with them whatever; we should therefore be afraid to give them anything, even if so disposed, for fear of the anger of the great Medicine, who was not to be trifled with. Secondly, that, after the character just given the Sioux Tetons, we could not think of employing them to row our boat; and, thirdly, that it was a good thing for them (the Sioux) that our great Medicine had not overheard their last query, respecting the "large green grasshopper"; for, in that case, it might have gone very hard with them (the Sioux). Our great Medicine was anything but a large green grasshopper, and *that* they should soon see, to their cost, if they did not immediately go, the whole of them, about their business.

Notwithstanding the imminent danger in which we were all placed, we could scarcely keep our countenances in beholding the air of profound admiration and astonishment with which the savages listened to these replies; and I believe that they would have immediately dispersed, and left us to proceed on our voyage, had it not been for the unfortunate words in which I informed them that they were greater rascals than the Ricarees. This was, apparently, an insult of the last atrocity, and excited them to an uncontrollable degree of fury. We heard the words "Ricaree! Ricaree!" repeated, every now and then, with the utmost emphasis and excitement; and the whole band, as well as we could judge, seemed to be divided into two factions; the one urging the immense power of the great Medicine, and the other

the outrageous insult of being called greater rascals than the Ricarees. While matters stood thus, we retained our position in the middle of the stream, firmly resolved to give the villains a dose of our canister-shot, upon the first indignity which should be offered us.

Presently, the interpreter on the gray horse came again into the river, and said that he believed we were no better than we should be; that all the palefaces who had previously gone up the river had been friends of the Sioux, and made them large presents; that they, the Tetons, were determined not to let us proceed another step unless we came on shore and gave up all our fire-guns and whiskey, with half of our tobacco; that it was plain that we were allies of the Ricarees (who were now at war with the Sioux), and that our design was to carry them supplies, which we should not do; lastly, that they did not think very much of our great Medicine, for he had told us a lie in relation to the designs of the Tetons, and was positively nothing but a great green grasshopper, in spite of all that we thought to the contrary. These latter words, about the great green grasshopper, were taken up by the whole assemblage as the interpreter uttered them, and shouted out at the top of his voice, that the great Medicine himself might be sure to hear the taunt. At the same time, they all broke into wild disorder, galloping their horses furiously in short circles, using contemptuous and indecent gesticulations, brandishing their spears, and drawing their arrows to the head.

I knew that the next thing would be an attack, and so determined to anticipate it at once, before any of our party were wounded by the discharge of their weapons; there was nothing to be gained by

delay, and everything by prompt and resolute action. As soon as a good opportunity presented itself, the word was given to fire, and instantly obeyed. The effect of the discharge was very severe, and answered all our purposes to the full. Six of the Indians were killed, and perhaps three times as many badly wounded. The rest were thrown into the greatest terror and confusion and made off into the prairie at full speed, as we drew up our anchors, after reloading the gun, and pulled boldly in for the shore. By the time we had reached it, there was not an unwounded Teton within sight.

I now left John Greely, with three Canadians, in charge of the boats, landed with the rest of the men, and, approaching a savage who was severely but not dangerously wounded, held a conversation with him, by means of Jules. I told him that the whites were well disposed to the Sioux, and to all the Indian nations; that our sole object in visiting his country was to trap beaver, and see the beautiful region which had been given the red men by the great Spirit; that when we had procured as many furs as we wished, and seen all we came to see, we should return home; that we had heard that the Sioux, and especially the Tetons, were a quarrelsome race, and that therefore we had brought with us our great Medicine for protection; that he was now much exasperated with the Tetons on account of their intolerable insult in calling him a green grasshopper (which he was not); that I had had great difficulty in restraining him from a pursuit of the warriors who had fled, and from sacrificing the wounded who now lay around us; and that I had only succeeded in pacifying him by becoming personally responsible for the future good behavior of the savages. At this portion of my discourse the poor fellow appeared much relieved, and

extended his hand in token of amity. I took it, and assured him and his friends of my protection as long we were unmolested, following up this promise by a present of twenty carrots of tobacco, some small hardware, beads, and red flannel, for himself and the rest of the wounded.

While all this was going on, we kept a sharp lookout for the fugitive Sioux. As I concluded making the presents, several gangs of these were observable in the distance, and were evidently seen by the disabled savage; but I thought it best to pretend not to perceive them, and shortly afterwards returned to the boats. The whole interruption had detained us full three hours, and it was after three o'clock when we once more started on our route. We made extraordinary haste, as I was anxious to get as far as possible from the scene of action before night. We had a strong wind at our back, and the current diminished in strength as we proceeded, owing to the widening of the stream. We therefore made great way, and by nine o'clock had reached a large and thickly wooded island, near the northern bank, and close by the mouth of a creek. Here we resolved to encamp, and had scarcely set foot on shore, when one of the Greelys shot and secured a fine buffalo, many of which were upon the place. After posting our sentries for the night, we had the hump for supper, with as much whiskey as was good for us. Our exploit of the day was then freely discussed, and by most of the men was treated as an excellent joke; but I could by no means enter into any merriment upon the subject. Human blood had never, before this epoch, been shed at my hands; and although reason urged that I had taken the wisest, and what would no doubt prove in the end the most merciful course, still conscience, refusing to hearken even to reason her-

self, whispered pertinaciously within my ear: "It is human blood which thou hast shed." The hours wore away slowly; I found it impossible to sleep. At length the morning dawned, and with its fresh dews, its fresher breezes, and smiling flowers, there came a new courage and a bolder tone of thought, which enabled me to look more steadily upon what had been done, and to regard in its only proper point of view the urgent necessity of the deed.

September 7. Started early and made great way, with a strong cold wind from the east. Arrived about noon at the upper gorge of what is called the Great Bend, a place where the river performs a circuit of full thirty miles, while by land the direct distance is not more than fifteen hundred yards. Six miles beyond this is a creek about thirty-five yards wide, coming in from the south. The country here is of peculiar character; on each side of the river the shore is strewed thickly with round stones washed from the bluffs, and presenting a remarkable appearance for miles. The channel is very shallow, and much interrupted with sand-bars. Cedar is here met with more frequently than any other species of timber, and the prairies are covered with a stiff kind of prickly pear, over which our men found it no easy matter to walk in their moccasins.

About sunset, in endeavoring to avoid a rapid channel, we had the misfortune to run the larboard side of the large boat on the edge of a sand-bar, which so heeled us over that we were very near getting filled with water, in spite of the greatest exertion. As it was, much damage was done to the loose powder, and the Indian goods were all more or less injured. As soon as we found the boat careening, we all jumped into the water, which was here up to our armpits, and by main force held the

sinking side up. But we were still in a dilemma, for all our exertions were barely sufficient to keep from capsizing, and we could not spare a man to do anything towards pushing off. We were relieved, very unexpectedly, by the sinking of the whole sand-bar from under the boat, just as we were upon the point of despair. The bed of the river in this neighborhood is much obstructed by these shifting sands, which frequently change situations with great rapidity, and without apparent cause. The material of the bars is a fine hard yellow sand, which, when dry, is of a brilliant glass-like appearance, and almost impalpable.

September 8. We were still in the heart of the Teton country, and kept a sharp lookout, stopping as seldom as possible, and then only upon the islands, which abounded with game in great variety—buffaloes, elk, deer, goats, black-tailed deer, and antelopes, with plover and brant of many kinds. The goats are uncommonly tame, and have no beard. Fish is not so abundant here as lower down the river. A white wolf was killed by John Greely in a ravine upon one of the smaller islands. Owing to the difficult navigation, and the frequent necessity of employing the towline, we did not make great progress this day.

September 9. Weather growing sensibly colder, which made us all anxious of pushing our way through the Sioux country, as it would be highly dangerous to form our winter encampment in their vicinity. We aroused ourselves to exertion, and proceeded rapidly, the Canadians singing and shouting as we went. Now and then we saw, in the extreme distance, a solitary Teton, but no attempt was made to molest us, and we began to gather courage from this circumstance. Made

twenty-eight miles during the day, and encamped at night, in high glee, on a large island well-stocked with game, and thickly covered with cottonwood.

[We omit the adventures of Mr. Rodman from this period until the tenth of April. By the last of October, nothing of importance happening in the interval, the party made their way to a small creek which they designated as Otter Creek; and, proceeding up this about a mile to an island well adapted for their purpose, built a log fort and took up their quarters for the winter. The location is just above the old Ricara villages. Several parties of these Indians visited the *voyageurs*, and behaved with perfect friendliness; they had heard of the skirmish with the Tetons, the result of which hugely pleased them. No further trouble was experienced from any of the Sioux. The winter wore away pleasantly, and without accident of note. On the tenth of April the party resumed their voyage.]

CHAPTER V

APRIL 10, 1792. The weather was now again most delicious, and revived our spirits exceedingly. The sun began to have power, and the river was quite free of ice, so the Indians assured us, for a hundred miles ahead. We bade adieu to Little Snake (a chief of the Ricarees who had shown the *voyageurs* many evidences of friendship during the winter) and his band, with unfeigned regret, and set out, after breakfast, on our voyage. Perrine (an agent of the Hudson Bay Fur Company on his way to Petite Côte) accompanied us with three Indians for the first ten miles, when he took leave of us and made his way back to the village, where (as we afterwards heard) he met with a violent death from the hands of a squaw, to whom he offered some insult. Upon parting with the agent, we pushed on vigorously up the river, and made great way, notwithstanding a rapid current. In the afternoon, Thornton, who had been complaining for some days past, was taken seriously ill; so much so that I urged the return of the whole party to the hut, there to wait until he should get better; but he resisted this offer so strongly that I was forced to yield. We made him a comfortable bed in the cabin, and paid him every attention; but he had a raging fever, with occasional delirium, and I was much afraid that we should lose him. In the meantime we still pushed ahead with resolution, and by night had made twenty miles, an excellent day's work.

April 11. Still beautiful weather. We started

early, and had a good wind, which aided us greatly; so that, but for Thornton's illness, we should all have been in fine spirits. He seemed to grow much worse, and I scarcely knew how to act. Everything was done for his comfort which could be done; Jules, the Canadian, made him some tea, from prairie herbs, which had the effect of inducing perspiration, and allayed the fever very sensibly. We stopped at night on the mainland to the north, and three hunters went out into the prairie by moonlight, returning at one in the morning, without their rifles, and with a fat antelope.

They related that, having proceeded many miles across the country, they reached the banks of a beautiful rivulet, where they were much surprised and alarmed at discovering a large war-party of the Saonie Sioux, who immediately took them prisoners, and carried them a mile on the other side of the stream to a kind of park, or enclosure, walled with mud and sticks, in which was a large herd of antelopes. These animals were still coming into the park, the gates of which were so contrived as to prevent escape. This was an annual practice of the Indians. In the autumn, the antelopes retire for food and shelter from the prairie to the mountainous regions on the south of the river. In the spring they recross it in great numbers, and are then easily taken by being enticed into a strong enclosure as above described.

The hunters (John Greely, the Prophet, and a Canadian) had scarcely any hope of escape from the clutches of the Indians (who numbered as many as fifty), and had well-nigh made up their minds to die. Greely and the Prophet were disarmed and tied hand and foot; the Canadian, however, was suffered, for some reason not perfectly

understood, to remain unbound, and was only deprived of his rifle, the savages leaving him in possession of his hunter's knife (which, possibly, they did not perceive, as it was worn in a sort of sheath in the side of his legging), and treating him otherwise with a marked difference from their demeanor to the others. This circumstance proved the source of the party's deliverance.

It was, perhaps, nine o'clock at night when they were first taken. The moon was bright, but, as the air was unusually cool for the season, the savages had kindled two large fires at a sufficient distance from the park not to frighten the antelopes, who were still pouring into it continually. At these fires they were occupied in cooking their game when the hunters so unexpectedly came upon them from round a clump of trees. Greely and the Prophet, after being disarmed and bound with strong thongs of buffalo hide, were thrown down under a tree at some distance from the blaze; while the Canadian was permitted to seat himself, in charge of two savages, by one of the fires, the rest of the Indians forming a circle round the other and larger one. In this arrangement, the time wore away slowly, and the hunters were in momentary expectation of death; the cords of the two who were bound caused them, also, infinite pain, from the tightness with which they were fastened. The Canadian had endeavored to hold a conversation with his guards, in the hope of bribing them to release him, but could not make himself understood. About midnight, the congregation around the large fire were suddenly disturbed by the dash of several large antelopes in succession through the midst of the blaze. These animals had burst through a portion of the mud wall which confined them, and,

mad with rage and affright, had made for the light of the fire, as is the habit of insects at night in like circumstances. It seems, however, that the Saonies had never heard of any similar feat, of these usually timid creatures, for they were in great terror at the unexpected interruption, and their alarm increased to perfect dismay, as the whole captured herd came rushing and bounding upon them, after the lapse of a minute or so from the outbreak of the first few. The hunters described the scene as one of the most singular nature. The beasts were apparently frantic, and the velocity and impetuosity with which they flew, rather than leaped through the flames, and through the midst of the terrified savages, was said by Greely (a man not in the least prone to exaggerate) to have been not only an imposing but even a terrible spectacle. They carried everything before them in their first plunges; but, having cleared the large fire, they immediately dashed at the small one, scattering the brands and blazing wood about; then returned, as if bewildered, to the large one, and so backwards and forwards until the decline of the fires, when, in small parties, they scampered off like lightning to the woods.

Many of the Indians were knocked down in this furious mêlée, and there is no doubt that some of them were seriously, if not mortally, wounded by the sharp hoofs of the agile antelopes. Some threw themselves flat on the ground, and so avoided injury. The Prophet and Greely, not being near the fires, were in no danger. The Canadian was prostrated at the first onset by a kick which rendered him senseless for some minutes. When he came to himself he was nearly in darkness; for the moon had gone behind a heavy thunder-cloud, and the fires were almost out, or only existed in brands

scattered hither and thither. He saw no Indians near him, and instantly arousing himself to escape, made, as well as he could, for the tree where his two comrades were lying. Their thongs were soon cut, and the three set off at full speed in the direction of the river, without stopping to think of their rifles, or of anything beyond present security. Having run for some miles, and finding no one in pursuit, they slackened their pace, and made their way to a spring for a draught of water. Here it was they met with the antelope which, as I mentioned before, they brought with them to the boats. The poor creature lay panting, and unable to move, by the border of the spring. One of its legs was broken, and it bore evident traces of fire. It was no doubt one of the herd which had been the means of deliverance. Had there been even a chance of its recovery the hunters would have spared it in token of their gratitude, but it was miserably injured, so they put it at once out of its misery, and brought it home to the boats, where we made an excellent breakfast upon it next morning.

April 12, 13, 14, and 15. During these four days we kept on our course without any adventure of note. The weather was very pleasant during the middle of the day, but the nights and mornings were exceedingly cold, and we had sharp frosts. Game was abundant. Thornton still continued ill, and his sickness perplexed and grieved me beyond measure. I missed his society very much, and now found that he was almost the only member of our party in whom I could strictly confide. By this I merely mean that he was almost the only one to whom I could, or would, freely unburden my heart, with all its wild hopes and fantastic wishes—not that any individual among us was unworthy of

implicit faith. On the contrary, we were all like brothers, and a dispute, of any importance, never occurred. One interest seemed to bind all; or rather we appeared to be a band of *voyageurs* without interest in view, mere travellers for pleasure. What ideas the Canadians might have held upon this subject I cannot, indeed, exactly say. These fellows talked a great deal, to be sure, about the profits of the enterprise, and especially about their expected share of it; yet I can scarcely think they cared much for these points, for they were the most simple-minded, and certainly the most obliging set of beings upon the face of the earth. As for the rest of the crew, I have no doubt in the world that the pecuniary benefit to be afforded by the expedition was the last thing upon which they speculated. Some singular evidence of the feeling which more or less pervaded us all occurred during the prosecution of the voyage. Interests, which, in the settlements, would have been looked upon as of the highest importance, were here treated as matters unworthy of a serious word, and neglected, or totally discarded upon the most frivolous pretext. Men who had travelled thousands of miles through a howling wilderness, beset by horrible dangers, and enduring the most heartrending privations for the ostensible purpose of collecting peltries, would seldom take the trouble to secure them when obtained, and would leave behind them without a sigh an entire *cache* of fine beaver skins rather than forego the pleasure of pushing up some romantic-looking river, or penetrating into some craggy and dangerous cavern, for minerals whose use they knew nothing about, and which they threw aside as lumber at the first decent opportunity.

In all this my own heart was very much with the

rest of the party; and I am free to say that, as we proceeded on our journey, I found myself less and less interested in the main business of the expedition, and more and more willing to turn aside in pursuit of idle amusement, if indeed I am right in calling by so feeble a name as amusement that deep and most intense excitement with which I surveyed the wonders and majestic beauties of the wilderness. No sooner had I examined one region than I was possessed with an irresistible desire to push forward and explore another. As yet, however, I felt as if in too close proximity to the settlements for the full enjoyment of my burning love of nature and of the unknown. I could not help being aware that some civilized footsteps, although few, had preceded me in my journey; that some eyes before my own had been enraptured with the scenes around me. But for this sentiment, ever obtruding itself, I should no doubt have loitered more frequently on the way, turning aside to survey the features of the region bordering upon the river, and perhaps penetrating deeply, at times, into the heart of the country to the north and south of our route. But I was anxious to go on; to get, if possible, beyond the extreme bounds of civilization; to gaze, if I could, upon those gigantic mountains of which the existence had been made known to us only by the vague accounts of the Indians. These ulterior hopes and views I communicated fully to no one of our party save Thornton. He participated in all my most visionary projects, and entered completely into the spirit of the romantic enterprise which pervaded my soul. I therefore felt his illness as a bitter evil. He grew worse daily, while it was out of our power to render him any effectual assistance.

April 16. To-day we had a cold rain with a high wind from the north, obliging us to come to anchor until late in the afternoon. At four o'clock P. M. we proceeded, and made five miles by night. Thornton was much worse.

April 17 and 18. During both these days we had a continuance of raw, unpleasant weather, with the same cold wind from the north. We observed many large masses of ice in the river, which was much swollen and very muddy. The time passed unpleasantly, and we made no way. Thornton appeared to be dying, and I now resolved to encamp at the first convenient spot, and remain until his illness should terminate. We accordingly, at noon this day, drew the boats up a large creek coming in from the south and formed an encampment on the mainland.

April 25. We remained at the creek until this morning, when, to the great joy of us all, Thornton was sufficiently recovered to go on. The weather was fine, and we proceeded gaily through a most lovely portion of the country, without encountering a single Indian, or meeting with any adventure out of the usual course until the last of the month, when we reached the country of the Mandans, or rather of the Mandans, the Minnetarees, and the Ahnaha-ways; for these three tribes all live in the near vicinity of each other, occupying five villages. Not a great many years ago the Mandans were settled in nine villages, about eight miles below, the ruins of which we passed without knowing what they were,—seven on the west and two on the east of the river; but they were thinned off by the smallpox and their old enemies the Sioux, until reduced to a mere handful, when they ascended to their present position. [Mr. R. gives here a tolerably full account

of the Minnetarees and Ahnahaways or Wassatoons; but we omit it, as differing in no important particular from the ordinary statements respecting these nations.] The Mandans received us with perfect friendliness, and we remained in their neighborhood three days, during which we overhauled and repaired the piroque, and otherwise refitted. We also obtained a good supply of hard corn, of a mixed color, which the savages had preserved through the winter in holes near the front of their lodges. While with the Mandans we were visited by a Minnetaree chief, called Waukerassah, who behaved with much civility, and was of service to us in many respects. The son of this chief we engaged to accompany us as interpreter as far as the great fork. We made the father several presents, with which he was greatly pleased.* On the first of May we bade adieu to the Mandans, and went on our way.

May 1. The weather was mild, and the surrounding country began to assume a lovely appearance with the opening vegetation, which was now much advanced. The cottonwood leaves were quite as large as a crown, and many flowers were full blown. The low grounds began to spread out here more than usual, and were well supplied with timber. The cottonwood and common willow, as well as red willow, abounded; with rose-bushes in great plenty. Beyond the low grounds on the river, the country extended in one immense plain without wood of any kind. The soil was remarkably rich. The game was more abundant than we had ever yet seen it. We kept a hunter ahead of us on each bank, and to-day they brought in an

[* The chief Waukerassah is mentioned by Captains Lewis and Clarke, whom he also visited.

elk, a goat, five beavers, and a great number of plovers. The beavers were very tame and easily taken. This animal is quite a *bonno bouche* as an article of food; especially the tail, which is of a somewhat glutinous nature, like the fins of the halibut. A beaver tail will suffice for a plentiful dinner for three men. We made twenty miles before night.

May 2. We had a fine wind this morning, and used our sails until noon, when it became rather too much for us, and we stopped for the day. Our hunters went out and shortly returned with an immense elk whom Neptune had pulled down after a long chase, the animal having been only slightly wounded by a buckshot. He measured six feet in height. An antelope was also caught about dusk. As soon as the creature saw our men, it flew off with the greatest velocity, but after a few minutes stopped, and returned on its steps, apparently through curiosity, then bounded away again. This conduct was repeated frequently, each time the game coming nearer and nearer, until at length it ventured within rifle distance, when a shot from the Prophet brought it down. It was lean and with young. These animals, although of incredible swiftness of foot, are still bad swimmers, and thus frequently fall a victim to the wolves, in their attempts to cross a stream. To-day made twelve miles.

May 3. This morning we made great headway, and by night had accomplished full thirty miles. The game continued to be abundant. Buffaloes, in vast numbers, lay dead along the shore, and we saw many wolves devouring the carcasses. They fled always at our approach. We were much at a loss to account for the death of the buffaloes, but some

weeks afterwards the mystery was cleared up. Arriving at a pass of the river where the bluffs were steep and the water deep at their base, we observed a large herd of the huge beasts swimming across, and stopped to watch their motions. They came in a sidelong manner down the current, and had apparently entered the water from a gorge, about half a mile above, where the bank sloped into the stream. Upon reaching the land on the west side of the river they found it impossible to ascend the cliffs, and the water was beyond their depth. After struggling for some time, and endeavoring in vain to get a foothold in the steep and slippery clay, they turned and swam to the eastern shore, where the same kind of inaccessible precipices presented themselves, and where the ineffectual struggle to ascend was repeated. They now turned a second time, a third, a fourth, and a fifth, always making the shore at very nearly the same places. Instead of suffering themselves to go down with the current in search of a more favorable landing (which might have been found a quarter of a mile below), they seemed bent upon maintaining their position, and, for this purpose, swam with their breasts at an acute angle to the stream, and used violent exertions to prevent being borne down. At the fifth time of crossing, the poor beasts were so entirely exhausted that it was evident they could do no more. They now struggled fearfully to scramble up the bank, and one or two of them had nearly succeeded, when, to our great distress (for we could not witness their noble efforts without commiseration), the whole mass of loose earth above caved in, and buried several of them in its fall, without leaving the cliff in better condition for ascent. Upon this the rest of the herd commenced a lamentable kind of lowing or moaning, a sound

conveying more of a dismal sorrow and despair than anything which it is possible to imagine, I shall never get it out of my head. Some of the beasts made another attempt to swim the river, struggled a few minutes, and sank, the waves above them being dyed with the red blood that gushed from their nostrils in the death agony. But the greater part, after the moaning described, seemed to yield supinely to their fate, rolled over on their backs, and disappeared. The whole herd was drowned; not a buffalo escaped. Their carcasses were thrown up in half an hour afterwards upon the flat grounds a short distance below, where, but for their ignorant obstinacy, they might so easily have landed in safety.

May 4. The weather was delightful, and, with a fair warm wind from the south, we made twenty-five miles before night. To-day Thornton was sufficiently recovered to assist in the duties of the boat. In the afternoon he went out with me into the prairie on the west, where we saw a great number of early spring flowers of a kind never seen in the settlements. Many of them were of a rare beauty and delicious perfume. We saw also game in great variety, but shot none, as we were sure the hunters would bring in more than was wanted for use, and I was averse to the wanton destruction of life. On our way home we came upon two Indians of the Assiniboin nation, who accompanied us to the boats. They had evinced nothing like distrust on the way, but, on the contrary, had been frank and bold in demeanor; we were therefore much surprised to see them, upon coming within a stone's throw of the piroque, turn, both of them, suddenly round, and make off into the prairie at full speed. Upon getting a good distance from us, they stopped and, ascended a knoll which commanded a view of the

river. Here they lay on their bellies, and, resting their chins on their hands, seemed to regard us with the deepest astonishment. By the aid of a spy-glass I could minutely observe their countenances, which bore evidence of both amazement and terror. They continued watching us for a long time. At length, as if struck with a sudden thought, they arose hurriedly and commenced a rapid flight in the direction from which we had seen them issue at first.

May 5. As we were getting under way very early this morning, a large party of Assiniboins suddenly rushed upon the boats, and succeeded in taking possession of the piroque before we could make any effectual resistance. No one was in it at the time except Jules, who escaped by throwing himself into the river, and swimming to the large boat, which we had pushed out into the stream. These Indians had been brought upon us by the two who had visited us the day before, and the party must have approached us in the most stealthy manner imaginable, as we had our sentries regularly posted, and even Neptune failed to give any token of their vicinity.

We were preparing to fire upon the enemy when Misquash (the new interpreter—son of Waukerassah) gave us to understand that the Assiniboins were friends and were now making signals of amity. Although we could not help thinking that the highway robbery of our boat was but an indifferent way of evincing friendship, still we are willing to see what these people had to say, and desired Misquash to ask them why they had behaved as they did. They replied with many protestations of regard; and we at length found that they really had no intention of molesting us any further than to satisfy an ardent curiosity

which consumed them, and which they now entreated us to appease. It appeared that the two Indians of the day before, whose singular conduct had so surprised us, had been struck with sudden amazement at the sooty appearance of our negro, Toby. They had never before seen or heard of a blackamoor, and it must therefore be confessed that their astonishment was not altogether causeless. Toby, moreover, was as ugly an old gentleman as ever spoke, having all the peculiar features of his race—the swollen lips, large white protruding eyes, flat nose, long ears, double head, pot-belly, and bow legs. Upon relating their adventure to their companions, the two savages could obtain no credit for the wonderful story, and were about losing caste forever, as liars and double-dealers, when they proposed to conduct the whole band to the boats by way of vindicating their veracity. The sudden attack seemed to have been the mere result of impatience on the part of the still incredulous Assiniboins; for they never afterwards evinced the slightest hostility, and yielded up the piroque as soon as we made them understand that we would let them have a good look at old Toby. The latter personage took the matter as a very good joke, and went ashore at once, *in naturalibus*, that the inquisitive savages might observe the whole extent of the question. Their astonishment and satisfaction were profound and complete. At first they doubted the evidence of their own eyes, spitting upon their fingers and rubbing the skin of the negro to be sure that it was not painted. The wool on the head elicited repeated shouts of applause, and the bandy legs were the subject of unqualified admiration. A jig dance on the part of our ugly friend brought matters to a climax. Wonder was now at its height. Approbation could go no further. Had

Toby but possessed a single spark of ambition he might then have made his fortune forever by ascending the throne of the Assiniboins, and reigning as King Toby the First.

This incident detained us until late in the day. After interchanging some civilities and presents with the savages, we accepted the aid of six of the band in rowing us about five miles on our route, a very acceptable assistance, and one for which we did not fail to thank Toby. We made, to-day, only twelve miles, and encamped at night on a beautiful island which we long remembered for the delicious fish and fowl which its vicinity afforded us. We stayed at this pleasant spot two days, during which we feasted and made merry, with very little care for the morrow, and with very little regard to the numerous beaver which disported around us. We might have taken at this island one or two hundred skins without difficulty. As it was, we collected about twenty. The island is at the mouth of a tolerably large river coming in from the south, and at a point where the Missouri strikes off in a due westerly direction. The latitude is about 48.

May 8. We proceeded with fair winds and fine weather, and after making twenty or twenty-five miles, reached a large river coming in from the north. Where it debouches, however, it is very narrow, not more than a dozen yards wide, and appears to be quite choked up with mud. Upon ascending it a short distance, a fine bold stream is seen, seventy or eighty yards wide, and very deep, passing through a beautiful valley, abounding in game. Our new guide told us the name of this river, but I have no memorandum of it.* Robert Greely shot here some geese which build their nests upon trees.

* Probably White-Earth River.

May 9. In many places a little distant from the river banks, to-day, we observed the ground encrusted with a white substance which proved to be a strong salt. We made only fifteen miles, owing to several petty hindrances, and encamped at night on the mainland, among some clumps of cottonwood and rabbitberry bushes.

May 10. To-day the weather was cold, and the wind strong, but fair. We made great headway. The hills in this vicinity are rough and jagged, showing irregular broken masses of rock, some of which tower to a great height, and appear to have been subject to the action of water. We picked up several pieces of petrified wood and bone; and coal was scattered about in every direction. The river gets very crooked.

May 11. Detained the greater part of the day by squalls and rain. Towards evening it cleared up beautifully with a fair wind, of which we took advantage, making ten miles before encamping. Several fat beavers were caught, and a wolf was shot upon the bank. He seemed to have strayed from a large herd which were prowling about us.

May 12. Landed to-day at noon, after making ten miles, upon a small steep island, for the purpose of overhauling some of our things. As we were about taking our departure, one of the Canadians, who led the van of the party and was several yards in advance, suddenly disappeared from our view with a loud scream. We all ran forward immediately, and laughed heartily upon finding that our man had only tumbled into an empty *cache*, from which we soon extricated him. Had he been alone, however, there is much room for question if he would have got out at all. We examined the hole carefully, but found nothing in it beyond a few empty bottles; we did not

see anything serving to show whether French, British, or Americans had concealed their goods there; and we felt some curiosity upon this point.

May 13. Arrived at the junction of the Yellowstone with the Missouri, after making twenty-five miles during the day. Misquash here left us, and returned home.

CHAPTER VI

THE character of the country through which we had passed for the last two or three days was cheerless in comparison with that to which we had been accustomed. In general it was more level; the timber being more abundant on the skirts of the stream, with little or none at all in the distance. Wherever bluffs appeared upon the margin we descried indications of coal, and we saw one extensive bed of a thick bituminous nature which very much discolored the water for some hundred yards below it. The current is more gentle than hitherto, the water clearer, and the rocky points and shoals fewer, although such as we had to pass were as difficult as ever. We had rain incessantly, which rendered the banks so slippery that the men who had the towing lines could scarcely walk. The air, too, was disagreeably chilly, and upon ascending some low hills near the river we observed no small quantity of snow lying in the clefts and ridges. In the extreme distance on our right we had perceived several Indian encampments which had the appearance of being temporary, and had been only lately abandoned. This region gives no indication of any permanent settlement, but appears to be a favorite hunting ground with the tribes in the vicinity, a fact rendered evident by the frequent traces of the hunt, which we came across in every direction. The Minnetarees of the Missouri, it is well known, extend their excursions in pursuit of game as high as the great fork, on the south side; while the Assiniboins go up still higher. Misquash informed us that

between our present encampment and the Rocky Mountains we should meet with no lodges except those of the Minnetarees that reside on the lower or south side of the Saskatchewan.

The game had been exceedingly abundant, and in great variety: elk, buffalo, big-horn, mule-deer, bears, foxes, beaver, etc., etc., with wild fowl innumerable. Fish was also plentiful. The width of the stream varied considerably from two hundred and fifty yards to passes where the current rushed between bluffs not more than a hundred feet apart. The face of these bluffs generally was composed of a light yellowish freestone intermingled with burnt earth, pumice-stone, and mineral salts. At one point the aspect of the country underwent a remarkable change, the hills retiring on both sides to a great distance from the river, which was thickly interspersed with small and beautiful islands, covered with cottonwood. The low grounds appeared to be very fertile; those on the north wide and low, and opening into three extensive valleys. Here seemed to be the extreme northern termination of the range of mountains through which the Missouri had been passing for so long a time, and which are called the Black Hills by the savages. The change from the mountainous region to the level was indicated by the atmosphere, which now became dry and pure; so much so indeed that we perceived its effects upon the seams of our boats, and our few mathematical instruments.

As we made immediate approach to the forks it came on to rain very hard, and the obstructions in the river were harassing in the extreme. The banks in some places were so slippery, and the clay so soft and stiff, that the men were obliged to go barefooted, as they could not keep on their moccasins. The shores also were full of pools of stagnant water, through

which we were obliged to wade, sometimes up to our armpits. Then again we had to scramble over enormous shoals of sharp-pointed flints, which appeared to be the wreck of cliffs that had fallen down *en masse*. Occasionally we came to a precipitous gorge or gully, which it would put us to the greatest labor to pass, and in attempting to push by one of these the rope of the large boat (being old and much worn) gave way and permitted her to be swung round by the current upon a ledge of rock in the middle of the stream, where the water was so deep that we could only work in getting her off by the aid of the piroque, and so were full six hours in effecting it.

At one period we arrived at a high wall of black rock on the south, towering above the ordinary cliffs for about a quarter of a mile along the stream; after which there was an open plain, and about three miles beyond this again, another wall of a light color, on the same side, fully two hundred feet high; then another plain or valley, and then still another wall of the most singular appearance arises on the north, soaring in height probably two hundred and fifty feet, and being in thickness about twelve, with a very regular artificial character. These cliffs present indeed the most extraordinary aspect, rising perpendicularly from the water. The last mentioned are composed of very white soft sandstone, which readily receives the impression of the water. In the upper portion of them appears a sort of frieze or cornice formed by the intervention of several thin horizontal strata of a white freestone, hard, and unaffected by the rains. Above them is a dark rich soil, sloping gradually back from the water to the extent of a mile or thereabouts, when other hills spring up abruptly to the height of full five hundred feet more.

The face of these remarkable cliffs, as might be supposed, is checkered with a variety of lines formed by the trickling of the rains upon the soft material, so that a fertile fancy might easily imagine them to be gigantic monuments reared by human art, and carved over with hieroglyphical devices. Sometimes there are complete niches (like those we see for statues in common temples) formed by the dropping out bodily of large fragments of the sandstone; and there are several points where staircases and long corridors appear, as accidental fractures in the freestone cornice happen to let the rain trickle down uniformly upon the softer material below. We passed these singular bluffs in a bright moonlight, and their effect upon my imagination I shall never forget. They had all the air of enchanted structures (such as I have dreamed of), and the twittering of myriads of martins which have built their nests in the holes that everywhere perforate the mass, aided this conception not a little. Besides the main walls there are, at intervals, inferior ones, of from twenty to a hundred feet high, and from one to twelve or fifteen feet thick, perfectly regular in shape, and perpendicular. These are formed of a succession of large black-looking stones, apparently made up of loam, sand, and quartz, and absolutely symmetrical in figure, although of various sizes. They are usually square, but sometimes oblong (always parallelepipedal), and are lying one above the other as exactly and with as perfect regularity as if placed there by some mortal mason; each upper stone covering and securing the point of junction between two lower ones, just as bricks are laid in a wall. Sometimes these singular erections run in parallel lines, as many as four abreast; sometimes they leave the river and go back until lost amid the hills; sometimes they cross each other at

right angles, seeming to enclose large artificial gardens, the vegetation within which is often of a character to preserve the illusion. Where the walls are thinnest, there the bricks are less in size, and the converse. We regarded the scenery presented to our view at this portion of the Missouri as altogether the most surprising, if not the most beautiful, which we had yet seen. It left upon my mind an impression of novelty, of singularity, which can never be effaced.

Shortly after reaching the fork we came to a pretty large island on the northern side, one mile and a quarter from which is a low ground on the south very thickly covered with fine timber. After this there were several small islands, at each of which we touched for a few minutes as we passed. Then we came to a very black-looking bluff on the north, and then to two other small islands, about which we observed nothing remarkable. Going a few miles farther we reached a tolerably large island situated near the point of a steep promontory, afterwards passing two others, smaller. All these islands are well timbered. It was at night, on the 13th of May, that we were shown by Misquash the mouth of the large river, which in the settlement goes by the name of the Yellow Stone, but by the Indians is called the Ahmateaza.* We made our camp on the south shore in a beautiful plain covered with cottonwood.

May 14. This morning we were all awake and stirring at an early hour, as the point we had now reached was one of great importance, and it was requi-

* There appears to be some discrepancy here which we have not thought it worth while to alter, as, after all, Mr. Rodman may not be in the wrong. The Amateaza (according to the narrative of Lewis and Clarke) is the name given by the Minnetarees, not to the Yellow Stone, but to the Missouri itself.

site that, before proceeding any farther, we should make some survey by way of ascertaining which of the two large streams in view would afford us the better passage onward. It seemed to be the general wish of the party to push up one of these rivers as far as practicable, with a view of reaching the Rocky Mountains, when we might perhaps hit upon the head waters of the large stream Aregan, described by all the Indians with whom we had conversed upon the subject, as running into the great Pacific Ocean. I was also anxious to attain this object, which opened to my fancy a world of exciting adventure, but I foresaw many difficulties which we must necessarily encounter if we made the attempt with our present limited information in respect to the region we should have to traverse, and the savages who occupied it; about which latter we only knew indeed that they were generally the most ferocious of the North American Indians. I was afraid, too, that we might get into the wrong stream, and involve ourselves in an endless labyrinth of troubles which would dishearten the men. These thoughts, however, did not give me any long uneasiness, and I set to work at once to explore the neighborhood; sending some of the party up the banks of each stream to estimate the comparative volume of water in each, while I myself, with Thornton and John Greely, proceeded to ascend the high grounds in the fork, whence an extensive prospect of the surrounding region might be attained. We saw here an immense and magnificent country spreading out on every side into a vast plain, waving with glorious verdure, and alive with countless herds of buffaloes and wolves, intermingled with occasional elk and antelope. To the south the prospect was interrupted by a range of high, snow-capped mountains, stretching from southeast to northwest, and terminating

abruptly. Behind these again was a higher range, extending to the very horizon in the northwest. The two rivers presented the most enchanting appearance as they wound away their long snake-like lengths in the distance, growing thinner and thinner until they looked like mere faint threads of silver as they vanished in the shadowy mists of the sky. We could glean nothing, from their direction so far, as regards their ultimate course, and so descended from our position much at a loss what to do.

The examination of the two currents gave us but little more satisfaction. The north stream was found to be the deeper, but the south was the wider, and the volume of water differed but little. The first had all the color of the Missouri, but the latter had the peculiar round gravelly bed which distinguishes a river that issues from a mountainous region. We were finally determined by the easier navigation of the north branch to pursue this course, although from the rapidly increasing shallowness we found that in a few days, at farthest, we should have to dispense with the large boat. We spent three days at our encampment, during which we collected a great many fine skins, and deposited them, with our whole stock on hand, in a well constructed *cache* on a small island in the river a mile below the junction.*

* *Caches* are holes very frequently dug by the trappers and fur traders, in which to deposit their furs or other goods during a temporary absence. A dry and retired situation is first selected. A circle about two feet in diameter is then described; the sod within this carefully removed and laid by. A hole is now sunk perpendicularly to the depth of a foot, and afterwards gradually widened until the excavation becomes eight or ten feet deep, and six or seven feet wide. As the earth is dug up, it is cautiously placed on a skin, so as to prevent any traces upon the grass, and, when all is completed, is thrown into the nearest river, or otherwise effectually concealed. This *cache* is lined throughout with dried sticks and hay, or with skins, and within it almost any species of backwoods property may be safely and soundly kept for years. When the goods

We also brought in a great quantity of game, and especially of deer, some haunches of which we pickled or corned for future use. We found great abundance of the prickly pear in this vicinity, as well as choke berries in great plenty upon the low grounds and ravines. There were also many yellow and red currants (not ripe), with gooseberries. Wild roses were just beginning to open their buds in the most wonderful profusion. We left our encampment in fine spirits on the morning of

May 18. The day was pleasant, and we proceeded merrily, notwithstanding the constant interruptions occasioned by the shoals and jutting points with which the stream abounds. The men, one and all, were enthusiastic in their determination to persevere, and the Rocky Mountains where the sole theme of conversation. In leaving our peltries behind us, we had considerably lightened the boats, and we found much less difficulty in getting them forward through the rapid currents than would otherwise have been the case. The river was crowded with islands, at nearly all of which we touched. At night we reached a deserted Indian encampment, near bluffs of a blackish clay. Rattlesnakes disturbed us very much, and before morning we had a heavy rain.

May 19. We had not proceeded far before we found the character of the stream materially altered, and very much obstructed by sand-bars, or rather ridges of small stones, so that it was with the greatest difficulty we could force a passage for the larger boat. Sending two men ahead to reconnoitre, they returned with an account of a wider and deeper channel above, are in, and well covered with buffalo hide, earth is thrown upon the whole, and stamped firmly down. Afterwards the sod is replaced, and a private mark made upon the neighboring trees, or elsewhere, indicating the precise location of the depôt.

and once again we felt encouraged to persevere. We pushed on for ten miles and encamped on a small island for the night. We observed a peculiar mountain in the distance to the south, of a conical form, isolated, and entirely covered with snow.

May 20. We now entered into a better channel, and pursued our course with little interruption for sixteen miles, through a clayey country of peculiar character, and nearly destitute of vegetation. At night we encamped on a very large island, covered with tall trees, many of which were new to us. We remained at this spot for five days to make some repairs in the piroque.

During our sojourn here an incident of note occurred. The banks of the Missouri in this neighborhood are precipitous, and formed of a peculiar blue clay, which becomes excessively slippery after rain. The cliffs, from the bed of the stream back to the distance of a hundred yards, or thereabouts, form a succession of steep terraces of this clay, intersected in numerous directions by deep and narrow ravines, so sharply worn by the action of water at some remote period of time as to have the appearance of artificial channels. The mouths of these ravines, where they debouche upon the river, have a very remarkable appearance, and look from the opposite bank, by moonlight, like gigantic columns standing erect upon the shore. To an observer from the uppermost terrace the whole descent towards the stream has an indescribably chaotic and dreary air. No vegetation of any kind is seen.

John Greely, the Prophet, the interpreter Jules, and myself started out after breakfast one morning to ascend to the topmost terrace on the south shore for the purpose of looking around us; in short, to see what could be seen. With great labor, and by using

scrupulous caution, we succeeded in reaching the level grounds at the summit opposite our encampment. The prairie here differs from the general character of that kind of land in being thickly overgrown for many miles back with cottonwood, rose-bushes, red willow, and broad-leaved willow; the soil being unsteady, and at times swampy, like that of the ordinary low grounds; it consists of a black-looking loam, one third sand, and when a handful of it is thrown into water, it dissolves in the manner of sugar, with strong bubbles. In several spots we observed deep incrustations of common salt, some of which we collected and used.

Upon reaching these level grounds we all sat down to rest, and had scarcely done so when we were alarmed by a loud growl immediately in our rear, proceeding from the thick underwood. We started to our feet at once in great terror, for we had left our rifles at the island, that we might be unencumbered in the scramble up the cliffs, and the only arms we had were pistols and knives. We had scarcely time to say a word to each other before two enormous brown bears (the first we had yet encountered during the voyage) came rushing at us open-mouthed from a clump of rose-bushes. These animals are much dreaded by the Indians, and with reason, for they are indeed formidable creatures, possessing prodigious strength, with untamable ferocity, and the most wonderful tenacity of life. There is scarcely any way of killing them by a bullet, unless the shot be through the brains, and these are defended by two large muscles covering the side of the forehead, as well as by a projection of a thick frontal bone. They have been known to live for days with half a dozen balls through the lungs, and even with very severe injuries in the heart. So far we had never met with

a brown bear, although often with its tracks in the mud or sand, and these we had seen nearly a foot in length, exclusive of the claws, and full eight inches in width.

What to do was now the question. To stand and fight, with such weapons as we possessed, was madness; and it was folly to think of escape by flight in the direction of the prairie; for not only were the bears running towards us from that quarter, but, at a very short distance back from the cliffs, the underwood of brier-bushes, dwarf willow, etc., was so thick that we could not have made our way through it at all, and if we kept our course along the river between the underwood and the top of the cliff, the animals would catch us in an instant; for as the ground was boggy we could make no progress upon it, while the large flat foot of the bear would enable him to travel with ease. It seemed as if these reflections (which it takes some time to embody in words) flashed all of them through the minds of all of us in an instant; for every man sprang at once to the cliffs, without sufficiently thinking of the hazard that lay there.

The first descent was some thirty or forty feet, and not very precipitous; the clay here also partook in a slight degree of the loam of the upper soil; so that we scrambled down with no great difficulty to the first terrace, the bears plunging after us with headlong fury. Arrived here, we had not a moment for hesitation. There was nothing left for us now but to encounter the enraged beasts upon the narrow platform where we stood, or to go over the second precipice. This was nearly perpendicular, sixty or seventy feet deep, and composed entirely of the blue clay which was now saturated with late rains, and as slippery as glass itself. The Canadian, frightened out of his senses,

leaped to the edge at once, slid with the greatest velocity down the cliff, and was hurled over the third descent by the impetus of his course. We then lost sight of him, and of course supposed him killed; for we could have no doubt that his terrific slide would be continued from precipice to precipice until it terminated with a plunge over the last into the river, a fall of more than a hundred and fifty feet.

Had Jules not gone in this way it is more than probable that we should all have decided, in our extremity, upon attempting the descent; but his fate caused us to waver, and in the meantime the monsters were upon us. This was the first time in all my life I had ever been brought to close quarters with a wild animal of any strength or ferocity, and I have no scruple to acknowledge that my nerves were completely unstrung. For some moments I felt as if about to swoon, but a loud scream from Greely, who had been seized by the foremost bear, had the effect of arousing me to exertion, and when once fairly aroused I experienced a kind of wild and savage pleasure from the conflict.

One of the beasts, upon reaching the narrow ledge where we stood, had made an immediate rush at Greely, and had borne him to the earth, where he stood over him, holding him with his huge teeth lodged in the breast of his overcoat, which, by the greatest good fortune, he had worn, the wind being chilly. The other, rolling rather than scrambling down the cliff, was under so much headway when he reached our station that he could not stop himself until the one half of his body hung over the precipice; he staggered in a sidelong manner, and his right legs went over while he held on in an awkward way with his two left. While thus situated he seized Wormley by the heel with his mouth, and for an instant I

feared the worst, for in his effort to free himself from the grasp, the terrified struggler aided the bear to regain his footing. While I stood helpless, as above described, through terror, and watching the event without ability to render the slightest aid, the shoe and moccasin of Wormley were torn off in the grasp of the animal, who now tumbled headlong down to the next terrace, but stopped himself, by means of his huge claws, from sliding farther. It was now that Greely screamed for aid, and the Prophet and myself rushed to his assistance. We both fired our pistols at the bear's head; and my own ball, I am sure, must have gone through some portion of his skull, for I held the weapon close to his ear. He seemed more angry, however, than hurt; the only good effect of the discharge was in his quitting his hold of Greely (who had sustained no injury) and making at us. We had nothing but our knives to depend upon, and even the refuge of the terrace below was cut off from us by the presence of another bear there. We had our backs to the cliff, and were preparing for a deadly contest, not dreaming of help from Greely (whom we supposed mortally injured) when we heard a shot, and the huge beast fell at our feet, just when we felt his hot and horribly fetid breath in our faces. Our deliverer, who had fought many a bear in his lifetime, had put his pistol deliberately to the eye of the monster, and the contents had entered the brain.

Looking now downwards, we discovered the fallen bruin making ineffectual efforts to scramble up to us, the soft clay yielding to his claws, and he fell repeatedly and heavily. We tried him with several shots, but did no harm, and resolved to leave him where he was for the crows. I do not see how he could ever have made his escape from the spot. We crawled

along the ledge on which we stood, for nearly half a mile before we found a practicable path to the prairie above us, and did not get into camp until late in the night. Jules was there all alive, but cruelly bruised; so much so, indeed, that he had been unable to give any intelligible account of his accident or of our whereabouts. He had lodged in one of the ravines upon the third terrace, and had made his way down its bed to the river shore.

THE SYSTEM

OF

DOCTOR TARR AND PROFESSOR FETHER

DURING the autumn of 18—, while on a tour through the extreme Southern provinces of France, my route led me within a few miles of a certain *Maison de Santé*, or private Mad House, about which I had heard much, in Paris, from my medical friends. As I had never visited a place of the kind, I thought the opportunity too good to be lost; and so proposed to my travelling companion, (a gentleman with whom I had made casual acquaintance a few days before,) that we should turn aside, for an hour or so, and look through the establishment. To this he objected—pleading haste, in the first place, and, in the second, a very usual horror at the sight of a lunatic. He begged me, however, not to let any mere courtesy towards himself interfere with the gratification of my curiosity, and said that he would ride on leisurely, so that I might overtake him during the day, or, at all events, during the next. As he bade me good-by, I bethought me that there might be some difficulty in obtaining access to the premises, and mentioned my fears on this point. He replied that, in fact, unless I had personal knowledge of the superintendent, Monsieur Maillard, or some credential in the way of a letter, a difficulty might be found to exist, as the regulations of these private mad-houses were more rigid than the public hospital laws. For himself, he added, he

had, some years since, made the acquaintance of Maillard, and would so far assist me as to ride up to the door and introduce me; although his feelings on the subject of lunacy would not permit of his entering the house.

I thanked him, and, turning from the main-road, we entered a grass-grown by-path, which, in half an hour, nearly lost itself in a dense forest, clothing the base of a mountain. Through this dark and gloomy wood we rode some two miles, when the *Maison de Santé* came in view. It was a fantastic *chateau*, much dilapidated, and indeed scarcely tenatable through age and neglect. Its aspect inspired me with absolute dread, and, checking my horse, I half resolved to turn back. I soon, however, grew ashamed of my weakness, and proceeded.

As we rode up to the gate-way, I perceived it slightly open, and the visage of a man peering through. In an instant afterward, this man came forth, accosted my companion by name, shook him cordially by the hand, and begged him to alight. It was Monsieur Maillard himself. He was a portly, fine-looking gentleman of the old school, with a polished manner, and a certain air of gravity, dignity, and authority which was very impressive.

My friend, having presented me, mentioned my desire to inspect the establishment, and received Monsieur Maillard's assurance that he would show me all attention, now took leave, and I saw him no more.

When he had gone, the superintendent ushered me into a small and exceedingly neat parlor, containing among other indications of refined taste, many books, drawings, pots of flowers, and musical instruments. A cheerful fire blazed upon the hearth. At a piano, singing an aria from Bellini, sat a young

and very beautiful woman, who, at my entrance, paused in her song, and received me with graceful courtesy. Her voice was low, and her whole manner subdued. I thought, too, that I perceived the traces of sorrow in her countenance, which was excessively, although to my taste, not unpleasingly pale. She was attired in deep mourning, and excited in my bosom a feeling of mingled respect, interest, and admiration.

I had heard, at Paris, that the institution of Monsieur Maillard was managed upon what is vulgarly termed the "system of soothing"—that all punishments were avoided—that even confinement was seldom resorted to—that the patients, while secretly watched, were left much apparent liberty, and that most of them were permitted to roam about the house and grounds, in the ordinary apparel of persons in right mind.

Keeping these impressions in view, I was cautious in what I said before the young lady; for I could not be sure that she was sane; and, in fact, there was a certain restless brilliancy about her eyes which half led me to imagine she was not. I confined my remarks, therefore, to general topics, and to such as I thought would not be displeasing or exciting even to a lunatic. She replied in a perfectly rational manner to all that I said; and even her original observations were marked with the soundest good sense; but a long acquaintance with the metaphysics of *mania*, had taught me to put no faith in such evidence of sanity, and I continued to practice, throughout the interview, the caution with which I commenced it.

Presently a smart footman in livery brought in a tray with fruit, wine, and other refreshments, of which I partook, the lady soon afterwards leaving

the room. As she departed I turned my eyes in an inquiring manner towards my host.

"No," he said, "oh, no—a member of my family—my niece, and a most accomplished woman."

"I beg a thousand pardons for the suspicion," I replied, "but of course you will know how to excuse me. The excellent administration of your affairs here is well understood in Paris, and I thought it just possible, you know—"

"Yes, yes—say no more—or rather it is myself who should thank you for the commendable prudence you have displayed. We seldom find so much of forethought in young men; and, more than once, some unhappy *contre-temps* has occurred in consequence of thoughtlessness on the part of our visitors. While my former system was in operation, and my patients were permitted the privilege of roaming to and fro at will, they were often aroused to a dangerous frenzy by injudicious persons who called to inspect the house. Hence I was obliged to enforce a rigid system of exclusion; and none obtained access to the premises upon whose discretion I could not rely."

"While your *former* system was in operation!" I said, repeating his words—"do I understand you, then, to say that the 'soothing system' of which I have heard so much, is no longer in force?"

"It is now," he replied, "several weeks since we have concluded to renounce it forever."

"Indeed! you astonish me!"

"We found it, sir," he said, with a sigh, "absolutely necessary to return to the old usages. The *danger* of the soothing system was, at all times, appalling; and its advantages have been much overrated. I believe, sir, that in this house it has been given a fair trial, if ever in any. We did every

thing that rational humanity could suggest. I am sorry that you could not have paid us a visit at an earlier period, that you might have judged for yourself. But I presume you are conversant with the soothing practice—with its details.”

“Not altogether. What I have heard has been at third or fourth hand.”

“I may state the system then, in general terms, as one in which the patients were *menagés*, humored. We contradicted *no* fancies which entered the brains of the mad. On the contrary, we not only indulged but encouraged them; and many of our most permanent cures have been thus effected. There is no argument which so touches the feeble reason of the madman as the *reductio ad absurdum*. We have had men, for example, who fancied themselves chickens. The cure was, to insist upon the thing as a fact—to accuse the patient of stupidity in not sufficiently perceiving it to be a fact—and thus to refuse him any other diet for a week than that which properly appertains to a chicken. In this manner a little corn and gravel were made to perform wonders.”

“But was this species of acquiescence all?”

“By no means. We put much faith in amusements of a simple kind, such as music, dancing, gymnastic exercises generally, cards, certain classes of books, and so forth. We affected to treat each individual as if for some ordinary physical disorder; and the word ‘lunacy’ was never employed. A great point was to set each lunatic to guard the actions of all the others. To repose confidence in the understanding or discretion of a madman, is to gain him body and soul. In this way we were enabled to dispense with an expensive body of keepers.”

“And you had no punishments of any kind?”

“None.”

"And you never confined your patients?"

"Very rarely. Now and then, the malady of some individual growing to a crisis, or taking a sudden turn of fury, we conveyed him to a secret cell, lest his disorder should infect the rest, and there kept him until we could dismiss him to his friends—for with the raging maniac we have nothing to do. He is usually removed to the public hospitals."

"And you have now changed all this—and you think for the better?"

"Decidedly. The system had its disadvantages, and even its dangers. It is now, happily, exploded throughout all the *Maisons de Santé* of France."

"I am very much surprised," I said, "at what you tell me; for I made sure that, at this moment, no other method of treatment for mania existed in any portion of the country."

"You are young yet, my friend," replied my host, "but the time will arrive when you will learn to judge for yourself of what is going on in the world, without trusting to the gossip of others. Believe nothing you hear, and only one half that you see. Now, about our *Maisons de Santé*, it is clear that some ignoramus has misled you. After dinner, however, when you have sufficiently recovered from the fatigue of your ride, I will be happy to take you over the house, and introduce to you a system which, in my opinion, and in that of every one who has witnessed its operation, is incomparably the most effectual as yet devised."

"Your own?" I inquired—"one of your own invention?"

"I am proud," he replied, "to acknowledge that it is—at least in some measure."

In this manner I conversed with Monsieur Maillard

for an hour or two, during which he showed me the gardens and conservatories of the place.

"I cannot let you see my patients," he said, "just at present. To a sensitive mind there is always more or less of the shocking in such exhibitions; and I do not wish to spoil your appetite for dinner. We will dine. I can give you some veal *à la Menehoult*, with cauliflowers in *velouté* sauce—after that a glass of *Clos de Vougeôt*—then your nerves will be sufficiently steadied."

At six, dinner was announced; and my host conducted me into a large *salle à manger*, where a very numerous company were assembled—twenty-five or thirty in all. They were, apparently, people of rank—certainly of high breeding—although their habiliments, I thought, were extravagantly rich, partaking somewhat too much of the ostentatious finery of the *vielle cour*. I noticed that at least two-thirds of these guests were ladies; and some of the latter were by no means accoutred in what a Parisian would consider good taste at the present day. Many females, for example, whose age could not have been less than seventy, were bedecked with a profusion of jewelry, such as rings, bracelets, and ear-rings, and wore their bosoms and arms shamefully bare. I observed, too, that very few of the dresses were well made—or, at least, that very few of them fitted the wearers. In looking about, I discovered the interesting girl to whom Monsieur Maillard had presented me in the parlor; but my surprise was great to see her wearing a hoop and farthingale, with high-heeled shoes, and a dirty cap of Brussels lace, so much too large for her that it gave her face a ridiculously diminutive expression. When I had first seen her, she was attired, most becomingly, in deep mourning. There was an air of oddity, in short,

from whatever it was possible to find a fault. There were several active women in attendance, and upon a large table, at the further end of the apartment, were several rows of little people with bellows, files, wrenches, and a brace. These little men, of the very mean, or inferior, cutting the rope by an inferior variety of means, which were pointed out for notice, and which appeared to afford much amusement to all present, with the exception of myself.

From the whole, I could not help thinking that there was much of the *l'oeuvre des autres* every thing I saw—that the world is made up of all kinds of persons, with all modes of thought, and all sorts of conventional customs. I had travelled, viz., so much as to be quite as adept in the art of observing, as I think my way was really at the right hand of my hand, and having no standard opposite the position in the great crowd as before me.

The conversation at the same time was spirited and general. The ladies as usual uttered a great deal. I was found that nearly all the company were well educated, and my host was a world of good himself. He seemed quite willing to speak of his position as understood in a library as being a kind of library, the topic of history was much to him, and he was a very good man. A great many curious remarks were told, he was very much to be trusted in the matter of the patient. "We had a fellow here once," said a tall little gentleman, who was my guide—"a fellow that faced himself a traitor; and by the way, it is not especially singular how often this particular condition had occurred the train of the journey. There is scarcely an ancient nation in France which cannot supply a Roman weapon. Our gentleman was a Britannia-

ware tea-pot, and was careful to polish himself every morning with buckskin and whiting."

"And then," said a tall man, just opposite, "we had here, not long ago, a person who had taken it into his head that he was a donkey—which, allegorically speaking, you will say, was quite true. He was a troublesome patient; and we had much ado to keep him within bounds. For a long time he would eat nothing but thistles; but of this idea we soon cured him by insisting upon his eating nothing else. Then he was perpetually kicking out his heels—so—so—"

"Mr. De Kock! I will thank you to behave yourself!" here interrupted an old lady, who sat next to the speaker. Please keep your feet to yourself! You have spoiled my brocade! Is it necessary, pray, to illustrate a remark in so practical a style? Our friend, here, can surely comprehend you without all this. Upon my word, you are nearly as great a donkey as the poor unfortunate imagined himself. Your acting is very natural, as I live."

"*Mille pardons! Ma'mselle!*" replied Monsieur De Kock, thus addressed—"a thousand pardons! I had no intention of offending. Ma'mselle Laplace—Monsieur De Kock will do himself the honor of taking wine with you."

Here Monsieur De Kock bowed low, kissed his hand with much ceremony, and took wine with Ma'mselle Laplace.

"Allow me, *mon ami*," now said Monsieur Mailard, addressing myself, "allow me to send you a morsel of this veal *a la St. Menehoult*—you will find it particularly fine."

At this instant three sturdy waiters had just succeeded in depositing safely upon the table an enormous dish, or trencher, containing what I

supposed to be the "*Monstrum, horrendum, informe, ingens, cui lumen ademptum.*" A closer scrutiny assured me, however, that it was only a small calf roasted whole, and set upon its knees, with an apple in its mouth, as is the English fashion of dressing a hare.

"Thank you, no," I replied; "to say the truth, I am not particularly partial to veal *a la St.*—what is it?—for I do not find that it altogether agrees with me. I will change my plate, however, and try some of the rabbit."

There were several side-dishes on the table, containing what appeared to be the ordinary French rabbit—a very delicious *Morceau*, which I can recommend.

"Pierre," cried the host, "change this gentleman's plate, and give him a side-piece of this rabbit *au-chât.*"

"This what?" said I.

"This rabbit *au-chât.*"

"Why, thank you—upon second thoughts, no. I will just help myself to some of the ham."

There is no knowing what one eats, thought I to myself, at the tables of these people of the province. I will have none of their rabbit *au-chât*—and, for the matter of that, none of their *cat-au-rabbit* either.

"And then," said a cadaverous-looking personage, near the foot of the table, taking up the thread of the conversation where it had been broken off—"and then, among other oddities, we had a patient, once upon a time, who very pertinaciously maintained himself to be a Cordova cheese, and went about, with a knife in his hand, soliciting his friends to try a small slice from the middle of his leg."

"He was a great fool, beyond doubt," interposed

some one, "but not to be compared with a certain individual whom we all know, with the exception of this strange gentleman. I mean the man who took himself for a bottle of champagne, and always went off with a pop and a fizz, in this fashion."

Here the speaker, very rudely, as I thought, put his right thumb in his left cheek, withdrew it with a sound resembling the popping of a cork, and then, by a dexterous movement of the tongue upon the teeth, created a sharp hissing and fizzing, which lasted for several minutes, in imitation of the frothing of champagne. This behavior, I saw plainly, was not very pleasing to Monsieur Maillard; but that gentleman said nothing, and the conversation was resumed by a very lean little man in a big wig.

"And then there was an ignoramus," said he, "who mistook himself for a frog; which, by the way, he resembled in no little degree. I wish you could have seen him, sir,"—here the speaker addressed myself—"it would have done your heart good to see the natural airs that he put on. Sir, if that man was *not* a frog, I can only observe that it is a pity that he was not. His croak thus—o-o-o-o-gh—o-o-o-o-gh! was the finest note in the world—B flat; and when he put his elbows upon the table thus—after taking a glass or two of wine—and distended his mouth, thus, and rolled up his eyes, thus, and winked them with excessive rapidity, thus, why then, sir, I take it upon myself to say, positively, that you would have been lost in admiration of the genius of the man."

"I have no doubt of it," I said.

"And then," said somebody else, "then there was Petit Gaillard, who thought himself a pinch of snuff, and was truly distressed because he could not take himself between his own finger and thumb."

"And then there was Jules Desoulières, who was a very singular genius, indeed, and went mad with the idea that he was a pumpkin. He persecuted the cook to make him up into pies—a thing which the cook indignantly refused to do. For my part, I am by no means sure that a pumpkin pie *a la Desouléries*, would not have been very capital eating, indeed!"

"You astonish me!" said I; and I looked inquisitively at Monsieur Maillard.

"Ha! ha! ha!" said that gentleman—"he! he! he!—hi! hi! hi!—ho! ho! ho!—hu! hu! hu!—very good indeed! You must not be astonished, *mon ami*; our friend here is a wit—a *drôle*—you must not understand him to the letter."

"And then," said some other one of the party, "then there was Bouffon Le Grand—another extraordinary personage in his way. He grew deranged through love, and fancied himself possessed of two heads. One of these he maintained to be the head of Cicero; the other he imagined a composite one, being Demosthenes' from the top of the forehead to the mouth, and Lord Brougham from the mouth to the chin. It is not impossible that he was wrong; but he would have convinced you of his being in the right; for he was a man of great eloquence. He had an absolute passion for oratory, and could not refrain from display. For example, he used to leap upon the dinner-table thus, and—and—"

Here a friend, at the side of the speaker, put a hand upon his shoulder, and whispered a few words in his ear; upon which he ceased talking with great suddenness, and sank back within his chair.

"And then," said the friend, who had whispered, "there was Boullard, the tee-totum. I call him the tee-totum, because, in fact, he was seized with

the droll, but not altogether irrational crotchet, that he had been converted into a tee-totum. You would have roared with laughter to see him spin. He would turn around upon one heel by the hour, in this manner—so—”

Here the friend whom he had just interrupted by a whisper, performed an exactly similar office for himself.

“But then,” cried an old lady, at the top of her voice, “your Monsieur Boullard was a madman, and a very silly madman at best; for who, allow me to ask you, ever heard of a human tee-totum? The thing is absurd. Madame Joyeuse was a more sensible person, as you know. She had a crotchet, but it was instinct with common sense, and gave pleasure to all who had the honor of her acquaintance. She found, upon mature deliberation, that, by some accident, she had been turned into a chicken-cock; but, as such, she behaved with propriety. She flapped her wings with prodigious effect—so—so—so—and, as for her crow, it was delicious! Cock-a-doodle-doo! — cock-a-doodle-doo — cock-a-doodle-de-doo-doo-dooo-do-o-o-o-o-o-o!”

“Madame Joyeuse, I will thank you to behave yourself!” here interrupted our host, very angrily. “You can either conduct yourself as a lady should do, or you can quit the table forthwith—take your choice.”

The lady, (whom I was much astonished to hear addressed as Madame Joyeuse, after the description of Madame Joyeuse she had just given,) blushed up to the eye-brows, and seemed exceedingly abashed at the reproof. She hung down her head, and said not a syllable in reply. But another and younger lady resumed the theme. It was my beautiful girl of the little parlor!

"Oh, Madame Joyeuse *was* a fool!" she exclaimed; "but there was really much sound sense, after all, in the opinion of Eugénie Salsafette. She was a very beautiful and painfully modest young lady, who thought the ordinary mode of habiliment indecent, and wished to dress herself, always, by getting outside, instead of inside of her clothes. It is a thing very easily done, after all. You have only to do so—and then so—so—so—and then so—so—so—and then—"

"Mon dieu! Ma'mselle Salsafette!" here cried a dozen voices at once. "What *are* you about?—forbear!—that is sufficient!—we see, very plainly, how it is done!—hold! hold!" and several persons were already leaping from their seats to withhold Ma'mselle Salsafette from putting herself upon a par with the Medicean Venus, when the point was very effectually and suddenly accomplished by a series of loud screams, or yells, from some portion of the main body of the chateau.

My nerves were very much effected, indeed, by these yells; but the rest of the company I really pitied. I never saw any set of reasonable people so thoroughly frightened in my life. They all grew as pale as so many corpses, and, shrinking within their seats, sat quivering and gibbering with terror, and listening for a repetition of the sound. It came again—louder and seemingly nearer—and then a third time *very* loud, and then a fourth time with a vigor evidently diminished. At this apparent dying away of the noise, the spirits of the company were immediately regained, and all was life and anecdote as before. I now ventured to inquire the cause of the disturbance.

"A mere *bagatelle*," said Monsieur Maillard. "We are used to these things, and care really very little

about them. The lunatics, every now and then, get up a howl in concert; one starting another, as is sometimes the case with a bevy of dogs at night. It occasionally happens, however, that the *concerto* yells are succeeded by a simultaneous effort at breaking loose; when, of course, some little danger is to be apprehended."

"And how many have you in charge?"

"At present, we have not more than ten, altogether."

"Principally females, I presume?"

"Oh, no—every one of them men, and stout fellows, too, I can tell you."

"Indeed! I have always understood that the majority of lunatics were of the gentler sex."

"It is generally so, but not always. Some time ago, there were about twenty-seven patients here; and, of that number, no less than eighteen were women; but, lately, matters have changed very much, as you see."

"Yes—have changed very much, as you see," here interrupted the gentleman who had broken the shins of Ma'mselle Laplace.

"Yes—have changed very much as you see!" chimed in the whole company at once.

"Hold your tongues, every one of you!" said my host, in a great rage. Whereupon the whole company maintained a dead silence for nearly a minute. As for one lady, she obeyed Monsieur Maillard to the letter, and thrusting out her tongue, which was an excessively long one, held it very resignedly, with both hands, until the end of the entertainment.

"And this gentlewoman," said I, to Monsieur Maillard, bending over and addressing him in a whisper—"this good lady who has just spoken, and

who gives us the cock-a-doodle-de-doo—she, I presume, is harmless—quite harmless, eh?”

“Harmless!” ejaculated he, in unfeigned surprise, “why—why what can you mean?”

“Only slightly touched?” said I, touching my head. “I take it for granted that she is not particularly—not dangerously affected, eh?”

“*Mon Dieu!* what *is* it you imagine? This lady, my particular old friend, Madame Joyeuse, is as absolutely sane as myself. She has her little eccentricities, to be sure—but then, you know, all old women—all *very* old women are more or less eccentric!”

“To be sure,” said I—“to be sure—and then the rest of these ladies and gentlemen—”

“Are my friends and keepers,” interrupted Monsieur Maillard, drawing himself up with *hauteur*—“my very good friends and assistants.”

“What! all of them?” I asked—“the women and all?”

“Assuredly,” he said—“we could not do at all without the women; they are the best lunatic nurses in the world; they have a way of their own, you know; their bright eyes have a marvellous effect;—something like the fascination of the snake, you know.”

“To be sure,” said I—“to be sure! They behave a little odd, eh?—they are a little *queer*, eh?—don’t you think so?”

“Odd!—queer!—why, do you *really* think so? We are not very prudish, to be sure, here in the South—do pretty much as we please—enjoy life, and all that sort of thing, you know—”

“To be sure,” said I—“to be sure.”

“And then, perhaps, this *Clos de Vougeôt* is a

little heady, you know—a little strong—you understand, eh?”

“To be sure,” said I—“to be sure. By-the-by, monsieur, did I understand you to say that the system you have adopted, in place of the celebrated soothing system, was one of very rigorous severity?”

“By no means. Our confinement is necessarily close; but the treatment—the medical treatment, I mean—is rather agreeable to the patients than otherwise.”

“And the new system is one of your own invention?”

“Not altogether. Some portions of it are referable to Professor Tarr, of whom you have, necessarily, heard; and, again, there are modifications in my plan which I am happy to acknowledge as belonging of right to the celebrated Fether, with whom, if I mistake not, you have the honor of an intimate acquaintance.”

“I am quite ashamed to confess,” I replied, “that I have never even heard the name of either gentleman before.”

“Good Heavens!” ejaculated my host, drawing back his chair abruptly, and uplifting his hands. “I surely do not hear you aright! You did not intend to say, eh? that you had never *heard* either of the learned Doctor Tarr, or of the celebrated Professor Fether?”

“I am forced to acknowledge my ignorance,” I replied; “but the truth should be held inviolate above all things. Nevertheless, I feel humbled to the dust, not to be acquainted with the works of these, no doubt, extraordinary men. I will seek out their writings forthwith, and peruse them with deliberate care. Monsieur Maillard, you have really—I must confess it—you have *really*—made me ashamed of myself!”

And this was the fact.

"Say no more, my good young friend," he said kindly, pressing my hand—"join me now in a glass of Sauterne."

We drank. The company followed our example, without stint. They chatted—they jested—they laughed—they perpetrated a thousand absurdities—the fiddles shrieked—the drum row-de-dowed—the trombones bellowed like so many brazen bulls of Phalaris—and the whole scene, growing gradually worse and worse, as the wines gained the ascendancy, became at length a sort of Pandemonium *in petto*. In the meantime, Monsieur Maillard and myself, with some bottles of Sauterne and Vougeôt between us continued our conversation at the top of the voice. A word spoken in an ordinary key stood no more chance of being heard than the voice of a fish from the bottom of Niagara Falls.

"And, sir," said I, screaming in his ear, "you mentioned something before dinner, about the danger incurred in the old system of soothing. How is that?"

"Yes," he replied, "there was, occasionally, very great danger, indeed. There is no accounting for the caprices of madmen; and, in my opinion, as well as in that of Doctor Tarr and Professor Fether it is *never* safe to permit them to run at large unattended. A lunatic may be 'soothed,' as it is called, for a time, but, in the end, he is very apt to become obstreperous. His cunning, too, is proverbial, and great. If he has a project in view, he conceals his design with a marvellous wisdom; and the dexterity with which he counterfeits sanity, presents, to the metaphysican, one of the most singular problems in the study of mind. When a madman appears *thoroughly* sane, indeed, it is high time to put him in a straight jacket."

"But the *danger*, my dear sir, of which you were speaking—in your own experience—during your control of this house—have you had practical reason to think liberty hazardous, in the case of a lunatic?"

"Here?—in my own experience?—why, I may say, yes. For example:—no *very* long while ago, a singular circumstance occurred in this very house. The 'soothing system,' you know, was then in operation, and the patients were at large. They behaved remarkably well—especially so—any one of sense might have known that some devilish scheme was brewing from that particular fact, that the fellows behaved so *remarkably* well. And, sure enough, one fine morning the keepers found themselves pinioned hand and foot, and thrown into the cells, where they were attended, as if *they* were the lunatics, by the lunatics themselves, who had usurped the offices of the keepers."

"You don't tell me so! I never heard of anything so absurd in my life!"

"Fact—it all came to pass by means of a stupid fellow—a lunatic—who, by some means, had taken it into his head that he had invented a better system of government than any ever heard of before—of lunatic government, I mean. He wished to give his invention a trial, I suppose—and so he persuaded the rest of the patients to join him in a conspiracy for the overthrow of the reigning powers."

"And he really succeeded?"

"No doubt of it. The keepers and kept were soon made to exchange places. Not that exactly either—for the madmen had been free, but the keepers were shut up in cells forthwith, and treated, I am sorry to say, in a very cavalier manner."

"But I presume a counter revolution was soon

effected. This condition of things could not have long existed. The country people in the neighborhood—visitors coming to see the establishment—would have given the alarm.”

“There you are out. The head rebel was too cunning for that. He admitted no visitors at all—with the exception, one day, of a very stupid-looking young gentleman of whom he had no reason to be afraid. He let him see the place—just by way of variety—to have a little fun with him. As soon as he had gammoned him sufficiently, he let him out, and sent him about his business.”

“And *how* long, then, did the madman reign?”

“Oh, a very long time, indeed—a month certainly—how much longer I can’t precisely say. In the meantime, the lunatics had a jolly season of it—that you may swear. They doffed their own shabby clothes, and made free with the family wardrobe and jewels. The cellars of the *chateau* were well stocked with wine; and these madmen are just the devils that know how to drink it. They lived well, I can tell you.”

“And the treatment—what was the particular species of treatment which the leader of the rebels put into operation?”

“Why, as for that, a madman is not necessarily a fool, as I have already observed; and it is my honest opinion that his treatment was a much better treatment than that which it superseded. It was a very capital system indeed—simple—neat—no trouble at all—in fact it was delicious—it was—”

Here my host’s observations were cut short by another series of yells, of the same character as those which had previously disconcerted us. This time, however, they seemed to proceed from persons rapidly approaching.

"Gracious Heavens!" I ejaculated—"the lunatics have most undoubtedly broken loose."

"I very much fear it is so," replied Monsieur Maillard, now becoming excessively pale. He had scarcely finished the sentence, before loud shouts and imprecations were heard beneath the windows; and, immediately afterward, it became evident that some persons outside were endeavoring to gain entrance into the room. The door was beaten with what appeared to be a sledge-hammer, and the shutters were wrenched and shaken with prodigious violence.

A scene of the most terrible confusion ensued. Monsieur Maillard, to my excessive astonishment, threw himself under the sideboard. I had expected more resolution at his hands. The members of the orchestra, who, for the last fifteen minutes, had been seemingly too much intoxicated to do duty, now sprang all at once to their feet and to their instruments, and, scrambling upon their table, broke out, with one accord, into "Yankee Doodle," which they performed, if not exactly in tune, at least with an energy superhuman, during the whole of the uproar.

Meantime, upon the main dining-table, among the bottles and glasses, leaped the gentleman, who, with such difficulty, had been restrained from leaping there before. As soon as he fairly settled himself, he commenced an oration, which, no doubt, was a very capital one, if it could only have been heard. At the same moment, the man with the tee-totum predilections, set himself to spinning around the apartment, with immense energy, and with arms outstretched at right angles with his body; so that he had all the air of a tee-totum in fact, and knocked every body down that happened to get in his way. And

now, too, hearing an incredible popping and fizzing of champagne, I discovered at length, that it proceeded from the person who performed the bottle of that delicate drink during dinner. And then, again, the frog-man croaked away as if the salvation of his soul depended upon every note that he uttered. And, in the midst of all this, the continuous braying of the donkey arose over all. As for my old friend, Madame Joyeuse, I really could have wept for the poor lady, she appeared so terribly perplexed. All she did, however, was to stand up in a corner, by the fire-place, and sing out incessantly, at the top of her voice, "Cock-a-doodle-de-dooooooh!"

And now came the climax—the catastrophe of the drama. As no resistance, beyond whooping and yelling and cock-a-doodleing, was offered to the encroachments of the party without, the ten windows were very speedily, and almost simultaneously, broken in. But I shall never forget the emotions of wonder and horror with which I gazed, when, leaping through these windows, and down among us *pêle-mêle*, fighting, stamping, scratching, and howling, there rushed a perfect army of what I took to be Chimpanzees, Ourang-Outangs, or big black baboons of the Cape of Good Hope.

I received a terrible beating—after which I rolled under a sofa and lay still. After lying there some fifteen minutes, however, during which time I listened with all my ears to what was going on in the room, I came to some satisfactory *dénouement* of this tragedy. Monsieur Maillard, it appeared, in giving me the account of the lunatic who had excited his fellows to rebellion, had been merely relating his own exploits. This gentleman had, indeed, some two or three years before, been the superintendent of the establishment; but grew crazy him-

self, and so became a patient. This fact was unknown to the travelling companion who introduced me. The keepers, ten in number, having been suddenly overpowered, were first well tarred, then carefully feathered, and then shut up in underground cells. They had been so imprisoned for more than a month, during which period Monsieur Maillard had generously allowed them not only the tar and feathers (which constituted his "system"), but some bread and abundance of water. The latter was pumped on them daily. At length, one escaping through a sewer, gave freedom to all the rest.

The "soothing system," with important modifications, has been resumed at the *chateau*; yet I cannot help agreeing with Monsieur Maillard, that his own "treatment" was a very capital one of its kind. As he justly observed, it was "simple—neat—and gave no trouble at all—not the least."

I have only to add that, although I have searched every library in Europe for the works of Doctor *Tarr* and Professor *Fether*, I have, up to the present day, utterly failed in my endeavors at procuring an edition.

THE LITERARY LIFE OF THINGUM BOB, ESQ.

LATE EDITOR OF THE "GOOSETHERUMFOODLE."

BY HIMSELF

I AM now growing in years, and—since I understand that Shakespeare and Mr. Emmons are deceased—it is not impossible that I may even die. It has occurred to me, therefore, that I may as well retire from the field of Letters and repose upon my laurels. But I am ambitious of signalizing my abdication of the literary sceptre by some important bequest to posterity; and, perhaps, I cannot do a better thing than just pen for it an account of my earlier career. My name, indeed, has been so long and so constantly before the public eye, that I am not only willing to admit the naturalness of the interest which it has everywhere excited, but ready to satisfy the extreme curiosity which it has inspired. In fact, it is no more than the duty of him who achieves greatness to leave behind him, in his ascent, such landmarks as may guide others to be great. I propose, therefore, in the present paper, (which I had some idea of calling "Memoranda to serve for the Literary History of America,") to give a detail of those important, yet feeble and tottering first steps, by which, at length, I attained the high road to the pinnacle of human renown.

Of one's *very* remote ancestors it is superfluous to say much. My father, Thomas Bob, Esq., stood for many years at the summit of his profession, which was that of a merchant-barber, in the city of

Smug. His warehouse was the resort of all the principal people of the place, and especially of the editorial corps—a body which inspires all about it with profound veneration and awe. For my own part, I regarded them as gods, and drank in with avidity the rich wit and wisdom which continuously flowed from their august mouths during the process of what is styled “lather.” My first moment of positive inspiration must be dated from that ever-memorable epoch, when the brilliant conductor of the “Gad-Fly,” in the intervals of the important process just mentioned, recited aloud, before a conclave of our apprentices, an inimitable poem in honor of the “Only Genuine Oil-of-Bob,” (so called from its talented inventor, my father,) and for which effusion the editor of the “Fly” was remunerated with a regal liberality by the firm of Thomas Bob and company, merchant-barbers.

The genius of the stanzas to the “Oil-of-Bob” first breathed into me, I say, the divine *afflatus*. I resolved at once to become a great man and to commence by becoming a great poet. That very evening I fell upon my knees at the feet of my father.

“Father,” I said, “pardon me!—but I have a soul above lather. It is my firm intention to cut the shop. I would be an editor—I would be a poet—I would pen stanzas to the ‘Oil-of-Bob.’ Pardon me and aid me to be great!”

“My dear Thingum,” replied my father, (I had been christened Thingum after a wealthy relative so surnamed,) “My dear Thingum,” he said, raising me from my knees by the ears—“Thingum, my boy, you’re a trump, and take after your father in having a soul. You have an immense head, too, and it must hold a great many brains. This I have long seen, and therefore had thoughts of making

you a lawyer. The business, however, has grown ungenteel, and that of a politician don't pay. Upon the whole you judge wisely;—the trade of editor is best:—and if you can be a poet at the same time, —as most of the editors are, by the by,—why you will kill two birds with one stone. To encourage you in the beginning of things, I will allow you a garret; pen, ink and paper; a rhyming dictionary; and a copy of the 'Gad-Fly.' I suppose you would scarcely demand any more."

"I would be an ungrateful villain if I did," I replied with enthusiasm. "Your generosity is boundless. I will repay it by making you the father of a genius."

Thus ended my conference with the best of men, and immediately upon its termination, I betook myself with zeal to my poetical labors; as upon these, chiefly, I founded my hopes of ultimate elevation to the editorial chair.

In my first attempts at composition I found the stanzas to "The Oil-of-Bob" rather a draw-back than otherwise. Their splendor more dazzled than enlightened me. The contemplation of their excellence tended, naturally, to discourage me by comparison with my own abortions; so that for a long time I labored in vain. At length there came into my head one of those exquisitely original ideas which now and then *will* permeate the brain of a man of genius. It was this:—or, rather, thus was it carried into execution. From the rubbish of an old book-stall, in a very remote corner of the town, I got together several antique and altogether unknown or forgotten volumes. The bookseller sold them to me for a song. From one of these, which purported to be a translation of one Dante's "Inferno," I copied with remarkable neatness a

long passage about a man named Ugolino, who had a parcel of brats. From another which contained a good many old plays by some person whose name I forget, I extracted in the same manner, and with the same care, a great number of lines about "angels" and "ministers saying grace," and "goblins damned," and more besides of that sort. From a third, which was the composition of some blind man or other, either a Greek or a Choctaw—I cannot be at the pains of remembering every trifle exactly—I took about fifty verses beginning with "Achilles' wrath," and "grease," and something else. From a fourth, which I recollect was also the work of a blind man, I selected a page or two all about "hail" and "holy light"; and although a blind man has no business to write about light, still the verses were sufficiently good in their way.

Having made fair copies of these poems I signed every one of them "Oppodeldoc," (a fine sonorous name,) and, doing each up nicely in a separate envelope, I despatched one to each of the four principal Magazines, with a request for speedy insertion and prompt pay. The result of this well conceived plan, however, (the success of which would have saved me much trouble in after life,) served to convince me that some editors are not to be bamboozled, and gave the *coup-de-grace* (as they say in France,) to my nascent hopes, (as they say in the city of the transcendentials.)

The fact is, that each and every one of the Magazines in question, gave Mr. "Oppodeldoc" a complete using-up, in the "Monthly Notices to Correspondents." The "Hum-Drum" gave him a dressing after this fashion:

"'Oppodeldoc,' (whoever he is,) has sent us a long *tirade* concerning a bedlamite whom he styles "Ugolino," who

had a great many children that should have been all whipped and sent to bed without their suppers. The whole affair is exceedingly tame—not to say *flat*. ‘Oppodeldoc,’ (whoever he is,) is entirely devoid of imagination—and imagination, in our humble opinion, is not only the soul of POESY, but also its very heart. ‘Oppodeldoc,’ (whoever he is,) has the audacity to demand of us, for his twattle, a ‘speedy insertion and prompt pay.’ We neither insert nor purchase any stuff of the sort. There can be no doubt, however, that he would meet with a ready sale for all the balderdash he can scribble, at the office of either the ‘Rowdy-Dow,’ the ‘Lollipop,’ or the ‘Goosetherumfoodle.’”

All this, it must be acknowledged, was very severe upon “Oppodeldoc”—but the unkindest cut was putting the word POESY in small caps. In those five pre-eminent letters what a world of bitterness is there not involved!

But “Oppodeldoc” was punished with equal severity in the “Rowdy-Dow,” which spoke thus:

“We have received a most singular and insolent communication from a person (whoever he is,) signing himself ‘Oppodeldoc’—thus desecrating the greatness of the illustrious Roman Emperor so named. Accompanying the letter of ‘Oppodeldoc,’ (whoever he is,) we find sundry lines of most disgusting and unmeaning rant about ‘angels and ministers of grace’—rant such as no madman short of a Nat Lee, or an ‘Oppodeldoc,’ could possibly perpetrate. And for this trash of trash, we are modestly requested to ‘pay promptly.’ No sir—no! We pay for nothing of *that* sort. Apply to the ‘Hum-Drum,’ the ‘Lollipop,’ or the ‘Goosetherumfoodle.’ These *periodicals* will undoubtedly accept any literary offal you may send them—and as undoubtedly *promise* to pay for it.”

This was bitter indeed upon poor “Oppodeldoc”; but, in this instance, the weight of the satire falls upon the “Humdrum,” the “Lollipop,” and the “Goosetherumfoodle,” who are pungently styled

"*periodicals*"—in Italics, too—a thing that must have cut them to the heart.

Scarcely less savage was the "Lollipop," which thus discoursed:

"Some *individual*, who rejoices in the appellation 'Oppodeldoc,' (to what low uses are the names of the illustrious dead too often applied!) has enclosed us some fifty or sixty *verses* commencing after this fashion:

Achilles' wrath, to Greece the direful spring
Of woes unnumbered, &c., &c., &c., &c.

"Oppodeldoc,' (whoever he is,) is respectfully informed that there is not a printer's devil in our office who is not in the daily habit of composing better *lines*. Those of 'Oppodeldoc' will not *scan*. 'Oppodeldoc' should learn to *count*. But why he should have conceived the idea that *we*, (of all others, *we*!) would disgrace our pages with his ineffable nonsense, is utterly beyond comprehension. Why, the absurd twattle is scarcely good enough for the 'Hum-Drum,' the 'Rowdy-Dow,' the 'Goosetherumfoodle'—things that are in the practice of publishing 'Mother Goose's Melodies' as original lyrics. And 'Oppodeldoc' (whoever he is,) has even the assurance to demand *pay* for this drivel. Does 'Oppodeldoc,' (whoever he is,) know—is he aware that we could not be paid to insert it?"

As I perused this I felt myself growing gradually smaller and smaller, and when I came to the point at which the editor sneered at the poem as "*verses*," there was little more than an ounce of me left. As for "Oppodeldoc," I began to experience *compassion* for the poor fellow. But the "Goosetherumfoodle" showed, if possible, less mercy than the "Lollipop." It was the "Goosetherumfoodle" that said:

"A wretched poetaster, who signs himself 'Oppodeldoc,' is silly enough to fancy that *we* will print and *pay* for a medley of incoherent and ungrammatical bombast which he has transmitted to us, and which commences with the following most *intelligible* line:

'Hail, Holy Light! Offspring of Heaven, first born.'

"We say, 'most *intelligible*.' 'Oppodeldoc,' (whoever he is,) will be kind enough to tell us, perhaps, how 'hail' can be 'holy light.' We always regarded it as *frozen rain*. Will he inform us, also, how frozen rain can be, at one and the same time, both 'holy light,' (whatever that is,) and an 'offspring?'—which latter term, (if we understand any thing about English,) is only employed, with propriety, in reference to small babies of about six weeks old. But it is preposterous to descant upon such absurdity—although 'Oppodeldoc,' (whoever he is,) has the unparalleled effrontery to suppose that we will not only 'insert' his ignorant ravings, but (absolutely) *pay for them!*

"Now this is fine—it is rich!—and we have half a mind to punish this young scribbler for his egotism, by really publishing his effusion, *verbatim et literatim*, as he has written it. We could inflict no punishment so severe, and we *would* inflict it, but for the boredom which we should cause our readers in so doing.

"Let 'Oppodeldoc,' (whoever he is,) send any future *composition* of like character to the 'Hum-Drum,' the 'Lollipop,' or the 'Rowdy-Dow.' *They* will 'insert' it. *They* 'insert' every month just such stuff. Send it to them. WE are not to be insulted with impunity."

This made an end of me; and as for the "Hum-Drum," the "Rowdy-Dow," and the "Lollipop," I never could comprehend how they survived it. The putting *them* in the smallest possible *minion*, (that was the rub—thereby insinuating their lowness—their baseness,) while WE stood looking down upon them in gigantic capitals!—oh it was *too* bitter!—it was wormwood—it was gall. Had I been either of these periodicals I would have spared no pains to have the "Goosetherumfoodle" prosecuted. It might have been done under the Act for the "Prevention of Cruelty to Animals." As for "Oppodeldoc," (whoever he was), I had by this time lost all patience with the fellow, and sympathized with him no longer. He was a fool, beyond doubt, (who-

ever he was,) and got not a kick more than he deserved.

The result of my experiment with the old books, convinced me, in the first place, that "honesty is the best policy," and, in the second, that if I could not write better than Mr. Dante, and the two blind men, and the rest of the old set, it would, at least, be a difficult matter to write worse. I took heart, therefore, and determined to prosecute the "entirely original," (as they say on the covers of the magazines,) at whatever cost of study and pains. I again placed before my eyes, as a model, the brilliant stanzas on "The Oil-of-Bob" by the editor of the "Gad-Fly," and resolved to construct an Ode on the same sublime theme, in rivalry of what had already been done.

With my first verse I had no material difficulty. It ran thus:

"To pen an Ode upon the "Oil-of-Bob."

Having carefully looked out, however, all the legitimate rhymes to "Bob," I found it impossible to proceed. In this dilemma I had recourse to paternal aid; and, after some hours of mature thought, my father and myself thus constructed the poem:

*"To pen an Ode upon the "Oil-of-Bob"
Is all sorts of a job.*

(Signed.)

SNOB.

To be sure, this composition was of no very great length—but I "have yet to learn" as they say in the Edinburgh Review, that the mere extent of a literary work has any thing to do with its merit. As for the Quarterly cant about "sustained effort," it is impossible to see the sense of it. Upon the

whole, therefore, I was satisfied with the success of my maiden attempt, and now the only question regarded the disposal I should make of it. My father suggested that I should send it to the "Gad-Fly"—but there were two reasons which operated to prevent me from so doing. I dreaded the jealousy of the editor—and I had ascertained that he did not pay for original contributions. I therefore, after due deliberation, consigned the article to the more dignified pages of the "Lollipop," and awaited the event in anxiety, but with resignation.

In the very next published number I had the proud satisfaction of seeing my poem printed at length, as the leading article, with the following significant words, prefixed in italics and between brackets:

[We call the attention of our readers to the subjoined admirable stanza on "The Oil of Bob." We need say nothing of their sublimity, or their pathos:—it is impossible to peruse them without tears. Those who have been nauseated with a sad dose on the same august topic from the goose quill of the editor of the "Gad Fly" will do well to compare the two compositions.]

P. S. We are consumed with anxiety to probe the mystery which envelops the evident pseudonym "Snob." May we hope for a personal interview?]

All this was scarcely more than justice, but it was, I confess, rather more than I had expected:—I acknowledged this, be it observed, to the everlasting disgrace of my country and of mankind. I lost no time, however, in calling upon the editor of the "Lollipop," and had the good fortune to find this gentleman at home. He saluted me with an air of profound respect, slightly blended with a fatherly and patronizing admiration, wrought in him, no doubt, by my appearance of extreme youth and inexperience. Begging me to be seated, he

entered at once upon the subject of my poem;—but modesty will ever forbid me to repeat the thousand compliments which he lavished upon me. The eulogies of Mr. Crab, (such was the editor's name,) were, however, by no means fulsomely indiscriminate. He analyzed my composition with much freedom and great ability—not hesitating to point out a few trivial defects—a circumstance which elevated him highly in my esteem. The “Gad-Fly” was, of course, brought upon the *tapis*, and I hope never to be subjected to a criticism so searching, or to rebukes so withering, as were bestowed by Mr. Crab upon that unhappy effusion. I had been accustomed to regard the editor of the “Gad-Fly” as something superhuman; but Mr. Crab soon disabused me of that idea. He set the literary as well as the personal character of the Fly (so Mr. C. satirically designated the rival editor,) in its true light. He, the Fly, was very little better than he should be. He had written infamous things. He was a penny-a-liner, and a buffoon. He was a villain. He had composed a tragedy which set the whole country in a guffaw, and a farce which deluged the universe in tears. Besides all this, he had the impudence to pen what he meant for a lampoon upon himself, (Mr. Crab,) and the temerity to style him “an ass.” Should I at any time wish to express my opinion of Mr. Fry, the pages of the “Lollipop,” Mr. Crab assured me, were at my unlimited disposal. In the meantime, as it was very certain that I would be attacked in the Fly for my attempt at composing a rival poem on the “Oil-of-Bob,” he (Mr. Crab,) would take it upon himself to attend, pointedly, to my private and personal interests. If I were not made a man of at once, it should not be the fault of himself, (Mr. Crab.)

Mr. Crab having now paused in his discourse, (the latter portion of which I found it impossible to comprehend,) I ventured to suggest something about the remuneration which I had been taught to expect for my poem, by an announcement on the cover of the "Lollipop," declaring that it, (the "Lollipop,") "insisted upon being permitted to pay exorbitant prices for all accepted contributions;—frequently expending more money for a single brief poem than the whole annual cost of the 'Hum-Drum,' the 'Rowdy-Dow,' and the 'Goosetherum-foodle' combined."

As I mentioned the word "remuneration," Mr. Crab first opened his eyes, and then his mouth, to quite a remarkable extent; causing his personal appearance to resemble that of a highly-agitated elderly duck in the act of quacking;—and in this condition he remained, (ever and anon pressing his hands tightly to his forehead, as if in a state of desperate bewilderment) until I had nearly made an end of what I had to say.

Upon my conclusion, he sank back into his seat, as if much overcome, letting his arms fall lifelessly by his side, but keeping his mouth still rigorously open, after the fashion of the duck. While I remained in speechless astonishment at behavior so alarming, he suddenly leaped to his feet and made a rush at the bell-rope; but just as he reached this, he appeared to have altered his intention, whatever it was, for he dived under a table and immediately re-appeared with a cudgel. This he was in the act of uplifting, (for what purpose I am at a loss to imagine,) when, all at once, there came a benign smile over his features, and he sank placidly back in his chair.

"Mr. Bob," he said, (for I had sent up my card

before ascending myself,) "Mr. Bob, you are a young man, I presume—*very?*"

I assented; adding that I had not yet concluded my third lustrum.

"Ah!" he replied, "very good! I see how it is—say no more! Touching this matter of compensation, what you observe is very just: in fact it is excessively so. But ah—ah—the *first* contribution—the *first*, I say,—it is never the Magazine custom to pay for—you comprehend, eh? The truth is, we are usually the *recipients* in such case." [Mr. Crab smiled blandly as he emphasized the word "recipients."] "For the most part, we are *paid* for the insertion of a maiden attempt—especially in verse. In the second place, Mr. Bob, the Magazine rule is never to disburse what we term in France the *argent comptant*—I have no doubt you understand. In a quarter or two after publication of the article—or in a year or two—we make no objection to giving our note at nine months:—provided always that we can so arrange our affairs as to be quite certain of a 'burst up' in six. I really *do* hope, Mr. Bob, that you will look upon this explanation as satisfactory." Here Mr. Crab concluded, and the tears stood in his eyes.

Grieved to the soul at having been, however innocently, the cause of pain to so eminent and so sensitive a man, I hastened to apologize, and to reassure him, by expressing my perfect coincidence with his views, as well as my entire appreciation of the delicacy of his position. Having done all this in a neat speech, I took leave.

One fine morning, very shortly afterwards, "I awoke and found myself famous." The extent of my renown will be best estimated by reference to the editorial opinions of the day. These opinions,

it will be seen, were embodied in critical notices of the number of the "Lollipop" containing my poem, and are perfectly satisfactory, conclusive and clear with the exception, perhaps, of the hieroglyphical marks, "*Sep. 15—1 t.*" appended to each of the critiques.

The "Owl," a journal of profound sagacity, and well known for the deliberate gravity of its literary decisions—the "Owl," I say, spoke as follows:

"THE LOLLIPOP!' The October number of this delicious Magazine surpasses its predecessors, and sets competition at defiance. In the beauty of its typography and paper—in the number and excellence of its steel plates—as well as in the literary merit of its contributions—the 'Lollipop' compares with its slow-paced rivals as Hyperion with a Satyr. The 'Hum-Drum,' the 'Rowdy-Dow,' and the 'Goosetherumfoodle,' excel, it is true, in braggadocio, but, in all other points, give us the 'Lollipop!' How this celebrated journal can sustain its evidently tremendous expenses, is more than we can understand. To be sure, it has a circulation of 100,000, and its subscription-list has increased one-fourth during the last month; but, on the other hand, the sums it disburses constantly for contributions are inconceivable. It is reported that Mr. Slyass received no less than thirty-seven and a half cents for his inimitable paper on 'Pigs.' With MR. CRAB, as editor, and with such names upon the list of contributors as SNOB and Slyass, there can be no such word as 'fail' for the Lollipop.' Go and subscribe. *Sep. 15—1 t*"

I must say that I was gratified with this high-toned notice from a paper so respectable as the "Owl." The placing my name—that is to say, my *nom de guerre*—in priority of station to that of the great Slyass, was a compliment as happy as I felt it to be deserved.

My attention was next arrested by these paragraphs in the "Toad"—a print highly distinguished for its uprightness, and independence—for its entire

freedom from sycophancy and subservience to the givers of dinners:

"The 'Lollipop' for October is out in advance of all its contemporaries, and infinitely surpasses them, of course, in the splendor of its embellishments, as well as in the richness of its literary contents. The 'Hum-Drum,' the 'Rowdy-Dow,' and the 'Goosetherumfoodle' excel, we admit, in braggadocio, but, in all other points, give us the 'Lollipop. How this celebrated Magazine can sustain its evidently tremendous expenses, is more than we can understand. To be sure, it has a circulation of 200,000, and its subscription list has increased one-third during the last fortnight, but on the other hand, the sums it disburses, monthly, for contributions, are fearfully great. We learn that Mr. Mumblethumb received no less than fifty cents for his late 'Monody in a Mud-Puddle.'

Among the original contributors to the present number we notice, (besides the eminent editor, Mr. CRAB,) such men as SNOB, Slyass, and Mumblethumb. Apart from the editorial matter, the most valuable paper, nevertheless, is, we think, a poetical gem by 'Snob, on the 'Oil-of-Bob'—but our readers must not suppose from the title of this incomparable *bijou*, that it bears any similitude to some balderdash on the same subject by a certain contemptible individual whose name is unmentionable to ears polite. The *present* poem 'On the Oil-of-Bob,' has excited universal anxiety and curiosity in respect to the owner of the evident pseudonym, 'Snob'—a curiosity which, happily, we have it in our power to satisfy. 'Snob' is the *nom de plume* of Mr. Thingum Bob, of this city,—a relative of the great Mr. Thingum, (after whom he is named,) and otherwise connected with the most illustrious families of the State. His father, Thomas Bob, Esq., is an opulent merchant in Smug. *Sep. 15—1 t.*"

This generous approbation touched me to the heart—the more especially as it emanated from a source so avowedly—so proverbially pure as the "Toad." The word "balderdash," as applied to the "Oil-of-Bob" of the Fly, I considered singularly pungent and appropriate. The words "gem" and

"*bijou*," however, used in reference to my composition, struck me as being, in some degree, feeble. They seemed to me to be deficient in force. They were not sufficiently *prononcés*, (as we have it in France).

I had hardly finished reading the "Toad," when a friend placed in my hands a copy of the "Mole," a daily, enjoying high reputation for the keenness of its perception about matters in general, and for the open, honest, above-ground style of its editorials. The "Mole" spoke of the "Lollipop" as follows:

"We have just received the 'Lollipop' for October, and *must* say that never before have we perused any single number of any periodical which afforded us a felicity so supreme. We speak advisedly. The 'Hum-Drum,' the 'Rowdy-Dow' and the 'Goosetherumfoodle' must look well to their laurels. These prints; no doubt, surpass every thing in loudness of pretension, but, in all other points, give us the 'Lollipop!' How this celebrated Magazine can sustain its evidently tremendous expenses, is more than we can comprehend. To be sure, it has a circulation of 300,000 and its subscription-list has increased one-half within the last week, but then the sum it disburses, monthly, for contributions, is astoundingly enormous. We have it upon good authority, that Mr. Fatquack received no less than sixty-two cents and a half for his late Domestic Nouvelette, the 'Dish-Clout.'

"The contributors to the number before us are Mr. CRAB, (the eminent editor,) SNOB, Mumblethumb, Fatquack, and others; but, after the inimitable compositions of the editor himself, we prefer a diamond-like effusion from the pen of a rising poet who writes over the signature 'Snob'—a *nom de guerre* which we predict will one day extinguish the radiance of 'Boz.' 'SNOB,' we learn, is a Mr. THINGUM BOB, Esq., sole heir of a wealthy merchant of this city, Thomas Bob, Esq., and a near relative of the distinguished Mr. Thingum. The title of Mr. B.'s admirable poem is the 'Oil-of-Bob'—a somewhat unfortunate name, by-the-by, as some contemptible vagabond connected with the penny press has already disgusted the town with a great deal of

drivel upon the same topic. There will be no danger, however, of confounding the compositions. *Sep. 15—1 t.*"

The generous approbation of so clear-sighted a journal as the "Mole" penetrated my soul with delight. The only objection which occurred to me was, that the terms "contemptible vagabond" might have been better written "*odious and contemptible, wretch, villain* and vagabond." This would have sounded more gracefully, I think. "Diamond-like," also, was scarcely, it will be admitted, of sufficient intensity to express what the "Mole" evidently *thought* of the brilliancy of the "Oil-of-Bob."

On the same afternoon in which I saw these notices in the "Owl," the "Toad," and the "Mole" I happened to meet with a copy of the "Daddy-Long-Legs," a periodical proverbial for the extreme extent of its understanding. And it was the "Daddy-Long-Legs" which spoke thus:

"The 'Lollipop'!! This gorgeous Magazine is already before the public for October. The question of pre-eminence is forever put to rest, and hereafter it will be excessively preposterous in the 'Hum-Drum,' the 'Rowdy-Dow,' or the 'Goosetherumfoodle,' to make any farther spasmodic attempts at competition. These journals may excel the 'Lollipop' in outcry, but, in all other points, give us the 'Lollipop!' How this celebrated Magazine can sustain its evidently tremendous expenses, is past comprehension. To be sure it has a circulation of precisely half a million, and its subscription-list has increased seventy-five per cent. within the last couple of days; but then the sums it disburses, monthly, for contributions, are scarcely credible; }we are cognizant of the fact, that Mademoiselle Cribalittle received no less than eighty-seven cents and a half for her late valuable Revolutionary Tale, entitled 'The York-Town Katy-Did, and the Bunker-Hill Katy-Didn't.'

"The most able papers in the present number, are, of

course, those furnished by the editor, (the eminent Mr. CRAB,) but there are numerous magnificent contributions from such names as SNOB, Mademoiselle Cribalittle, Slyass, Mrs. Fibalittle, Mumblethumb, Mrs. Squibalittle, and last, though not least, Fatquack. The world may well be challenged to produce so rich a galaxy of genius.

"The poem over the signature 'SNOB' is, we find, attracting universal commendation, and, we are constrained to say, deserves, if possible, even more applause than it has received. The 'Oil-of-Bob' is the title of this masterpiece of eloquence and art. One or two of our readers *may* have a *very* faint, although sufficiently disgusting recollection of a poem (?) similarly entitled, the perpetration of a miserable penny-a-liner, mendicant, and cut-throat, connected in the capacity of scullion, we believe, with one of the indecent prints about the purlieus of the city; we beg them, for God's sake, not to confound the compositions. The author of the 'Oil-of-Bob' is, we hear, THINGUM BOB, Esq., a gentleman of high genius, and a scholar. 'Snob' is merely a *nom-de-guerre*. Sept. 15—1 t."

I could scarcely restrain my indignation while I perused the concluding portions of this diatribe. It was clear to me that the yea-nay manner—not to say the gentleness—the positive forbearance with which the "Daddy-Long-Legs" spoke of that pig, the editor of the "Gad-Fly"—it was evident to me, I say, that this gentleness of speech could proceed from nothing else than a partiality for the Fly—whom it was clearly the intention of the "Daddy-Long-Legs" to elevate into reputation at my expense. Any one, indeed, might perceive, with half an eye, that, had the real design of the "Daddy" been what it wished to appear, it, (the "Daddy,") might have expressed itself in terms more direct, more pungent, and altogether more to the purpose. The words "penny-a-liner," "mendicant," "scullion," and "cut-throat," were epithets so intentionally inexpressive and equivocal, as to be worse than

nothing when applied to the author of the very worst stanzas ever penned by one of the human race. We all know what is meant by "damning with faint praise," and, on the other hand, who could fail seeing through the covert purpose of the "Daddy"—that of glorifying with feeble abuse?

What the "Daddy" chose to say of the Fly, however, was no business of mine. What it said of myself *was*. After the noble manner in which the "Owl," the "Toad," the "Mole," had expressed themselves in respect to my ability, it was rather too much to be coolly spoken of by a thing like the "Daddy-Long-Legs," as merely "a gentleman of high genius and a scholar." Gentleman indeed! I made up my mind at once, either to get a written apology from the "Daddy-Long-Legs," or to call it out.

Full of this purpose, I looked about me to find a friend whom I could entrust with a message to his Daddyship, and as the editor of the "Lollipop" had given me marked tokens of regard, I at length concluded to seek assistance upon the present occasion.

I have never yet been able to account, in a manner satisfactory to my own understanding, for the *very* peculiar countenance and demeanor with which Mr. Crab listened to me, as I unfolded to him my design. He again went through the scene of the bell-rope and cudgel, and did not omit the duck. At one period I thought he really intended to quack. His fit, nevertheless, finally subsided as before, and he began to act and speak in a rational way. He declined bearing the cartel, however, and in fact, dissuaded me from sending it at all; but was candid enough to admit that the "Daddy-Long-Legs" had been disgracefully in the wrong—more especially

in what related to the epithets "gentleman and scholar."

Towards the end of this interview with Mr. Crab, who really appeared to take a paternal interest in my welfare, he suggested to me that I might turn an honest penny, and, at the same time, advance my reputation, by occasionally playing Thomas Hawk for the "Lollipop."

I begged Mr. Crab to inform me who was Mr. Thomas Hawk, and how it was expected that I should play him.

Here Mr. Crab again "made great eyes," (as we say in Germany,) but at length, recovering himself from a profound attack of astonishment, he assured me that he employed the words "Thomas Hawk" to avoid the colloquialism, Tommy, which was low—but that the true idea was Tommy Hawk—or tomahawk—and that by "playing tomahawk" he referred to scalping, brow-beating and otherwise using-up the herd of poor-devil authors.

I assured my patron that, if this was all, I was perfectly resigned to the task of playing Thomas Hawk. Hereupon Mr. Crab desired me to use-up the editor of the "Gad-Fly" forthwith, in the fiercest style within the scope of my ability, and as a specimen of my powers. This I did, upon the spot, in a review of the original "Oil-of-Bob," occupying thirty-six pages of the "Lollipop." I found playing Thomas Hawk, indeed, a far less onerous occupation than poetizing; for I went upon *system* altogether, and thus it was easy to do the thing thoroughly and well. My practice was this. I bought auction copies (cheap) of "Lord Brougham's Speeches," "Cobbett's Complete Works," the "New Slang-Syllabus," the "Whole Art of Snubbing," "Prentice's Billingsgate," (folio edition,)

and "Lewis G. Clarke on Tongue." These works I cut up thoroughly with a currycomb, and then, throwing the shreds into a sieve, sifted out carefully all that might be thought decent, (a mere trifle); reserving the hard phrases, which I threw into a large tin pepper-castor with longitudinal holes, so that an entire sentence could get through without material injury. The mixture was then ready for use. When called upon to play Thomas Hawk, I anointed a sheet of fools-cap with the white of a gander's egg; then, shredding the thing to be reviewed as I had previously shredded the books,—only with more care, so as to get every word separate—I threw the latter shreds in with the former, screwed on the lid of the castor, gave it a shake, and so dusted out the mixture upon the egg'd fools-cap; where it stuck. The effect was beautiful to behold. It was captivating. Indeed, the reviews I brought to pass by this simple expedient have never been approached, and were the wonder of the world. At first, through bashfulness—the result of inexperience—I was a little put out by a certain inconsistency—a certain air of the *bizarre*, (as we say in France,) worn by the composition as a whole. All the phrases did not *fit*, (as we say in the Anglo-Saxon). Many were quite awry. Some, even, were up-side-down; and there were none of them which were not, in some measure, injured in regard to effect, by this latter species of accident, when it occurred;—with the exception of Mr. Lewis Clarke's paragraphs, which were so vigorous, and altogether stout, that they seemed not particularly disconcerted by any extreme of position, but looked equally happy and satisfactory, whether on their heads, or on their heels.

What became of the editor of the "Gad-Fly,"

after the publication of my criticism on his "Oil-of-Bob," it is somewhat difficult to determine. The most reasonable conclusion is, that he wept himself to death. At all events he disappeared instantaneously from the face of the earth, and no man has seen even the ghost of him since.

This matter having been properly accomplished, and the Furies appeased, I grew at once into high favor with Mr. Crab. He took me into his confidence, gave me a permanent situation as Thomas Hawk of the "Lollipop," and, as for the present, he could afford me no salary, allowed me to profit, at discretion, by his advice.

"My dear Thingum," said he to me one day after dinner, "I respect your abilities and love you as a son. You shall be my heir. When I die I will bequeath you the 'Lollipop.' In the meantime I will make a man of you—I *will*—provided always that you follow my counsel. The first thing to do is to get rid of the old bore."

"Boar?" said I inquiringly—"pig, eh?—*aper*? (as we say in Latin)—who?—where?"

"Your father," said he.

"Precisely," I replied,—*"pig."*

"You have your fortune to make, Thingum," resumed Mr. Crab, "and that governor of yours is a millstone about your neck. We must cut him at once." [Here I took out my knife.] "We must cut him," continued Mr. Crab, "decidedly and forever. He won't do—he *won't*. Upon second thoughts, you had better kick him, or cane him, or something of that kind."

"What do you say," I suggested modestly, "to my kicking him in the first instance, caning him afterwards, and winding up by tweaking his nose?"

Mr. Crab looked at me musingly for some moments, and then answered:

"I think, Mr. Bob, that what you propose would answer sufficiently well—indeed remarkably well—that is to say, as far as it went—but barbers are exceedingly hard to cut, and I think, upon the whole, that, having performed upon Thomas Bob the operations you suggest, it would be advisable to blacken, with your fists, both his eyes, very carefully and thoroughly, to prevent his ever seeing you again in fashionable promenades. After doing this, I really do not perceive that you can do any more. However—it might be just as well to roll him once or twice in the gutter, and then put him in charge of the police. Any time the next morning you can call at the watch-house and swear an assault."

I was much affected by the kindness of feeling towards me personally, which was evinced in this excellent advice of Mr. Crab, and I did not fail to profit by it forthwith. The result was, that I got rid of the old bore, and began to feel a little independent and gentleman-like. The want of money, however, was, for a few weeks, a source of some discomfort; but at length, by carefully putting to use my two eyes, and observing how matters went just in front of my nose, I perceived how the thing was to be brought about. I say "thing"—be it observed—for they tell me the Latin for it is *rem*. By the way, talking of Latin, can any one tell me the meaning of *quocunque*—or what is the meaning of *modo*?

My plan was exceedingly simple. I bought, for a song, a sixteenth of the "Snapping-Turtle":—that was all. The thing was *done*, and I put money in my purse. There were some trivial arrangements afterwards, to be sure; but these formed no portion

of the plan. They were a consequence—a result. For example, I bought pen, ink and paper, and put them into furious activity. Having thus completed a Magazine article, I gave it, for appellation, “FOL-LOL, *by the Author of ‘THE OIL-OF-BOB,’*” and enveloped it to the “Goosetherumfoodle.” That journal, however, having pronounced it “twattle” in the “Monthly Notices to Correspondents,” I reheaded the paper “‘Hey-Diddle-Diddle,’ by THINGUM BOB, Esq., Author of the Ode on ‘The Oil-of-Bob,’ and Editor of the ‘Snapping-Turtle.’” With this amendment, I re-enclosed it to the “Goosetherumfoodle,” and, while I awaited a reply, published daily, in the “Turtle,” six columns of what may be termed philosophical and analytical investigation of the literary merits of the “Goosetherumfoodle,” as well as of the personal character of the editor of the “Goosetherumfoodle.” At the end of a week the “Goosetherumfoodle” discovered that it had, by some odd mistake, “confounded a stupid article, headed ‘Hey-Diddle-Diddle’ and composed by some unknown ignoramus, with a gem of resplendent lustre similarly entitled, the work of Thingum Bob, Esq., the celebrated author of ‘The Oil-of-Bob.’” The “Goosetherumfoodle” deeply “regretted this very natural accident,” and promised, moreover, an insertion of the *genuine* “Hey-Diddle-Diddle” in the very next number of the Magazine.

The fact is, I *thought*—I *really* thought—I thought at the time—I thought *then*—and have no reason for thinking otherwise *now*—that the “Goosetherumfoodle” *did* make a mistake. With the best intentions in the world, I never knew any thing that made as many singular mistakes as the “Goosetherumfoodle.” From that day I took a liking to the “Goosetherumfoodle,” and the result was I soon

saw into the very depths of its literary merits, and did not fail to expatiate upon them, in the "Turtle," whenever a fitting opportunity occurred. And it is to be regarded as a very peculiar coincidence—as one of those positively *remarkable* coincidences which set a man to serious thinking—that just such a total revolution of opinion—just such entire *bouleversement*, (as we say in French,)—just such thorough *topsiturviness*, (if I may be permitted to employ a rather forcible term of the Choctaws,) as happened, *pro* and *con*, between myself on the one part, and the "Goosetherumfoodle" on the other, did actually again happen, in a brief period afterwards, and with precisely similar circumstances, in the case of myself and the "Rowdy-Dow," and in the case of myself and the "Hum-Drum."

Thus it was that, by a master-stroke of genius, I at length consummated my triumphs by "putting money in my purse," and thus may be said really and fairly to have commenced that brilliant and eventful career which rendered me illustrious, and which now enables me to say, with Chateaubriand, "I have made history"—"*I'ai fait l'histoire.*"

I have indeed "made history." From the bright epoch which I now record, my actions—my works—are the property of mankind. They are familiar to the world. It is, then, needless for me to detail how, soaring rapidly, I fell heir to the "Lollipop"—how I merged this journal in the "Hum-Drum"—how again I made purchase of the "Rowdy-Dow," thus combining the three periodicals—how, lastly, I effected a bargain for the sole remaining rival, and united all the literature of the country in one magnificent Magazine, known everywhere as the

“Rowdy-Dow, Lollipop, Hum-Drum,
and

GOOSETHERUMFOODLE”

Yes; I have made history. My fame is universal. It extends to the uttermost ends of the earth. You cannot take up a common newspaper in which you shall not see some allusion to the immortal THINGUM BOB. It is Mr. Thingum Bob said so, and Mr. Thingum Bob wrote this, and Mr. Thingum Bob did that. But I am meek and expire with an humble heart. After all, what is it?—this indescribable something which men will persist in terming “genius?” I agree with Buffon—with Hogarth—it is but *diligence* after all.

Look at *me!*—how I labored—how I toiled—how I wrote! Ye Gods, did I *not* write? I knew not the word “ease.” By day I adhered to my desk, and at night, a pale student, I consumed the midnight oil. You should have seen me—you *should*. I leaned to the right. I leaned to the left. I sat forward. I sat backward. I sat upon end. I sat *tete baissée*, (as they have it in the Kickapoo,) bowing my head close to the alabaster page. And, through all, I—*wrote*. Through joy and through sorrow, I—*wrote*. Through hunger and through thirst, I—*wrote*. Through good report and through ill report, I—*wrote*. Through sunshine and through moonshine, I—*wrote*. *What* I wrote it is unnecessary to say. The *style!*—that was the thing. I caught it from Fatquack—whizz!—fizz!—and I am giving you a specimen of it now.

HOW TO WRITE A BLACKWOOD ARTICLE

“In the name of the Prophet—figs!!”

Cry of Turkish fig-pedler.

I PRESUME every body has heard of me. My name is the Signora Psyche Zenobia. This I know to be a fact. No body but my enemies ever calls me Suky Snobbs. I have been assured that Suky is but a vulgar corruption of Psyche, which is good Greek, and means “the soul” (that’s me, I’m *all* soul) and sometimes “a butterfly,” which latter meaning undoubtedly alludes to my appearance in my new crimson satin dress, with the sky-blue Arabian *mantelet*, and the trimmings of green *agraffas*, and the seven flounces of orange-colored *auriculas*. As for Snobbs—any person who should look at me would be instantly aware that my name wasn’t Snobbs. Miss Tabitha Turnip propagated that report through sheer envy. Tabitha Turnip indeed! Oh the little wretch! But what can we expect from a turnip? Wonder if she remembers the old adage about “blood out of a turnip, &c.” [Mem: put her in mind of it the first opportunity.] [Mem again—pull her nose.] Where was I? Ah! I have been assured that Snobbs is a mere corruption of Zenobia, and that Zenobia was a queen—(So am I. Dr. Moneypenny, always calls me the Queen of Hearts)—and that Zenobia, as well as Psyche, is good Greek, and that my father was “a Greek,” and that consequently I have a right to our patronymic, which is Zenobia, and not by any means Snobbs. Nobody but Tabitha Turnip

calls me Suky Snobbs. I am the Signora Psyche Zenobia.

As I said before, everybody has heard of me. I am that very Signora Psyche Zenobia, so justly celebrated as corresponding secretary to the "*Philadelphia, Regular, Exchange, Tea, Total, Young, Belles, Lettres, Universal, Experimental, Bibliographical Association, To, Civilize, Humanity.*" Dr. Money-penny made the title for us, and says he chose it because it sounded big like an empty rum-punchoon. (A vulgar man that sometimes—but he's deep.) We all sign the initials of the society after our names, in the fashion of the R. S. A., Royal Society of Arts—the S. D. U. K., Society for the Diffusion of Useful Knowledge, &c., &c. Dr. Money-penny says that S stands for *stale*, and that D. U. K. spells duck, (but it don't,) and that S. D. U. K. stands for Stale Duck, and not for Lord Brougham's society—but then Dr. Money-penny is such a queer man that I am never sure when he is telling me the truth. At any rate we always add to our names the initials P. R. E. T. T. Y. B. L. U. E. B. A. T. C. H.—that is to say, Philadelphia, Regular, Exchange, Tea, Total, Young, Belles, Lettres, Universal, Experimental, Bibliographical, Association, To, Civilize, Humanity—one letter for each word, which is a decided improvement upon Lord Brougham. Dr. Money-penny will have it that our initials give our true character—but for my life I can't see what he means.

Notwithstanding the good offices of the Doctor, and the strenuous exertions of the association to get itself into notice, it met with no very great success until I joined it. The truth is, members indulged in too flippant a tone of discussion. The papers read every Saturday evening were character-

ized less by depth than buffoonery. They were all whipped syllabub. There was no investigation of first causes, first principles. There was no investigation of anything at all. There was no attention paid to that great point, the "fitness of things." In short there was no fine writing like this. It was all low—very! No profundity, no reading, no metaphysics—nothing which the learned call spirituality, and which the unlearned choose to stigmatize as cant. [Dr. M. says I ought to spell "cant" with a capital K—but I know better.]

When I joined the society it was my endeavor to introduce a better style of thinking and writing, and all the world knows how well I have succeeded. We get up as good papers now in the P. R. E. T. T. Y. B. L. U. E. B. A. T. C. H. as any to be found even in Blackwood. I say, Blackwood, because I have been assured that the finest writing, upon every subject, is to be discovered in the pages of that justly celebrated Magazine. We now take it for our model upon all themes, and are getting into rapid notice accordingly. And, after all, it's not so very difficult a matter to compose an article of the genuine Blackwood stamp, if one only goes properly about it. Of course I don't speak of the political articles. Everybody knows how *they* are managed, since Dr. Moneypenny explained it. Mr. Blackwood has a pair of tailor's-shears, and three apprentices who stand by him for orders. One hands him the "Times," another the "Examiner," and a third a "Gulley's New Compendium of Slang-Whang." Mr. B. merely cuts out and intersperses. It is soon done—nothing but Examiner, Slang-Whang, and Times—then Times, Slang-Whang, and Examiner—and then Times, Examiner and Slang-Whang.

But the chief merit of the Magazine lies in its miscellaneous articles; and the best of these come under the head of what Dr. Money Penny calls the *bizarceries* (whatever that may mean) and what everybody else calls the *intensities*. This is a species of writing which I have long known how to appreciate, although it is only since my late visit to Mr. Blackwood (deputed by the society) that I have been made aware of the exact method of composition. This method is very simple, but not so much so as the politics. Upon my calling at Mr. B.'s, and making known to him the wishes of the society, he received me with great civility, took me into his study, and gave me a clear explanation of the whole process.

"My dear madam," said he, evidently struck with my majestic appearance, for I had on the crimson satin, with the green *agraffas*, and orange-colored *auriculas*, "My dear madam," said he, "sit down. The matter stands thus. In the first place, your writer of intensities must have very black ink, and a very big pen, with a very blunt nib. And, mark me, Miss Psyche Zenobia!" he continued, after a pause, with the most impressive energy and solemnity of manner, "mark me!—*that pen—must—never be mended!* Herein, madam, lies the secret, the soul, of intensity. I assume upon myself to say, that no individual, of however great genius, ever wrote with a good pen,—understand me,—a good article. You may take it for granted, that when manuscript can be read it is never worth reading. This is a leading principle in our faith, to which if you cannot readily assent, our conference is at an end."

He paused. But, of course, as I had no wish to put an end to the conference, I assented to a propo-

sition so very obvious, and one, too, of whose truth I had all along been sufficiently aware. He seemed pleased, and went on with his instructions.

"It may appear invidious in me, Miss Psyche Zenobia, to refer you to an article, or set of articles, in the way of model or study; yet perhaps I may as well call your attention to a few cases. Let me see. There was '*The Dead Alive*,' a capital thing!—the record of a gentleman's sensations when entombed before the breath was out of his body—full of taste, terror, sentiment, metaphysics, and erudition. You would have sworn that the writer had been born and brought up in a coffin. Then we had the '*Confessions of an Opium-eater*'—fine, very fine!—glorious imagination—deep philosophy—acute speculation—plenty of fire and fury, and a good spicing of the decidedly unintelligible. That was a nice bit of flummery, and went down the throats of the people delightfully. They would have it that Coleridge wrote the paper—but not so. It was composed by my pet baboon, Juniper, over a rummer of Hollands and water, 'hot, without sugar.'" [This I could scarcely have believed had it been any body but Mr. Blackwood, who assured me of it.] "Then there was '*The Involuntary Experimentalist*,' all about a gentleman who got baked in an oven, and came out alive and well, although certainly done to a turn. And then there was '*The Diary of a Late Physician*,' where the merit lay in good rant, and indifferent Greek—both of them taking things with the public. And then there was '*The Man in the Bell*,' a paper by-the-by, Miss Zenobia, which I cannot sufficiently recommend to your attention. It is the history of a young person who goes to sleep under the clapper of a church bell, and is awakened by its tolling for a

funeral. The sound drives him mad, and, accordingly, pulling out his tablets, he gives a record of his sensations. Sensations are the great things after all. Should you ever be drowned or hung, be sure and make a note of your sensations—they will be worth to you ten guineas a sheet. If you wish to write forcibly, Miss Zenobia, pay minute attention to the sensations.”

“That I certainly will, Mr. Blackwood,” said I.

“Good!” he replied. “I see you are a pupil after my own heart. But I must put you *au fait* to the details necessary in composing what may be denominated a genuine Blackwood article of the sensation stamp—the kind which you will understand me to say I consider the best for all purposes.

“The first thing requisite is to get yourself into such a scrape as no one ever got into before. The oven, for instance,—that was a good hit. But if you have no oven, or big bell, at hand, and if you cannot conveniently tumble out of a balloon, or be swallowed up in an earthquake, or get stuck fast in a chimney, you will have to be contented with simply imagining some similar misadventure. I should prefer, however, that you have the actual fact to bear you out. Nothing so well assists the fancy, as an experimental knowledge of the matter in hand. ‘Truth is strange,’ you know, ‘stranger than fiction’—besides being more to the purpose.”

Here I assured him I had an excellent pair of garters, and would go and hang myself forthwith.

“Good!” he replied, “do so;—although hanging is somewhat hackneyed. Perhaps you might do better. Take a dose of Brandreth’s pills, and then give us your sensations. However, my instructions will apply equally well to any variety of misadventure, and in your way home you may easily get

knocked in the head, or run over by an omnibus, or bitten by a mad dog, or drowned in a gutter. But to proceed.

“Having determined upon your subject, you must next consider the tone, or manner, of your narration. There is the tone didactic, the tone enthusiastic, the tone natural—all commonplace enough. But then there is the tone laconic, or curt, which has lately come much into use. It consists in short sentences. Somehow thus: Can’t be too brief. Can’t be too snappish. Always a full stop. And never a paragraph.

“Then there is the tone elevated, diffusive, and interjectional. Some of our best novelists patronize this tone. The words must be all in a whirl, like a humming-top, and make a noise very similar, which answers remarkably well instead of meaning. This is the best of all possible styles where the writer is in too great a hurry to think.

“The tone metaphysical is also a good one. If you know any big words this is your chance for them. Talk of the Ionic and Eleatic schools—of Archytas, Gorgias and Alcmaeon. Say something about objectivity and subjectivity. Be sure and abuse a man named Locke. Turn up your nose at things in general, and when you let slip anything a little *too* absurd, you need not be at the trouble of scratching it out, but just add a foot-note, and say that you are indebted for the above profound observation to the ‘*Kritik der reinen Vernunft*,’ or to the ‘*Metaphysische Anfangsgrunde der Naturwissenschaft*.’ This will look erudite and—and—and frank.

“There are various other tones of equal celebrity, but I shall mention only two more—the tone transcendental and the tone heterogeneous. In

the former the merit consists in seeing into the nature of affairs a very great deal farther than any body else. This second sight is very efficient when properly managed. A little reading of the 'Dial' will carry you a great way. Eschew, in this case, big words; get them as small as possible, and write them upside down. Look over Channing's poems and quote what he says about a 'fat little man with a delusive show of Can.' Put in something about the Supernal Oneness. Don't say a syllable about the Infernal Twoness. Above all, study innuendo. Hint everything—assert nothing. If you feel inclined to say 'bread and butter,' do not by any means say it outright. You may say anything and everything *approaching* to 'bread and butter.' You may hint at buck-wheat cake, or you may even go so far as to insinuate oat-meal porridge, but if bread and butter be your real meaning, be cautious, my *dear* Miss Psyche, not on any account to say 'bread and butter!'"

I assured him that I should never say it again as long as I lived. He kissed me and continued:

"As for the tone heterogeneous, it is merely a judicious mixture, in equal proportions, of all the other tones in the world, and is consequently made up of everything deep, great, odd, piquant, pertinent, and pretty.

"Let us suppose now you have determined upon your incidents and tone. The most important portion—in fact, the soul of the whole business, is yet to be attended to—I allude to *the filling up*. It is not to be supposed that a lady, or gentleman either, has been leading the life of a book-worm. And yet above all things it is necessary that your article have an air of erudition, or at least afford evidence of extensive general reading. Now I'll

put you in the way of accomplishing this point. See here!" (pulling down some three or four ordinary-looking volumes, and opening them at random). "By casting your eye down almost any page of any book in the world, you will be able to perceive at once a host of little scraps of either learning or *bel-esprit-ism*, which are the very thing for the spicing of a Blackwood article. You might as well note down a few while I read them to you. I shall make two divisions: first, *Piquant Facts for the Manufacture of Similes*; and second, *Piquant Expressions to be introduced as occasion may require*. Write now!—" and I wrote as he dictated.

"PIQUANT FACTS FOR SIMILES. 'There were originally but three Muses—Melete, Mneme, Aœde—meditation, memory, and singing.' You may make a great deal of that little fact if properly worked. You see it is not generally known, and looks *recherché*. You must be careful and give the thing with a downright improviso air.

"Again. 'The river Alpheus passed beneath the sea, and emerged without injury to the purity of its waters.' Rather stale that, to be sure, but, if properly dressed and dished up, will look quite as fresh as ever.

"Here is something better. 'The Persian Iris appears to some persons to possess a sweet and very powerful perfume, while to others it is perfectly scentless.' Fine that, and very delicate! Turn it about a little, and it will do wonders. We'll have something else in the botanical line. There's nothing goes down so well, especially with the help of a little Latin. Write!

"*The Epidendrum Flos Aeris*, of Java, bears a very beautiful flower, and will live when pulled up by the roots. The natives suspend it by a cord

from the ceiling, and enjoy its fragrance for years.' That's capital! That will do for the similes. Now for the Piquant Expressions.

PIQUANT EXPRESSIONS. '*The venerable Chinese novel Ju-Kiao-Li.*' Good! By introducing these few words with dexterity you will evince your intimate acquaintance with the language and literature of the Chinese. With the aid of this you may possibly get along without either Arabic, or Sanscrit, or Chickasaw. There is no passing muster, however, without Spanish, Italian, German, Latin, and Greek. I must look you out a little specimen of each. Any scrap will answer, because you must depend upon your own ingenuity to make it fit into your article. Now write!

"*Aussi tendre que Zaire*'—as tender as Zaire—French. Alludes to the frequent repetition of the phrase, *la tendre Zaire*, in the French tragedy of that name. Properly introduced, will show not only your knowledge of the language, but your general reading and wit. You can say, for instance, that the chicken you were eating (write an article about being choked to death by a chicken-bone) was not altogether *aussi tendre que Zaire*. Write!

*'Van muerte tan escondida,
Que no te sienta venir,
Porque el plazer del morir
No me torne a dar la vida.'*

That's Spanish—from Miguel de Cervantes. 'Come quickly, O death! but be sure and don't let me see you coming, lest the pleasure I shall feel at your appearance should unfortunately bring me back again to life.' This you may slip in quite *à propos* when you are struggling in the last agonies with the chicken bone. Write!

*'Il pover 'huomo che non se'n era accorto,
Andava combattendo, e era morto.'*

That's Italian, you perceive—from Ariosto. It means that a great hero, in the heat of combat, not perceiving that he had been fairly killed, continued to fight valiantly, dead as he was. The application of this to your own case is obvious—for I trust, Miss Psyche, that you will not neglect to kick for at least an hour and a half after you have been choked to death by that chicken-bone. Please to write!

*'Und sterb'ich doch, no sterb'ich denn
Durch sie—durch sie!'*

That's German—from Schiller. 'And if I die, at least I die—for thee—for thee!' Here it is clear, that you are apostrophizing the *cause* of your disaster, the chicken. Indeed what gentleman (or lady either) of sense, *wouldn't* die, I should like to know, for a well fattened capon of the right Molucca breed, stuffed with capers and mushrooms, and served up in a salad-bowl, with orange-jellies *en mosäiques*. Write! (You can get them that way at Tortoni's),—Write, if you please!

"Here is a nice little Latin phrase, and rare too, (one can't be too *recherché* or brief in one's Latin, it's getting so common),—*ignoratio elenchi*. He has committed an *ignoratio elenchi*—that is to say, he has understood the words of your proposition, but not the idea. The man was a *fool*, you see. Some poor fellow whom you address while choking with that chicken-bone, and who therefore didn't precisely understand what you were talking about. Throw the *ignoratio elenchi* in his teeth, and, at once, you have him annihilated. If he dare to reply, you can tell him from Lucan (here it is) that

speeches are mere *anemonae verborum*, anemone words. The anemone, with great brilliancy, has no smell. Or, if he begin to bluster, you may be down upon him with *insomnia Jovis*, reveries of Jupiter—a phrase which Silius Italicus (see here!) applies to thoughts pompous and inflated. This will be sure and cut him to the heart. He can do nothing but roll over and die. Will you be kind enough to write?

“In Greek we must have something pretty—from Demosthenes, for example. *Ανερο φευγων και παλιν μαχεται*. [Anero pheugon kai palin makesetail]. There is a tolerably good translation of it in Hudibras—

For he that flies may fight again,
Which he can never do that's slain.

In a Blackwood article nothing makes so fine a show as your Greek. The very letters have an air of profundity about them. Only observe, madam, the astute look of that Epsilon! That Phi ought certainly to be a bishop! Was ever there a smarter fellow than that Omicron? Just twig that Tau! In short, there is nothing like Greek for a genuine sensation-paper. In the present case your application is the most obvious thing in the world. Rap out the sentence, with a huge oath, and by way of *ultimatum* at the good-for-nothing dunder-headed villain who couldn't understand your plain English in relation to the chicken-bone. He'll take the hint and be off, you may depend upon it.”

These were all the instructions Mr. B. could afford me upon the topic in question, but I felt they would be entirely sufficient. I was, at length, able to write a genuine Blackwood article, and determined to do it forthwith. In taking leave of me, Mr. B. made a proposition for the purchase of the paper when

written; but as he could offer me only fifty guineas a sheet, I thought it better to let our society have it, than sacrifice it for so paltry a sum. Notwithstanding this niggardly spirit, however, the gentleman showed his consideration for me in all other respects, and indeed treated me with the greatest civility. His parting words made a deep impression upon my heart, and I hope I shall always remember them with gratitude.

"My dear Miss Zenobia," he said, while the tears stood in his eyes, "is there *anything* else I can do to promote the success of your laudable undertaking? Let me reflect! It is just possible that you may not be able, so soon as convenient, to—to—get yourself drowned, or—choked with a chicken-bone, or—or hung,—or—bitten by a—but stay! Now I think me of it, there are a couple of very excellent bull-dogs in the yard—fine fellows, I assure you—savage, and all that—indeed just the thing for your money—they'll have you eaten up, *auriculas* and all, in less than five minutes (here's my watch!)—and then only think of the sensations! Here! I say—Tom!—Peter!—Dick, you villain!—let out those"—but as I was really in a great hurry, and had not another moment to spare, I was reluctantly forced to expedite my departure, and accordingly took leave *at once*—somewhat more abruptly, I admit, than strict courtesy would have otherwise, allowed.

It was my primary object upon quitting Mr. Blackwood, to get into some immediate difficulty, pursuant to his advice, and with this view I spent the greater part of the day in wandering about Edinburg, seeking for desperate adventures—adventures adequate to the intensity of my feelings, and adapted to the vast character of the article I intended to write. In this excursion I was attended by one

negro-servant Pompey, and my little lap-dog Diana, whom I had brought with me from Philadelphia. It was not, however, until late in the afternoon that I fully succeeded in my arduous undertaking. An important event then happened of which the following Blackwood article, in the tone heterogeneous, is the substance and result.

A PREDICAMENT

What chance, good lady, hath bereft you thus?—COMUS.

IT was a quiet and still afternoon when I strolled forth in the goodly city of Edina. The confusion and bustle in the streets were terrible. Men were talking. Women were screaming. Children were choking. Pigs were whistling. Carts they rattled. Bulls they bellowed. Cows they lowed. Horses they neighed. Cats they caterwauled. Dogs they danced. *Danced!* Could it then be possible? *Danced!* Alas, thought I, *my* dancing days are over! Thus it is ever. What a host of gloomy recollections will ever and anon be awakened in the mind of genius and imaginative contemplation, especially of a genius doomed to the everlasting, and eternal, and continual, and, as one might say, the—*continued*—yes, the *continued and continuous*, bitter, harassing, disturbing, and, if I may be allowed the expression, the *very* disturbing influence of the serene, and god-like, and heavenly, and exalting, and elevated, and purifying effect of what may be rightly termed the most enviable, the most *truly* enviable—nay! the most benignly beautiful, the most deliciously ethereal, and, as it were, the most *pretty* (if I may use so bold an expression) *thing* (pardon me, gentle reader!) in the world—but I am always led away by my feelings. In *such* a mind, I repeat, what a host of recollections are stirred up by a trifle! The dogs danced! *I—I could not!* They frisked—I wept. They capered—I sobbed aloud. Touching circum-

stances! which cannot fail to bring to the recollection of the classical reader that exquisite passage in relation to the fitness of things, which is to be found in the commencement of the third volume of that admirable and venerable Chinese novel, the *Jo-Go-Slow*.

In my solitary walk through the city I had two humble but faithful companions. Diana, my poodle! sweetest of creatures! She had a quantity of hair over her one eye, and a blue riband tied fashionably around her neck. Diana was not more than five inches in height, but her head was somewhat bigger than her body, and her tail, being cut off exceedingly close, gave an air of injured innocence to the interesting animal which rendered her a favorite with all.

And Pompey, my negro!—sweet Pompey! how shall I ever forget thee? I had taken Pompey's arm. He was three feet in height (I like to be particular) and about seventy, or perhaps eighty, years of age. He had bow-legs and was corpulent. His mouth should not be called small, nor his ears short. His teeth, however, were like pearl, and his large full eyes were deliciously white. Nature had endowed him with no neck, and had placed his ankles (as usual with that race) in the middle of the upper portion of the feet. He was clad with a striking simplicity. His sole garments were a stock of nine inches in height, and a nearly-new drab overcoat which had formerly been in the service of the tall, stately, and illustrious Dr. Money Penny. It was a good overcoat. It was well cut. It was well made. The coat was nearly new. Pompey held it up out of the dirt with both hands.

There were three persons in our party, and two of them have already been the subject of remark. There was a third—that third person was myself. I am the Signora Psyche Zenobia. I am *not* Suky

Snobbs. My appearance is commanding. On the memorable occasion of which I speak I was habited in a crimson satin dress, with a sky-blue Arabian mantelet. And the dress had trimmings of green agraffas, and seven graceful flounces of the orange-colored auricula. I thus formed the third of the party. There was the poodle. There was Pompey. There was myself. We were *three*. Thus it is said there were originally but three Furies—Melly, Nimmy and Hetty—Meditation, Memory and Fiddling.

Leaning upon the arm of the gallant Pompey, and attended at a respectful distance by Diana, I proceeded down one of the populous and very pleasant streets of the now deserted Edina. On a sudden, there presented itself to view a church—a Gothic cathedral—vast, venerable, and with a tall steeple, which towered into the sky. What madness now possessed me? Why did I rush upon my fate? I was seized with an uncontrollable desire to ascend the giddy pinnacle, and thence survey the immense extent of the city. The door of the cathedral stood invitingly open. My destiny prevailed. I entered the ominous archway. Where then was my guardian angel?—if indeed such angels there be. *If!* Distressing monosyllable! what a world of mystery, and meaning, and doubt, and uncertainty is there involved in thy two letters! I entered the ominous archway! I entered; and, without injury to my orange-colored auriculas, I passed beneath the portal, and emerged within the vestibule. Thus it is said the immense river Alfred passed, unscathed, and unwetted, beneath the sea.

I thought the staircases would never have an end. *Round!* Yes, they went round and up, and round and up and round and up, until I could not help surmising, with the sagacious Pompey, upon whose

supporting arm I leaned in all the confidence of early affection—I *could* not help surmising that the upper end of the continuous spiral ladder had been accidentally, or perhaps designedly, removed. I paused for breath; and, in the meantime, an incident occurred of too momentous a nature in a moral, and also in a metaphysical point of view, to be passed over without notice. It appeared to me—indeed I was quite confident of the fact—I could not be mistaken—no! I had, for some moments, carefully and anxiously observed the motions of my Diana—I say that *I could not be* mistaken—Diana *smelt a rat!* At once I called Pompey's attention to the subject, and he—he agreed with me. There was then no longer any reasonable room for doubt. The rat had been smelled—and by Diana. Heavens! shall I ever forget the intense excitement of that moment? Alas! what is the boasted intellect of man? The rat!—it was there—that is to say, it was somewhere. Diana smelled the rat. I—I *could* not! Thus it is said the Prussian Isis has, for some persons, a sweet and very powerful perfume, while to others it is perfectly scentless.

The staircase had been surmounted, and there were now only three or four more upward steps intervening between us and the summit. We still ascended, and now only one step remained. One step! One little, little step! Upon one such little step in the great staircase of human life how vast a sum of human happiness or misery often depends! I thought of myself, then of Pompey, and then of the mysterious and inexplicable destiny which surrounded us. I thought of Pompey!—alas, I thought of love! I thought of the many false *steps* which have been taken, and may be taken again. I resolved to be more cautious, more reserved. I aban-

doned the arm of Pompey, and, without his assistance, surmounted the one remaining step, and gained the chamber of the belfry. I was followed immediately afterwards by my poodle. Pompey alone remained behind. I stood at the head of the staircase, and encouraged him to ascend. He stretched forth to me his hand, and unfortunately in so doing was forced to abandon his firm hold upon the overcoat. Will the gods never cease their persecution? The overcoat it dropped, and, with one of his feet, Pompey stepped upon the long and trailing skirt of the overcoat. He stumbled and fell—this consequence was inevitable. He fell forwards, and, with his accursed head, striking me full in the—in the breast, precipitated me headlong, together with himself, upon the hard, filthy and detestable floor of the belfry. But my revenge was sure, sudden and complete. Seizing him furiously by the wool with both hands, I tore out a vast quantity of the black, and crisp, and curling material, and tossed it from me with every manifestation of disdain. It fell among the ropes of the belfry and remained. Pompey arose, and said no word. But he regarded me piteously with his large eyes and—sighed. Ye gods—that sigh! It sunk into my heart. And the hair—the wool! Could I have reached that wool I would have bathed it with my tears, in testimony of regret. But alas! it was now far beyond my grasp. As it dangled among the cordage of the bell, I fancied it still alive. I fancied that it stood on end with indignation. Thus the *happydandy Flos Aeris* of Java, bears, it is said, a beautiful flower, which will live when pulled up by the roots. The natives suspend it by a cord from the ceiling and enjoy its fragrance for years.

Our quarrel was now made up, and we looked

about the room for an aperture through which to survey the city of Edina. Windows there were none. The sole light admitted into the gloomy chamber proceeded from a square opening, about a foot in diameter, at a height of about seven feet from the floor. Yet what will the energy of true genius not effect? I resolved to clamber up to this hole. A vast quantity of wheels, pinions, and other cabalistic looking machinery stood opposite the hole, close to it; and through the hole there passed an iron rod from the machinery. Between the wheels and the wall where the hole lay, there was barely room for my body—yet I was desperate, and determined to persevere. I called Pompey to my side.

“You perceive that aperture, Pompey. I wish to look through it. You will stand here just beneath the hole—so. Now, hold out one of your hands, Pompey, and let me step upon it—thus. Now, the other hand, Pompey, and with its aid I will get upon your shoulders.”

He did everything I wished, and I found, upon getting up, that I could easily pass my head and neck through the aperture. The prospect was sublime. Nothing could be more magnificent. I merely paused a moment to bid Diana behave herself, and assure Pompey that I would be considerate and bear as lightly as possible upon his shoulders. I told him I would be tender of his feelings—*ossi tender que beefsteak*. Having done this justice to my faithful friend, I gave myself up with great zest and enthusiasm to the enjoyment of the scene which so obligingly spread itself out before my eyes.

Upon this subject, however, I shall forbear to dilate. I will not describe the city of Edinburgh. Every one has been to Edinburgh—the classic

Edina. I will confine myself to the momentous details of my own lamentable adventure. Having, in some measure, satisfied my curiosity in regard to the extent, situation, and general appearance of the city, I had leisure to survey the church in which I was, and the delicate architecture of the steeple. I observed that the aperture through which I had thrust my head was an opening in the dial-plate of a gigantic clock, and must have appeared, from the street, as a large keyhole, such as we see in the face of French watches. No doubt the true object was to admit the arm of an attendant, to adjust, when necessary, the hands of the clock within. I observed also, with surprise, the immense size of these hands, the longest of which could not have been less than ten feet in length, and, where broadest, eight or nine inches in breadth. They were of solid steel apparently, and their edges appeared to be sharp. Having noticed these particulars, and some others, I again turned my eyes upon the glorious prospect below, and soon became absorbed in contemplation.

From this, after some minutes, I was aroused by the voice of Pompey, who declared he could stand it no longer, and requested that I would be so kind as to come down. This was unreasonable, and I told him so in a speech of some length. He replied but with an evident misunderstanding of my ideas upon the subject. I accordingly grew angry, and told him in plain words, that he was a fool, that he had committed an *ignoramus e-clench-eye*, that his notions were mere *insommary Bovis*, and his words little better than *an ennemywerrybor'em*. With this he appeared satisfied, and I resumed my contemplations.

It might have been half an hour after this altercation when, as I was deeply absorbed in the heav-

only scenery beneath me, I was startled by something very cold which pressed with a gentle pressure upon the back of my neck. It is needless to say that I felt inexpressibly alarmed. I knew that Pompey was beneath my feet, and that Diana was sitting, according to my explicit directions, upon her hind legs in the farthest corner of the room. What could it be? Alas! I but too soon discovered. Turning my head gently to one side, I perceived, to my extreme horror, that the huge, glittering, scimeter-like minute-hand of the clock, had, in the course of its hourly revolution, *descended upon my neck*. There was, I knew, not a second to be lost. I pulled back at once—but it was too late. There was no chance of forcing my head through the mouth of that terrible trap in which it was so fairly caught, and which grew narrower and narrower with a rapidity too horrible to be conceived. The agony of that moment is not to be imagined. I threw up my hands and endeavored, with all my strength, to force upward the ponderous iron bar. I might as well have tried to lift the cathedral itself. Down, down, down it came, closer and yet closer. I screamed to Pompey for aid: but he said I had hurt his feelings by calling him “an ignorant old squint eye.” I yelled to Diana; but she only said “bow-wow-wow,” and that “I had told her on no account to stir from the corner.” Thus I had no relief to expect from my associates.

Meantime the ponderous and terrific *Scythe of Time* (for I now discovered the literal import of that classical phrase) had not stopped, nor was it likely to stop, in its career. Down and still down, it came. It had already buried its sharp edge a full inch in my flesh, and my sensations grew indistinct and confused. At one time I fancied myself

in Philadelphia with the stately Dr. Moneypenny, at another in the back parlor of Mr. Blackwood receiving his invaluable instructions. And then again the sweet recollection of better and earlier times came over me, and I thought of that happy period when the world was not all a desert, and Pompey not altogether cruel.

The ticking of the machinery amused me. *Amused me*, I say, for my sensations now bordered upon perfect happiness, and the most trifling circumstances afforded me pleasure. The eternal *click-clack, click-clack, click-clack*, of the clock was the most melodious of music in my ears, and occasionally even put me in mind of the grateful sermonic harangues of Dr. Ollapod. Then there were the great figures upon the dial-plate—how intelligent, how intellectual, they all looked! And presently they took to dancing the Mazurka, and I think it was the figure V who performed the most to my satisfaction. She was evidently a lady of breeding. None of your swaggerers, and nothing at all indelicate in her motions. She did the piroquette to admiration—whirling round upon her apex. I made an endeavor to hand her a chair, for I saw that she appeared fatigued with her exertions—and it was not until then that I fully perceived my lamentable situation. Lamentable indeed! The bar had buried itself two inches in my neck. I was aroused to a sense of exquisite pain. I prayed for death, and, in the agony of the moment, could not help repeating those exquisite verses of the poet Miguel De Cervantes:

Vanny Buren, tan escondida
Query no te senty venny
Pork and pleasure, delly morry
Nommy, torny, darry, widdy!

But now a 'new horror presented itself, and one indeed sufficient to startle the strongest nerves. My eyes, from the cruel pressure of the machine, were absolutely starting from their sockets. While I was thinking how I should possibly manage without them, one actually tumbled out of my head, and, rolling down the steep side of the steeple, lodged in the rain gutter which ran along the eaves of the main building. The loss of the eye was not so much as the insolent air of independence and contempt with which it regarded me after it was out. There it lay in the gutter just under my nose, and the airs it gave itself would have been ridiculous had they not been disgusting. Such a winking and blinking were never before seen. This behavior on the part of my eye in the gutter was not only irritating on account of its manifest insolence and shameful ingratitude, but was also exceedingly inconvenient on account of the sympathy which always exists between two eyes of the same head, however far apart. I was forced, in a manner, to wink and to blink, whether I would or not, in exact concert with the scoundrelly thing that lay just under my nose. I was presently relieved, however, by the dropping out of the other eye. In falling it took the same direction (possibly a concerted plot) as its fellow. Both rolled out of the gutter together, and in truth I was very glad to get rid of them.

The bar was now four inches and a half deep in my neck, and there was only a little bit of skin to cut through. My sensations were those of entire happiness, for I felt that in a few minutes, at farthest, I should be relieved from my disagreeable situation. And in this expectation I was not at all deceived. At twenty-five minutes past five in the afternoon

precisely, the huge minute-hand had proceeded sufficiently far on its terrible revolution to sever the small remainder of my neck. I was not sorry to see the head which had occasioned me so much embarrassment at length make a final separation from my body. It first rolled down the side of the steeple, then lodged, for a few seconds, in the gutter, and then made its way, with a plunge, into the middle of the street.

I will candidly confess that my feelings were now of the most singular—nay, of the most mysterious, the most perplexing and incomprehensible character. My senses were here and there at one and the same moment. With my head I imagined, at one time, that I the head, was the real Signora Psyche Zenobia—at another I felt convinced that myself, the body, was the proper identity. To clear my ideas upon this topic I felt in my pocket for my snuff-box, but, upon getting it, and endeavoring to apply a pinch of its grateful contents in the ordinary manner, I became immediately aware of my peculiar deficiency, and threw the box at once down to my head. It took a pinch with great satisfaction, and smiled me an acknowledgment in return. Shortly afterwards it made me a speech, which I could hear but indistinctly without ears. I gathered enough, however, to know that it was astonished at my wishing to remain alive under such circumstances. In the concluding sentences it quoted the noble words of Ariosto—

*Il pover hommy che non sera corty
And have a combat tenty erry morty;*

thus comparing me to the hero who, in the heat of the combat, not perceiving that he was dead, continued to contest the battle with inextinguishable valor. There was nothing now to prevent my

getting down from my elevation, and I did so. What it was that Pompey saw so *very* peculiar in my appearance I have never yet been able to find out. The fellow opened his mouth from ear to ear, and shut his two eyes as if he were endeavoring to crack nuts between the lids. Finally, throwing off his overcoat, he made one spring for the staircase and disappeared. I hurled after the scoundrel those vehement words of Demosthenes—

Andrew O'Phlegethon, you really make haste to fly,
and then turned to the darling of my heart, to the one-eyed! the shaggy-haired Diana. Alas! what a horrible vision affronted my eyes? *Was* that a rat I saw skulking into his hole? *Are* these the picked bones of the little angel who has been cruelly devoured by the monster? Ye Gods! and what *do* I behold—*is* that the departed spirit, the shade, the ghost of my beloved puppy, which I perceive sitting with a grace so melancholy, in the corner? Harken! for she speaks, and, heavens! it is in the German of Schiller—

“Unt stubby duk, so stubby dun
Duk she! duk she!”

Alas! and are not her words too true?

And if I died at least I died
For thee—for thee.

Sweet creature! she *too* has sacrificed herself in my behalf. Dogless, niggerless, headless, what *now* remains for the unhappy Signora Psyche Zenobia? Alas—*nothing!* I have done.

MYSTIFICATION

Stid, if these be your "passados" and "montantes," I'll have none of them.

NED KNOWLES.

THE BARON RITZNER VON JUNG was of a noble Hungarian family, every member of which (at least as far back into antiquity as any certain records extend) was more or less remarkable for talent of some description—the majority for that species of *grotesquerie* in conception of which Tieck, a scion of the house, has given some vivid, although by no means the most vivid exemplifications. My acquaintance with Ritzner commenced at the magnificent Chateau Jung, into which a train of droll adventures, not to be made public, threw me during the summer months of the year 18—. Here it was I obtained a place in his regard, and here, with somewhat more difficulty, a partial insight into his mental conformation. In later days this insight grew more clear, as the intimacy which had at first permitted it became more close; and when, after three years separation, we met at G——n, I knew all that it was necessary to know of the character of the Baron Ritzner Von Jung.

I remember the buzz of curiosity which his advent excited within the college precincts on the night of the twenty-fifth of June. I remember still more distinctly, that while he was pronounced by all parties at first sight "the most remarkable man in the world," no person made any attempt at accounting for this opinion. That he was *unique* appeared

so undeniable, that it was deemed impertinent to inquire wherein the unicity consisted. But, letting this matter pass for the present, I will merely observe that, from the first moment of his setting foot within the limits of the university, he began to exercise over the habits, manners, persons, purses, and propensities of the whole community which surrounded him, an influence the most extensive and despotic, yet at the same time the most indefinite and altogether unaccountable. Thus the brief period of his residence at the university forms an era in its annals, and is characterized by all classes of people appertaining to it or its dependencies as "that very extraordinary epoch forming the domination of the Baron Ritzner Von Jung."

Upon his advent to G——n, he sought me out in my apartments. He was then of no particular age, by which I mean that it was impossible to form a guess respecting his age by any data personally afforded. He might have been fifteen or fifty, and *was* twenty-one years and seven months. He was by no means a handsome man—perhaps the reverse. The contour of his face was somewhat angular and harsh. His forehead was lofty and very fair; his nose a snub; his eyes large, heavy, glassy and meaningless. About the mouth there was more to be observed. The lips were gently protruded, and rested the one upon the other after such fashion that it is impossible to conceive any, even the most complex, combination of human features, conveying so entirely, and so singly, the idea of unmitigated gravity, solemnity and repose.

It will be perceived, no doubt, from what I have already said, that the Baron was one of those human anomalies now and then to be found, who make the science of *mystification* the study and the business

of their lives. For this science a peculiar turn of mind gave him instinctively the cue, while his physical appearance afforded him unusual facilities for carrying his projects into effect. I firmly believe that no student at G——n, during that renowned epoch so quaintly termed the domination of the Baron Ritzner Von Jung, ever rightly entered into the mystery which overshadowed his character. I truly think that no person at the university, with the exception of myself, ever suspected him to be capable of a joke, verbal or practical:—the old bulldog at the garden-gate would sooner have been accused,—the ghost of Heraclitus,—or the wig of the Emeritus Professor of Theology. This, too, when it was evident that the most egregious and unpardonable of all conceivable tricks, whimsicalities and buffooneries were brought about, if not directly by him, at least plainly through his intermediate agency or connivance. The beauty, if I may so call it, of his art *mystifique*, lay in that consummate ability (resulting from an almost intuitive knowledge of human nature, and a most wonderful self-possession,) by means of which he never failed to make it appear that the drolleries he was occupied in bringing to a point, arose partly in spite, and partly in consequence of the laudable efforts he was making for their prevention, and for the preservation of the good order and dignity of Alma Mater. The deep, the poignant, the overwhelming mortification, which upon each such failure of his praiseworthy endeavors, would suffuse every lineament of his countenance, left not the slightest room for doubt of his sincerity in the bosoms of even his most skeptical companions. The adroitness, too, was no less worthy of observation by which he contrived to shift the sense of the grotesque from the creator

to the created—from his own person to the absurdities to which he had given rise. In no instance before that of which I speak, have I known the habitual mystific escape the natural consequence of his manœuvres—an attachment of the ludicrous to his own character and person. Continually enveloped in an atmosphere of whim, my friend appeared to live only for the severities of society; and not even his own household have for a moment associated other ideas than those of the rigid and august with the memory of the Baron Ritzner Von Jung.

During the epoch of his residence at G——n it really appeared that the demon of the *dolce far niente* lay like an incubus upon the university. Nothing at least, was done, beyond eating and drinking, and making merry. The apartments of the students were converted into so many pot-houses, and there was no pot-house of them all more famous or more frequented than that of the Baron. Our carousals here were many, and boisterous, and long, and never unfruitful of events.

Upon one occasion we had protracted our sitting until nearly daybreak, and an unusual quantity of wine had been drunk. The company consisted of seven or eight individuals besides the Baron and myself. Most of these were young men of wealth, of high connection, of great family pride, and all alive with an exaggerated sense of honor. They abounded in the most ultra German opinions respecting the *duello*. To these Quixotic notions some recent Parisian publications, backed by three or four desperate, and fatal rencontres at G——n, had given new vigor and impulse; and thus the conversation, during the greater part of the night, had run wild upon the all-engrossing topic of the times. The Baron, who had been unusually silent and ab-

stracted in the earlier portion of the evening, at length seemed to be aroused from his apathy, took a leading part in the discourse, and dwelt upon the benefits, and more especially upon the beauties, of the received code of etiquette in passages of arms with an ardor, an eloquence, an impressiveness, and an affectionateness of manner, which elicited the warmest enthusiasm from his hearers in general, and absolutely staggered even myself, who well knew him to be at heart a ridiculer of those very points for which he contended, and especially to hold the entire *fanfaronade* of dueling etiquette in the sovereign contempt which it deserves.

Looking around me during a pause in the Baron's discourse, (of which my readers may gather some faint idea when I say that it bore resemblance to the fervid, chanting, monotonous, yet musical, sermonic manner of Coleridge,) I perceived symptoms of even more than the general interest in the countenance of one of the party. This gentleman, whom I shall call Hermann, was an original in every respect—except, perhaps, in the single particular that he was a very great fool. He contrived to bear, however, among a particular set at the university, a reputation for deep metaphysical thinking, and, I believe, for some logical talent. As a duelist he had acquired great renown, even at G——n. I forget the precise number of victims who had fallen at his hands; but they were many. He was a man of courage undoubtedly. But it was upon his minute acquaintance with the etiquette of the *duello*, and the *nicety* of his sense of honor, that he most especially prided himself. These things were a hobby which he rode to the death. To Ritzner, ever upon the look-out for the grotesque, his peculiarities had for a long time past afforded food for mystifi-

cation. Of this, however, I was not aware; although, in the present instance, I saw clearly that something of a whimsical nature was upon the *tapis* with my friend, and that Hermann was its especial object.

As the former proceeded in his discourse, or rather monologue, I perceived the excitement of the latter momentarily increasing. At length he spoke; offering some objection to a point insisted upon by R., and giving his reasons in detail. To these the Baron replied at length (still maintaining his exaggerated tone of sentiment) and concluding, in what I thought very bad taste, with a sarcasm and a sneer. The hobby of Hermann now took the bit in his teeth. This I could discern by the studied hair-splitting *farrago* of his rejoinder. His last words I distinctly remember. "Your opinions, allow me to say, Baron Von Jung, although in the main correct, are, in many nice points, discreditable to yourself and to the university of which you are a member. In a few respects they are even unworthy of serious refutation. I would say more than this, sir, were it not for the fear of giving you offence (here the speaker smiled blandly,) I would say, sir, that your opinions are not the opinions to be expected from a gentleman."

As Hermann completed this equivocal sentence, all eyes were turned upon the Baron. He became pale, then excessively red; then, dropping his pocket-handkerchief, stooped to recover it, when I caught a glimpse of his countenance, while it could be seen by no one else at the table. It was radiant with the quizzical expression which was its natural character, but which I had never seen it assume except when we were alone together, and when he unbent himself freely. In an instant afterward he stood erect, confronting Hermann; and so total an alteration of

countenance in so short a period I certainly never saw before. For a moment I even fancied that I had misconceived him, and that he was in sober earnest. He appeared to be stifling with passion, and his face was cadaverously white. For a short time he remained silent, apparently striving to master his emotion. Having at length seemingly succeeded, he reached a decanter which stood near him, saying as he held it firmly clenched—"The language you have thought proper to employ, Mynheer Hermann, in addressing yourself to me, is objectionable in so many particulars, that I have neither temper nor time for specification. That my opinions, however, are not the opinions to be expected from a gentleman, is an observation so directly offensive as to allow me but one line of conduct. Some courtesy, nevertheless, is due to the presence of this company, and to yourself, at this moment, as my guest. You will pardon me, therefore, if, upon this consideration, I deviate slightly from the general usage among gentlemen in similar cases of personal affront. You will forgive me for the moderate tax I shall make upon your imagination, and endeavor to consider, for an instant, the reflection of your person in yonder mirror as the living Mynheer Hermann himself. This being done, there will be no difficulty whatever. I shall discharge this decanter of wine at your image in yonder mirror, and thus fulfil all the spirit, if not the exact letter, of resentment for your insult, while the necessity of physical violence to your real person will be obviated."

With these words he hurled the decanter, full of wine, against the mirror which hung directly opposite Hermann; striking the reflection of his person with great precision, and of course shatter-

ing the glass into fragments. The whole company at once started to their feet, and, with the exception of myself and Ritzner, took their departure. As Hermann went out, the Baron whispered to me that I should follow him and make an offer of my services. To this I agreed; not knowing precisely what to make of so ridiculous a piece of business.

The duelist accepted my aid with his stiff and *ultra recherché* air, and, taking my arm, led me to his apartment. I could hardly forbear laughing in his face while he proceeded to discuss, with the profoundest gravity, what he termed "the refinedly peculiar character" of the insult he had received. After a tiresome harangue in his ordinary style, he took down from his book-shelves a number of musty volumes on the subject of the *duello*, and entertained me for a long time with their contents; reading aloud, and commenting earnestly as he read. I can just remember the titles of some of the works. There were the "Ordonnance of Philip le Bel on Single Combat"; the "Theatre of Honor," by Favyn, and a treatise "On the Permission of Duels," by Andiguier. He displayed, also, with much pomposity, Brantome's "Memoirs of Duels," published at Cologne, in 1666, in the types of Elzevir—a precious and unique vellum-paper volume, with a fine margin, and bound by Derôme. But he requested my attention particularly, and with an air of mysterious sagacity, to a thick octavo, written in barbarous Latin by one Hedelin, a Frenchman, and having the quaint title, "*Duelli Lex Scripta, et non; aliterque.*" From this he read me one of the drollest chapters in the world concerning "*Injurie per applicationem, per constructionem, et per se,*" about half of which, he averred, was strictly applicable to his own "refinedly peculiar" case, although not one syllable of

the whole matter could I understand for the life of me. Having finished the chapter, he closed the book, and demanded what I thought necessary to be done. I replied that I had entire confidence in his superior delicacy of feeling, and would abide by what he proposed. With this answer he seemed flattered, and sat down to write a note to the Baron. It ran thus:

SIR,—My friend, M. P——, will hand you this note. I find it incumbent upon me to request, at your earliest convenience, an explanation of this evening's occurrences at your chambers. In the event of your declining this request, Mr. P. will be happy to arrange, with any friend whom you may appoint, the steps preliminary to a meeting.

With sentiments of perfect respect,

Your most humble servant,

JOHAN HERMANN.

To the Baron Ritzner Von Jung,

August 18th, 18—.

Not knowing what better to do, I called upon Ritzner with this epistle. He bowed as I presented it; then, with a grave countenance, motioned me to a seat. Having perused the cartel, he wrote the following reply, which I carried to Hermann.

SIR,

Through our common friend, Mr. P., I have received your note of this evening. Upon due reflection I frankly admit the propriety of the explanation you suggest. This being admitted, I still find great difficulty, (owing to the *refinedly peculiar* nature of our disagreement, and of the personal affront offered on my part,) in so wording what I have to say by way of apology, as to meet all the minute

exigencies, and all the variable shadows of the case. I have great reliance, however, on that extreme delicacy of discrimination, in matters appertaining to the rules of etiquette, for which you have been so long and so pre-eminently distinguished. With perfect certainty, therefore, of being comprehended, I beg leave, in lieu of offering any sentiments of my own, to refer you to the opinions of the *Sieur Hedelin*, as set forth in the ninth paragraph of the chapter of "*Injurie per applicationem, per constructionem, et per se*," in his "*Duelli Lex scripta, et non; aliterque*." The nicety of your discernment in all the matters here treated, will be sufficient, I am assured, to convince you *that the mere circumstance of me referring you to this admirable passage, ought to satisfy your request, as a man of honor, for explanation.*

With sentiments of profound respect,

Your most obedient servant,

VON JUNS.

The Herr Johan Hermann

August 18th, 18—.

Hermann commenced the perusal of this epistle with a scowl, which, however, was converted into a smile of the most ludicrous self-complacency as he came to the rigmarole about *Injurie per applicationem, per constructionem, et per se*. Having finished reading, he begged me, with the blindest of all possible smiles, to be seated, while he made reference to the treatise in question. Turning to the passage specified, he read it with great care to himself, then closed the book, and desired me, in my character of confidential acquaintance, to express to the Baron Von Jung his exalted sense of his chivalrous behavior, and, in that of second, to assure him that the explanation

offered was of the fullest, the most honorable, and the most unequivocally satisfactory nature.

Somewhat amazed at all this, I made my retreat to the Baron. He seemed to receive Hermann's amicable letter as a matter of course, and after a few words of general conversation, went to an inner room and brought out the everlasting treatise "*Duelli Lex scripta, et non; aliterque.*" He handed me the volume and asked me to look over some portion of it. I did so, but to little purpose, not being able to gather the least particle of meaning. He then took the book himself, and read me a chapter aloud. To my surprise, what he read proved to be a most horribly absurd account of a duel between two baboons. He now explained the mystery; showing that the volume, as it appeared *prima facie*, was written upon the plan of the nonsense verses of Du Bartas; that is to say, the language was ingeniously framed so as to present to the ear all the outward signs of intelligibility, and even of profundity, while in fact not a shadow of meaning existed. The key to the whole was found in leaving out every second and third word alternately, when there appeared a series of ludicrous quizzes upon a single combat as practised in modern times.

The Baron afterwards informed me that he had purposely thrown the treatise in Hermann's way two or three weeks before the adventure, and that he was satisfied, from the general tenor of his conversation, that he had studied it with the deepest attention, and firmly believed it to be a work of unusual merit. Upon this hint he proceeded. Hermann would have died a thousand deaths rather than acknowledge his inability to understand anything and everything in the universe that had ever been written about the *duello*.

DIDDLELING

CONSIDERED AS ONE OF THE EXACT SCIENCES

Hey, diddle diddle,
The cat and the fiddle

SINCE the world began there have been two Jeremys. The one wrote a Jeremiad about usuary, and was called Jeremy Bentham. He has been much admired by Mr. John Neal, and was a great man in a small way. The other gave name to the most important of the Exact Sciences, and was a great man in a *great* way—I may say, indeed, in the very greatest of ways.

Diddling—or the abstract idea conveyed by the verb to diddle—is sufficiently well understood. Yet the fact, the deed, the thing *diddling*, is somewhat difficult to define. We may get, however, at a tolerably distinct conception of the matter in hand, by defining—not the thing, *diddling*, in itself—but man, as an animal that diddles. Had Plato but hit upon this, he would have been spared the affront of the picked chicken.

Very pertinently it was demanded of Plato, why a picked chicken, which was clearly a “biped without feathers,” was not, according to his own definition, a man? But I am not to be bothered by any similar query. Man is an animal that diddles, and there is *no* animal that diddles *but* man. It will take an entire hen-coop of picked chickens to get over that.

What constitutes the essence, the nare, the principle of diddling is, in fact, peculiar to the class of creatures that wear coats and pantaloons. A crow thieves; a fox cheats; a weasel outwits; a man diddles. To diddle is his destiny. "Man was made to mourn," says the poet. But not so:—he was made to diddle. This is his aim—his object—his *end*. And for this reason when a man's diddled we say he's "*done*."

Diddling, rightly considered, is a compound, of which the ingredients are minuteness, interest, perseverance, ingenuity, audacity, *nonchalance*, originality, impertinence, and *grin*.

Minuteness:—Your diddler is minute. His operations are upon a small scale. His business is retail, for cash, or approved paper at sight. Should he ever be tempted into magnificent speculation, he then, at once, loses his distinctive features, and becomes what we term "financier." This latter word conveys the diddling idea in every respect except that of magnitude. A diddler may thus be regarded as a banker *in petto*—a "financial operation," as a diddle at Brobdignag. The one is to the other, as Homer to "Flaccus"—as a Mastodon to a mouse—as the tail of a comet to that of a pig.

Interest:—Your diddler is guided by self-interest. He scorns to diddle for the mere *sake* of the diddle. He has an object in view—his pocket—and yours. He regards always the main chance. He looks to Number One. You are Number Two, and must look to yourself.

Perseverance:—Your diddler perseveres. He is not readily discouraged. Should even the banks break, he cares nothing about it. He steadily pursues his end, and

Ut canis a corio nunquam absterrebitur uncto,
so he never lets go of his game.

Ingenuity.—Your diddler is ingenious. He has constructiveness large. He understands plot. He invents and circumvents. Were he not Alexander he would be Diogenes. Were he not a diddler, he would be a maker of patent rat-traps or an angler for trout.

Audacity.—Your diddler is audacious.—He is a bold man. He carries the war into Africa. He conquers all by assault. He would not fear the daggers of the Frey Herren. With a little more prudence Dick Turpin would have made a good diddler; with a trifle less blarney, Daniel O'Connell; with a pound or two more brains, Charles the Twelfth.

Nonchalance.—Your diddler is *nonchalant*. He is not at all nervous. He never *had* any nerves. He is never seduced into a flurry. He is never put out—unless put out of doors. He is cool—cool as a cucumber. He is calm—"calm as a smile from Lady Bury." He is easy—easy as an old glove, or the damsels of ancient Baia.

Originality.—Your diddler is original—conscientiously so. His thoughts are his own. He would scorn to employ those of another. A stale trick is his aversion. He would return a purse, I am sure, upon discovering that he had obtained it by an unoriginal diddle.

Impertinence.—Your diddler is impertinent. He swaggers. He sets his arms a-kimbo. He thrusts his hands in his trowsers' pockets. He sneers in your face. He treads on your corns. He eats your dinner, he drinks your wine, he borrows your money, he pulls your nose, he kicks your poodle, and he kisses your wife.

Grin.—Your *true* diddler winds up all with a grin. But this nobody sees but himself. He grins

when his daily work is done—when his allotted labors are accomplished—at night in his own closet, and altogether for his own private entertainment. He goes home. He locks his door. He divests himself of his clothes. He puts out his candle. He gets into bed. He places his head upon the pillow. All this done, and your diddler *grins*. This is no hypothesis. It is a matter of course. I reason *à priori*, and a diddle would be *no* diddle without a grin.

The origin of the diddle is referrible to the infancy of the Human Race. Perhaps the first diddler was Adam. At all events, we can trace the science back to a very remote period of antiquity. The moderns, however, have brought it to a perfection never dreamed of by our thick-headed progenitors. Without pausing to speak of the “old saws,” therefore, I shall content myself with a compendious account of some of the more “modern instances.”

A very good diddle is this. A housekeeper in want of a sofa, for instance, is seen to go in and out of several cabinet warehouses. At length she arrives at one offering an excellent variety. She is accosted, and invited to enter, by a polite and voluble individual at the door. She finds a sofa well adapted to her views, and, upon inquiring the price, is surprised and delighted to hear a sum named at least twenty per cent. lower than her expectations. She hastens to make the purchase, gets a bill and receipt, leaves her address, with a request that the article be sent home as speedily as possible, and retires amid a profusion of bows from the shopkeeper. The night arrives and no sofa. The next day passes, and still none. A servant is sent to make inquiry about the delay. The whole transaction is denied. No sofa has been sold—no money received—

except by the diddler, who played shop-keeper for the nonce.

Our cabinet warehouses are left entirely unattended, and thus afford every facility for a trick of this kind. Visitors enter, look at furniture, and depart unheeded and unseen. Should any one wish to purchase, or to inquire the price of an article, a bell is at hand, and this is considered amply sufficient.

Again, quite a respectable diddle is this. A well-dressed individual enters a shop; makes purchase to the value of a dollar; finds, much to his vexation, that he has left his pocket-book in another coat pocket; and so says to the shop-keeper—

“My dear sir, never mind!—just oblige me, will you, by sending the bundle home? But stay! I really believe that I have nothing less than a five dollar bill, even *there*. However, you can send four dollars in change *with* the bundle, you know.”

“Very good, sir,” replies the shop-keeper, who entertains, at once, a lofty opinion of the high-mindedness of his customer. “I know fellows,” he says to himself, “who would just have put the goods under their arm, and walked off with a promise to call and pay the dollar as they came by in the afternoon.”

A boy is sent with the parcel and change. On the route, quite accidentally, he is met by the purchaser, who exclaims:

“Ah! this is my bundle, I see—I thought you had been home with it, long ago. Well, go on! My wife, Mrs. Trotter, will give you the five dollars—I left instructions with her to that effect. The change you might as well give to *me*—I shall want some silver for the Post Office. Very good! One, two, is this a good quarter?—three, four—quite right! Say to Mrs. Trotter that you met me, and be sure now and *do not loiter on the way*.”

The boy doesn't loiter at all—but he is a very long time in getting back from his errand—for no lady of the precise name of Mrs. Trotter is to be discovered. He consoles himself, however, that he has not been such a fool as to leave the goods without the money, and re-entering his shop with a self-satisfied air, feels sensibly hurt and indignant when his master asks him what has become of the change.

A very simple diddle, indeed, is this. The captain of a ship which is about to sail, is presented by an official looking person, with an unusually moderate bill of city charges. Glad to get off so easily, and confused by a hundred duties pressing upon him all at once, he discharges the claim forthwith. In about fifteen minutes, another and less reasonable bill is handed him by one who soon makes it evident that the first collector was a diddler, and the original collection a diddle.

And here, too, is a somewhat similar thing. A steamboat is casting loose from the wharf. A traveller, portmanteau in hand, is discovered running towards the wharf at full speed. Suddenly, he makes a dead halt, stoops, and picks up something from the ground in a very agitated manner. It is a pocket-book, and—"Has any gentleman lost a pocket-book?" he cries. No one can say that he has exactly lost a pocket-book; but a great excitement ensues, when the treasure trove is found to be of value. The boat however, must not be detained.

"Time and tide wait for no man," says the captain. "For God's sake, stay only a few minutes," says the finder of the book—"the true claimant will presently appear."

"Can't wait!" replies the man in authority; "cast off there, d'ye hear?"

"What *am* I to do?" asks the finder, in great tribu-

lation. "I am about to leave the country for some years, and I cannot conscientiously retain this large amount in my possession. I beg your pardon, sir," [here he addresses a gentleman on shore,] "but you have the air of an honest man. *Will* you confer upon me the favor of taking charge of this pocket-book—I *know* I can trust you—and of advertising it? The notes, you see, amount to a very considerable sum. The owner will, no doubt, insist upon rewarding you for your trouble—"

"*Me!*—no, *you!*—it was *you* who found the book."

"Well, if you *must* have it so—I will take a small reward—just to satisfy your scruples. Let me see—why these notes are all hundreds—bless my soul! a hundred is too much to take—fifty would be quite enough, I am sure—"

"Cast off there!" says the captain.

"But then I have no change for a hundred, and upon the whole, *you* had better—"

"Cast off there!" says the captain.

"Never mind!" cries the gentleman on shore, who has been examining his own pocket-book for the last minute or so—"never mind! *I* can fix it—here is a fifty on the Bank of North America—throw me the book."

And the over-conscientious finder takes the fifty with marked reluctance, and throws the gentleman the book, as desired, while the steamboat fumes and fizzes on her way. In about half an hour after her departure, the "large amount" is seen to be a "counterfeit presentment," and the whole thing a capital diddle.

A bold diddle is this. A camp-meeting, or something similar, is to be held at a certain spot which is accessible only by means of a free bridge. A diddler stations himself upon this bridge, respect-

fully informs all passers by of the new county law, which establishes a toll of one cent for foot passengers, two for horses and donkeys, and so forth, and so forth. Some grumble but all submit, and the diddler goes home a wealthier man by some fifty or sixty dollars well earned. This taking a toll from a great crowd of people is an excessively troublesome thing.

A neat diddle is this. A friend holds one of the diddler's promises to pay, filled up and signed in due form, upon the ordinary blanks printed in red ink. The diddler purchases one or two dozen of these blanks, and every day dips one of them in his soup, makes his dog jump for it, and finally gives it to him as a *bonne bouche*. The note arriving at maturity, the diddler, with the diddler's dog, calls upon the friend, and the promise to pay is made the topic of discussion. The friend produces it from his *escritoire*, and is in the act of reaching it to the diddler, when up jumps the diddler's dog and devours it forthwith. The diddler is not only surprised but vexed and incensed at the absurd behavior of his dog, and expresses his entire readiness to cancel the obligation at any moment when the evidence of the obligation shall be forthcoming.

A very minute diddle is this. A lady is insulted in the street by a diddler's accomplice. The diddler himself flies to her assistance, and, giving his friend a comfortable thrashing, insists upon attending the lady to her own door. He bows, with his hand upon his heart, and most respectfully bids her adieu. She entreats him, as her deliverer, to walk in and be introduced to her big brother and her papa. With a sigh, he declines to do so. "Is there no way, then, sir," she murmurs, "in which I may be permitted to testify my gratitude?"

"Why, yes, madam, there is. Will you be kind enough to lend me a couple of shillings?"

In the first excitement of the moment the lady decides upon fainting outright. Upon second thought, however, she opens her purse-strings and delivers the specie. Now this, I say, is a diddle minute—for one entire moiety of the sum borrowed has to be paid to the gentleman who had the trouble of performing the insult, and who had then to stand still and be thrashed for performing it.

Rather a small, but still a scientific diddle is this. The diddler approaches the bar of a tavern, and demands a couple of twists of tobacco. They are handed to him, when, having slightly examined them, he says:

"I don't much like this tobacco. Here, take it back, and give me a glass of brandy and water in its place."

The brandy and water is furnished and imbibed, and the diddler makes his way to the door. But the voice of the tavern-keeper arrests him.

"I believe, sir, you have forgotten to pay for your brandy and water."

"Pay for my brandy and water!—didn't I give you the tobacco for the brandy and water? What more would you have?"

"But sir, if you please, I don't remember that you paid for the tobacco."

"What do you mean by that, you scoundrel?—Didn't I give you back your tobacco? Isn't *that* your tobacco lying *there*? Do you expect me to pay for what I did not take?"

"But, sir," says the publican, now rather at a loss what to say, "but sir—"

"But me no buts, sir," interrupts the diddler, apparently in very high dudgeon, and slamming

the door after him, as he makes his escape.—“But me no buts, sir, and none of your tricks upon travellers.”

Here again is a very clever diddle, of which the simplicity is not its least recommendation. A purse, or pocket-book, being really lost, the loser inserts in *one* of the daily papers of a large city a fully descriptive advertisement.

Whereupon our diddler copies the *facts* of this advertisement, with a change of heading, of general phraseology, and *address*. The original, for instance, is long, and verbose, is headed “A Pocket-Book Lost!” and requires the treasure, when found, to be left at No. 1 Tom street. The copy is brief, and being headed with “Lost” only, indicates No. 2 Dick, or No. 3 Harry street, as the locality at which the owner may be seen. Moreover, it is inserted in at least five or six of the daily papers of the day, while in point of time, it makes its appearance only a few hours after the original. Should it be read by the loser of the purse, he would hardly suspect it to have any reference to his own misfortune. But, of course, the chances are five or six to one, that the finder will repair to the address given by the diddler, rather than to that pointed out by the rightful proprietor. The former pays the reward, pockets the treasure and decamps.

Quite an analogous diddle is this. A lady of ton has dropped, somewhere in the street, a diamond ring of very unusual value. For its recovery, she offers some forty or fifty dollars reward—giving, in her advertisement, a very minute description of the gem, and of its settings, and declaring that, upon its restoration to No. so and so, in such and such Avenue, the reward will be paid *instantly*, without a single question being asked. During the lady’s

absence from home, a day or two afterwards, a ring is heard at the Door of No. so and so, in such and such Avenue; a servant appears; the lady of the house is asked for and is declared to be out, at which astounding information, the visitor expresses the most poignant regret. His business is of importance and concerns the lady herself. In fact, he had the good fortune to find her diamond ring. But, perhaps it would be as well that he should call again. "By no means!" says the servant; and "By no means!" says the lady's sister and the lady's sister-in-law, who are summoned forthwith. The ring is clamorously identified, the reward is paid, and the finder nearly thrust out of doors. The lady returns, and expresses some little dissatisfaction with her sister and sister-in-law, because they happen to have paid forty or fifty dollars for a *fac-simile* of her diamond ring—a *fac-simile* made out of real pinchbeck and unquestionable paste.

But as there is really no end to diddling, so there would be none to this essay, were I even to hint at half the variations, or inflections, of which this science is susceptible. I must bring this paper, perforce, to a conclusion, and this I cannot do better than by a summary notice of a very decent, but rather elaborate diddle, of which our own city was made the theatre, not very long ago, and which was subsequently repeated with success, in other still more verdant localities of the Union. A middle-aged gentleman arrives in town from parts unknown. He is remarkably precise, cautious, staid, and deliberate in his demeanor. His dress is scrupulously neat, but plain, unostentatious. He wears a white cravat, an ample waistcoat, made with an eye to comfort alone; thick-soled cosy-looking shoes, and pantaloons without straps. He has the whole air, in

fact, of your well-to-do, sober-sided, exact, and respectable "man of business," *par excellence*—one of the stern and outwardly hard, internally soft, sort of people that we see in the crack high comedies—fellows whose words are so many bonds, and who are noted for giving away guineas, in charity, with the one hand, while, in the way of mere bargain, they exact the uttermost fraction of a farthing with the other.

He makes much ado before he can get suited with a boarding house. He dislikes children. He has been accustomed to quiet. His habits are methodical—and then he would prefer getting into a private and respectable small family, piously inclined. Terms, however, are no object—only he must insist upon settling his bill on the first of every month, (it is now the second) and begs his landlady, when he finally obtains one to his mind, *not* on any account to forget his instructions upon this point—but to send in a bill, *and* receipt, precisely at ten o'clock, on the *first* day of every month, and under no circumstances to put it off to the second.

These arrangements made, our man of business rents an office in a reputable rather than in a fashionable quarter of the town. There is nothing he more despises than pretence. "Where there is much show," he says, "there is seldom anything very solid behind"—an observation which so profoundly impresses his landlady's fancy, that she makes a pencil memorandum of it forthwith, in her great family Bible, on the broad margin of the Proverbs of Solomon.

The next step is to advertise, after some such fashion as this, in the principal business sixpennies of this city—the pennies are eschewed as not "respectable"—and as demanding payment for all advertisements in advance. Our man of business

holds it as a point of his faith that work should never be paid for until done.

WANTED.—The advertisers, being about to commence extensive business operations in this city, will require the services of three or four intelligent and competent clerks, to whom a liberal salary will be paid. The very best recommendations, not so much for capacity, as for integrity, will be expected. Indeed, as the duties to be performed, involve high responsibilities, and large amounts of money must necessarily pass through the hands of those engaged, it is deemed advisable to demand a deposit of fifty dollars from each clerk employed. No person need apply, therefore, who is not prepared to leave this sum in the possession of the advertisers, and who cannot furnish the most satisfactory testimonials of morality. Young gentlemen piously inclined will be preferred. Application should be made between the hours of ten and eleven, A. M., and four and five, P. M., of Messrs.

Bogs, Hogs, Logs, Frogs, & Co.
No. 110 Dog Street.

By the thirty-first day of the month, this advertisement has brought to the office of Messrs. Bogs, Hogs, Logs, Frogs and Company, some fifteen or twenty young gentlemen piously inclined. But our man of business is in no hurry to conclude a contract with any—no man of business is *ever* precipitate—and it is not until the most rigid catechism in respect to the piety of each young gentleman's inclination, that his services are engaged and his fifty dollars receipted for, *just* by way of proper precaution, on the part of the respectable firm of Bogs, Hogs, Logs, Frogs, and Company. On the

morning of the first day of the next month, the landlady does *not* present her bill, according to promise—a piece of neglect for which the comfortable head of the house ending in *ogs*, would no doubt have chided her severely, could he have been prevailed upon to remain in town a day or two for that purpose.

As it is, the constables have had a sad time of it, running hither and thither, and all they can do is to declare the man of business most emphatically, a “hen knee high”—by which some persons imagine them to imply that, in fact, he is *n. e. i.*—by which again the very classical phrase *non est inventus*, is supposed to be understood. In the meantime the young gentlemen, one and all, are somewhat less piously inclined than before, while the landlady purchases a shilling’s worth of the best Indian rubber, and very carefully obliterates the pencil memorandum that some fool has made in her great family Bible, on the broad margin of the Proverbs of Solomon.

THE ANGEL OF THE ODD

AN EXTRAVAGANZA

IT was a chilly November afternoon. I had just consummated an unusually hearty dinner, of which the dyspeptic *truffe* formed not the least important item, and was sitting alone in the dining-room, with my feet upon the fender, and at my elbow a small table which I had rolled up to the fire, and upon which were some apologies for dessert, with some miscellaneous bottles of wine, spirit and *liqueur*. In the morning I had been reading Glover's "Leonidas," Wilkie's "Epigoniad," Lamartine's "Pilgrimage," Barlow's "Columbiad," Tuckerman's "Sicily," and Griswold's "Curiosities"; I am willing to confess, therefore, that I now felt a little stupid. I made effort to arouse myself by aid of frequent Lafitte, and, all failing, I betook myself to a stray newspaper in despair. Having carefully perused the column of "houses to let," and the column of "dogs lost," and then the two columns of "wives and apprentices runaway," I attacked with great resolution the editorial matter, and, reading it from beginning to end without understanding a syllable, conceived the possibility of its being Chinese, and so re-read it from the end to the beginning, but with no more satisfactory result. I was about throwing away, in disgust,

This folio of four pages, happy work
Which not even critics criticise,

when I felt my attention somewhat aroused by the paragraph which follows:

"The avenues to death are numerous and strange. A London paper mentions the decease of a person from a singular cause. He was playing at 'puff the dart,' which is played with a long needle inserted in some worsted, and blown at a target through a tin tube. He placed the needle at the wrong end of the tube, and drawing his breath strongly to puff the dart forward with force, drew the needle into his throat. It entered the lungs, and in a few days killed him."

Upon seeing this I fell into a great rage, without exactly knowing why. "This thing," I exclaimed, "is a contemptible falsehood—a poor hoax—the lees of the invention of some pitiable penny-a-liner—of some wretched concoctor of accidents in Cocaigue. These fellows, knowing the extravagant gullibility of the age, set their wits to work in the imagination of improbable possibilities—of odd accidents, as they term them; but to a reflecting intellect (like mine," I added, in parenthesis, putting my forefinger unconsciously to the side of my nose,) "to a contemplative understanding such as I myself possess, it seems evident at once that the marvellous increase of late in these 'odd accidents' is by far the oddest accident of all. For my own part, I intend to believe nothing henceforward that has anything of the 'singular' about it."

"Mein Gott, den, vat a vool you bees for dat!" replied one of the most remarkable voices I ever heard. At first I took it for a rumbling in my ears—such as a man sometimes experiences when getting very drunk—but, upon second thought, I considered the sound as more nearly resembling that which proceeds from an empty barrel beaten with a big stick; and, in fact, this I should have concluded it to be, but for the articulation of the syllables and

words. I am by no means naturally nervous, and the very few glasses of Lafitte which I had sipped served to embolden me no little, so that I felt nothing of trepidation, but merely uplifted my eyes with a leisurely movement, and looked carefully around the room for the intruder. I could not, however, perceive any one at all.

"Humph!" resumed the voice, as I continued my survey, "you mus pe so dronk as de pig, den, for not zee me as I zit here at your zide."

Hereupon I bethought me of looking immediately before my nose, and there, sure enough, confronting me at the table sat a personage nondescript, although not altogether indescribable. His body was a wine-pipe, or a rum-puncheon, or something of that character, and had a truly Falstaffian air. In its nether extremity were inserted two kegs, which seemed to answer all the purposes of legs. For arms there dangled from the upper portion of the carcass two tolerably long bottles, with the necks outward for hands. All the head that I saw the monster possessed of was one of those Hessian canteens which resembled a large snuff-box with a hole in the middle of the lid. This canteen (with a funnel on its top, like a cavalier cap slouched over the eyes) was set on edge upon the puncheon, with the hole toward myself; and through this hole, which seemed puckered up like the mouth of a very precise old maid, the creature was emitting certain rumbling and grumbling noises which he evidently intended for intelligible talk.

"I zay," said he, "you mos pe dronk as de pig, vor zit dare and not zee me zit ere; and I zay, doo, you mos pe pigger vol as de goose, vor to dispelief vat iz print in de print. 'Tiz de troof—dat it iz—eberry vord ob it."

"Who are you, pray?" said I, with much dignity, although somewhat puzzled; "how did you get here? and what is it you are talking about?"

"As vor ow I com'd ere," replied the figure, "dat iz none of your pizziness; and as vor vat I be talking apout, I be talk apout vat I tink proper; and as vor who I be, vy dat is de very ting I com'd here for to let you zee for yourzelf."

"You are a drunken vagabond," said I, "and I shall ring the bell and order my footman to kick you into the street."

"He! he! he!" said the fellow, "hu! hu! hu! dat you can't do."

"Can't do!" said I, "what do you mean?—I can't do what?"

"Ring de pell"; he replied, attempting a grin with his little villainous mouth.

Upon this I made an effort to get up, in order to put my threat into execution; but the ruffian just reached across the table very deliberately, and hitting me a tap on the forehead with the neck of one of the long bottles, knocked me back into the arm-chair from which I had half arisen. I was utterly astounded; and, for a moment, was quite at a loss what to do. In the meantime, he continued his talk.

"You zee," said he, "it iz te bess vor zit still; and now you shall know who I pe. Look at me! zee! I am te *Angel ov te Odd*."

"And odd enough, too," I ventured to reply; "but I was always under the impression that an angel had wings."

"Te wing!" he cried, highly incensed, "vat I pe do mit te wing? Mein Gott! do you take me vor a shicken?"

"No—oh no!" I replied, much alarmed, "you are no chicken—certainly not."

"Well, den, zit still and pehabe yourself, or I'll rap you again mid me vist. It iz te shicken ab te wing, und te owl ab te wing, und te imp ab te wing, und te head-teuffel ab te wing. Te angel ab *not* te wing, and I am te *Angel ov te Odd*."

"And your business with me at present is—is"—

"My pizzness!" ejaculated the thing, "vy vat a low bred buppy you mos pe vor to ask a gentlemen und an angel apout his pizziness!"

This language was rather more than I could bear, even from an angel; so, plucking up courage, I seized a salt-cellar which lay within reach, and hurled it at the head of the intruder. Either he dodged, however, or my aim was inaccurate; for all I accomplished was the demolition of the crystal which protected the dial of the clock upon the mantle-piece. As for the Angel, he evinced his sense of my assault by giving me two or three hard consecutive raps upon the forehead as before. These reduced me at once to submission, and I am almost ashamed to confess that either through pain or vexation, there came a few tears into my eyes.

"Mein Gott!" said the Angel of the Odd, apparently much softened at my distress; "mein Gott, te man is eder ferry drunk or ferry zorry. You mos not trink it so strong—you mos put te water in te wine. Here, trink dis, like a goot veller, und don't gry now—don't!"

Hereupon the Angel of the Odd replenished my goblet (which was about a third full of port) with a colorless fluid that he poured from one of his hand bottles. I observed that these bottles had labels about their necks, and that these labels were inscribed "*Kirschenwasser*."

The considerate kindness of the Angel mollified me in no little measure; and, aided by the water with which he diluted my Port more than once, I at length regained sufficient temper to listen to his very extraordinary discourse. I cannot pretend to recount all that he told me, but I gleaned from what he said that he was the genius who presided over the *contretemps* of mankind, and whose business it was to bring about the *odd accidents* which are continually astonishing the skeptic. Once or twice, upon my venturing to express my total incredulity in respect to his pretensions, he grew very angry indeed, so that at length I considered it the wiser policy to say nothing at all, and let him have his own way. He talked on, therefore, at great length, while I merely leaned back in my chair with my eyes shut, and amused myself with munching raisins and filliping the stems about the room. But, by-and-by, the Angel suddenly construed this behavior of mine into contempt. He arose in a terrible passion, slouched his funnel down over his eyes, swore a vast oath, uttered a threat of some character which I did not precisely comprehend, and finally made me a low bow and departed, wishing me, in the language the archbishop in *Gil-Blas*, "*beaucoup de bonheur et un peu plus de bon sens.*"

His departure afforded me relief. The *very* few glasses of Lafitte that I had sipped had the effect of rendering me drowsy, and I felt inclined to take a nap of some fifteen or twenty minutes, as is my custom after dinner. At six I had an appointment of consequence, which it was quite indispensable that I should keep. The policy of insurance for my dwelling house had expired the day before; and, some dispute having arisen, it was agreed that, at six, I should meet the board of directors of the com-

pany and settle the terms of a renewal. Glancing upward at the clock on the mantel-piece, (for I felt too drowsy to take out my watch), I had the pleasure to find that I had still twenty-five minutes to spare. It was half past five; I could easily walk to the insurance office in five minutes; and my usual siestas had never been known to exceed five and twenty. I felt sufficiently safe, therefore, and composed myself to my slumbers forthwith.

Having completed them to my satisfaction, I again looked toward the time-piece and was half inclined to believe in the possibility of odd accidents when I found that, instead of my ordinary fifteen or twenty minutes, I had been dozing only three; for it still wanted seven and twenty of the appointed hour. I betook myself again to my nap, and at length a second time awoke, when, to my utter amazement, it *still* wanted twenty-seven minutes of six. I jumped up to examine the clock, and found that it had ceased running. My watch informed me that it was half past seven; and, of course, having slept two hours, I was too late for my appointment. "It will make no difference," I said: "I can call at the office in the morning and apologize; in the meantime what can be the matter with the clock?" Upon examining it I discovered that one of the raisin stems which I had been filliping about the room during the discourse of the Angel of the Odd, had flown through the fractured crystal, and lodging, singularly enough, in the key-hole, with an end projecting out-ward, had thus arrested the revolution of the minute hand.

"Ah!" said I, "I see how it is. This thing speaks for itself. A natural accident, such as *will* happen now and then!"

I gave the matter no further consideration, and

at my usual hour retired to bed. Here, having placed a candle upon a reading stand at the bed head, and having made an attempt to peruse some pages of the "Omnipresence of the Deity," I unfortunately fell asleep in less than twenty seconds, leaving the light burning as it was.

My dreams were terrifically disturbed by visions of the Angel of the Odd. Methought he stood at the foot of the couch, drew aside the curtains, and, in the hollow, detestable tones of a rum puncheon, menaced me with the bitterest vengeance for the contempt with which I had treated him. He concluded a long harangue by taking off his funnel-cap, inserting the tube into my gullet, and thus deluging me with an ocean of Kirschenwasser, which he poured, in a continuous flood, from one of the long necked bottles that stood him instead of an arm. My agony was at length insufferable, and I awoke just in time to perceive that a rat had run off with the lighted candle from the stand, but *not* in season to prevent his making his escape with it through the hole. Very soon, a strong suffocating odor assailed my nostrils; the house, I clearly perceived, was on fire. In a few minutes the blaze broke forth with violence, and in an incredibly brief period the entire building was wrapped in flames. All egress from my chamber, except through a window, was cut off. The crowd, however, quickly procured and raised a long ladder. By means of this I was descending rapidly, and in apparent safety, when a huge hog, about whose rotund stomach, and indeed about whose whole air and physiognomy, there was something which reminded me of the Angel of the Odd—when this hog, I say, which hitherto had been quietly slumbering in the mud, took it suddenly into his head that his left shoulder needed scratching, and

could find no more convenient rubbing-post than that afforded by the foot of the ladder. In an instant I was precipitated and had the misfortune to fracture my arm.

This accident, with the loss of my insurance, and with the more serious loss of my hair, the whole of which had been singed off by the fire, predisposed me to serious impressions, so that, finally, I made up my mind to take a wife. There was a rich widow disconsolate for the loss of her seventh husband, and to her wounded spirit I offered the balm of my vows. She yielded a reluctant consent to my prayers. I knelt at her feet in gratitude and adoration. She blushed and bowed her luxuriant tresses into close contact with those supplied me, temporarily, by Grandjean. I know not how the entanglement took place, but so it was. I arose with a shining pate, wigless; she in disdain and wrath, half buried in alien hair. Thus ended my hopes of the widow by an accident which could not have been anticipated, to be sure, but which the natural sequence of events had brought about.

Without despairing, however, I undertook the siege of a less implacable heart. The fates were again propitious for a brief period; but again a trivial incident interfered. Meeting my betrothed in an avenue thronged with the *élite* of the city, I was hastening to greet her with one of my best considered bows, when a small particle of some foreign matter, lodging in the corner of my eye, rendered me, for the moment, completely blind. Before I could recover my sight, the lady of my love had disappeared—irreparably affronted at what she chose to consider my premeditated rudeness in passing her by ungreeted. While I stood bewildered at the suddenness of this accident, (which might have happened, nevertheless,

to any one under the sun,) and while I still continued incapable of sight, I was accosted by the Angel of the Odd, who proffered me his aid with a civility which I had no reason to expect. He examined my disordered eye with much gentleness and skill, informed me that I had a drop in it, and (whatever a "drop" was) took it out, and afforded me relief.

I now considered it high time to die, (since fortune had so determined to persecute me), and accordingly made my way to the nearest river. Here, divesting myself of my clothes, (for there is no reason why we cannot die as we were born), I threw myself headlong into the current; the sole witness of my fate being a solitary crow that had been seduced into the eating of brandy-saturated corn, and so had staggered away from his fellows. No sooner had I entered the water than this bird took it into his head to fly away with the most indispensable portion of my apparel. Postponing, therefore, for the present, my suicidal design, I just slipped my nether extremities into the sleeves of my coat, and betook myself to a pursuit of the felon with all the nimbleness which the case required and its circumstances would admit. But my evil destiny attended me still. As I ran at full speed, with my nose up in the atmosphere, and intent only upon the purloiner of my property, I suddenly perceived that my feet rested no longer upon *terra-firma*; the fact is, I had thrown myself over a precipice, and should inevitably have been dashed to pieces but for my good fortune in grasping the end of a long guide-rope, which depended from a passing balloon.

As soon as I sufficiently recovered my senses to comprehend the terrific predicament in which I stood or rather hung, I exerted all the power of my

lungs to make that predicament known to the aeronaut overhead. But for a long time I exerted myself in vain. Either the fool could not, or the villain would not perceive me. Meantime the machine rapidly soared, while my strength even more rapidly failed. I was soon upon the point of resigning myself to my fate, and dropping quietly into the sea, when my spirits were suddenly revived by hearing a hollow voice from above, which seemed to be lazily humming an opera air. Looking up, I perceived the Angel of the Odd. He was leaning with his arms folded, over the rim of the car; and with a pipe in his mouth, at which he puffed leisurely, seemed to be upon excellent terms with himself and the universe. I was too much exhausted to speak, so I merely regarded him with an imploring air.

For several minutes, although he looked me full in the face, he said nothing. At length removing carefully his meerschaum from the right to the left corner of his mouth, he condescended to speak.

"Who pe you," he asked, "und what der teuffel you pe do dare?"

To this piece of impudence, cruelty and affectation, I could reply only by ejaculating the monosyllable "Help!"

"Elp!" echoed the ruffian—"not I. Dare iz te pottle—elp yourself, und pe tam'd!"

With these words he let fall a heavy bottle of Kirschenwasser which, dropping precisely upon the crown of my head, caused me to imagine that my brains were entirely knocked out. Impressed with this idea, I was about to relinquish my hold and give up the ghost with a good grace, when I was arrested by the cry of the Angel, who bade me hold on.

"Old on!" he said; "don't pe in te urry—don't!

Will you pe take de odder pottle, or ave you pe got zober yet and come to your zenzes?"

I made haste, hereupon, to nod my head twice—once in the negative, meaning thereby that I would prefer not taking the other bottle at present—and once in the affirmative, intending thus to imply that I *was* sober and *had* positively come to my senses. By these means I somewhat softened the Angel.

"Und you pelief, ten," he inquired, "at te last? You pelief, ten, in te possibility of te odd?"

I again nodded my head in assent.

"Und you ave pelief in *me*, te Angel of te Odd?"

I nodded again.

"Und you acknowledge tat you pe te blind dronk und te vool?"

I noded once more.

"Put your right hand into your left hand preeches pocket, ten, in token of your vull zubmizzion unto te Angel ov te Odd."

This thing, for very obvious reasons, I found it quite impossible to do. In the first place, my left arm had been broken in my fall from the ladder, and, therefore, had I let go my hold with the right hand, I must have let go altogether. In the second place, I could have no breeches until I came across the crow. I was therefore obliged, much to my regret, to shake my head in the negative—intending thus to give the Angel to understand that I found it inconvenient, just at that moment, to comply with his very reasonable demand! No sooner, however, had I ceased shaking my head than—

"Go to der teuffel, ten!" roared the Angle of the Odd.

In pronouncing these words, he drew a sharp knife across the guide-rope by which I was suspended, and as we then happened to be precisely over

my own house, (which, during my peregrinations, had been handsomely rebuilt,) it so occurred that I tumbled headlong down the ample chimney and alit upon the dining-room hearth.

Upon coming to my senses, (for the fall had very thoroughly stunned me,) I found it about four o'clock in the morning. I lay outstretched where I had fallen from the balloon. My head grovelled in the ashes of an extinguished fire, while my feet reposed upon the wreck of a small table, overthrown, and amid the fragments of a miscellaneous dessert, intermingled with a newspaper, some broken glasses and shattered bottles, and an empty jug of the Schiedam Kirschenwasser. Thus revenged himself the Angle of the Odd.
